Introduction to  
Mechatronic Design is  
ideal for upper level and

courses in Electrical,  
Computing, or Mechanical  
& Aerospace Engineering.  
Unlike other texts on  
mechatronics that focus  
on derivations and  
calculations, Introduction  
to Mechatronics, 1e, takes  
a narrative approach,  
emphasizing the  
importance of building  
intuition and  
understanding before

diving into the math. The authors believe that integration is the core of mechatronics and students must have a command of each of the domains to create the balance necessary for successful mechatronic design and devote sections of the book to each area, including mechanical, electrical, and software disciplines, as well as a section on system design and engineering. A robust package of teaching and learning resources accompanies the book.

*How the West Fuels War and Poverty in the Developing World* Legare Street Press  
 Follow two abolitionists who fought one of the most shockingly persistent evils of the world: human trafficking and sexual exploitation of slaves. Told in alternating chapters from perspectives spanning more than a century apart, read the riveting 19th century first-hand

account of Harriet Jacobs and the modern-day eyewitness account of Timothy Ballard. Harriet Jacobs was an African-American, born into slavery in North Carolina in 1813. She thwarted the sexual advances of her master for years until she escaped and hid in the attic crawl space of her grandmother's house for seven years before escaping north to freedom. She published an autobiography of her life, *Incidents in the Life of a Slave Girl*, which was one of the first open

discussions about sexual abuse endured by slave women. She was an active abolitionist, associated with Frederick Douglass, and, during the Civil War, used her celebrity to raise money for black refugees. After the war, she worked to improve the conditions of newly-freed slaves. As a former Special Agent for the Department of Homeland Security who has seen the horrors and carnage of war, Timothy Ballard founded a modern-day "underground railroad" which has rescued hundreds of

children from being fully enslaved, abused, or trafficked in third-world countries. His story includes the rescue and his eventual adoption of two young siblings--Mia and Marky, who were born in Haiti. Section 2 features the lives of five abolitionists, a mix of heroes from past to present, who call us to action and teach us life lessons based on their own experiences: Harriet Tubman--The "Conductor"; Abraham Lincoln--the "Great Emancipator"; Little Mia--

the sister who saved her little brother; Guesno Mardy--the Haitian father who lost his son to slave traders; and Harriet Jacobs--a teacher for us all.

Neither an academic tome nor a prescriptive 'how to'

guide, *The Theory and Practice of Online Learning* is an illuminating collection of essays by practitioners and scholars active in the complex field of distance education. Distance education has evolved significantly in its 150 years of existence. For most of this time, it was an individual pursuit defined by infrequent postal communication. But recently, three more developmental generations have emerged, supported by television and radio, teleconferencing, and

computer conferencing. The early 21st century has produced a fifth generation, based on autonomous agents and intelligent, database-assisted learning, that has been referred to as Web 2.0. The second edition of "The Theory and Practice of Online Learning" features updates in each chapter, plus four new chapters on current distance education issues such as connectivism and social software innovations.

The life of Waite Long is

mostly seen as a recluse person who is promoting fear for those around him. This kind of life is creating many emotions with questions and also disbelief. Lifestyle becomes fear, leaving no answers. At least it seemed. The response of others living in the same neighborhood brings gossip and fear. Nothing is related to time, and so the daily life becomes a life of questions with many challenges. Then the answers come! When we allow changes then we know love conquers all

with many surprises. The time it takes in changing for the good is like conquering mountains! It's very exhilarating and stimulating. Waite's life was like an open investigation full of excitement - but mostly the feeling of being alone. There are a lot of crossroads in life and many storms for some people, both physically and mentally. Plus the many times of loneliness for each of us. We all need to learn. Not all of life is negative, although being able to rest in

loneliness, feeling peaceful among strife or danger or loving in spite of hatred or misconception. Puzzles become roadmaps! Trails are to climb and also come down! Everything is there to conquer and to use patience. Challenge promotes growth. We have to remember it's only when the end comes that we can relax. Getting there requires adjustments - surprises - endurance - even when questions keep coming. We can conquer all, then the life becomes

triumphant and happiness and the strength to go on - and on to even better things! We feel better inside in spite of the ways of others. Please look at things in life kindly, how it affects others and how it makes others react. That is my wish and purpose. *Not Quite Loud Enough* IGI Global

Slave Stealers Trafford Publishing Providing a comprehensive introduction to the topic of accountability and datafication in the

governance of education, the World Yearbook of Education 2021 considers global policy dynamics and policy enactment processes. Chapters pay particular attention to the role of international organizations and the private sector in the promotion of performance-based accountability (PBA) in different educational settings and at multiple policy scales. Organized into three sections, chapters cover: the global/local construction of accountability and

datafication; global discourse and national translations of performance-based accountability policies; and enactments and effects of accountability and datafication, including controversies and critical issues. With carefully chosen international contributions from around the globe, the World Yearbook of Education 2021 is ideal reading for anyone interested in the future of accountability and datafication in the governance of education. *Issues and strategies*

Tuncay (Yayıncılık) Publishing  
This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's

book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and

extensive background notes by the modern English historian Paul Harris.

Routledge Globalization has created an interconnected world, but has not diminished violence and militarism. The Economics of Killing describes how the power of global elites, entrenched under

globalization, has created a deadly cycle of violence. In this groundbreaking work, Vijay Mehta shows how attempts at peaceful national development are routinely blocked by Western powers. He centers the 2008 financial crisis in US attempts to block China's model of development. He shows how Europe and the US conspire with regional dictators to prevent

countries from developing advanced industries, and how this system has fed terrorism. Mehata argues that a different world is possible, based on policies of disarmament, demilitarization, and sustainable development. This original and thought-provoking book will be of great interest to anyone concerned about the consequences of endless war fueled by the West.
