Althusser and Law is the first book specifically dedicated to the place of law in Louis Althusser's philosophy. The growing importance of Althusser's philosophy in contemporary debates on the left has - for practical and political, as well theoretical reasons - made a sustained consideration of his conception of law more necessary than ever. As a form of what Althusser called 'Ideological State Apparatuses', law is at the forefront of political struggles: from the destruction of Labour Law to the exploitation of Patent Law; from the privatisation of Public Law to the ongoing hegemony of Commercial Law; and from the discourse on Human Rights to the practice of judicial courts. Is Althusser still useful in helping us to understand these struggles? Does he have something to teach us about how law is produced, and how it is used and misused? This collection demonstrates that Althusser's ideas about law are more important, and more contemporary, than ever. Indeed, the contributors to Althusser and Law argue that Althusser offers a new and invaluable perspective on the place of law in contemporary life.

Light Alloys Directory and Databook is a world-wide directory of

the properties and suppliers of light alloys used in, or proposed for, numerous engineering applications. Alloys covered will include aluminium alloys, magnesium alloys, titanium alloys, beryllium. For the metals considered each section will consist of: a short introduction; a table comparing basic data and a series of comparison sheets. The book will adopt standardised data in order to help the reader in finding and comparing different materials and identifying the required information. All comparison sheets are cross-referenced, so that the user will be able to locate data on a specific product or compare properties easily. The book is designed to complement the existing publications on high performance materials.

The Volkswagen Transporter is one of the best-loved and most recognisable motor vehicles of all time. The preferred transport for surfers and hippies everywhere, the Volkswagen Type 2 'bus' was born in 1950, and became the first of a new breed of vehicle, the ancestor of today's people carrier. Available in various versions, including panel van, pick up and minibus, Transporters were often converted into campervans for a newly motorised class of holidaymaker. This book looks at the development, production and use of the class first, and second, generation Transporter. With archive illustrations including many colour photographs from old brochures this book is also a great evocation of the 1950s and 60s.
