Getting the Right Teachers Into the Right Schools United Nations
 For the past 50 years, there has been increasing consideration and debate about how to best educate learners with special educational needs and disabilities. Competing paradigms of special education and inclusive education have been developed, disseminated and discussed at length over the years. These discussions have focused the attention on effectively educating learners with different types and severities of special educational needs and disabilities, who are living in either developing and developed countries in various parts of the world. The aim of this Special Issue of Education Sciences is to focus on the latest theory, practice and research relevant to special education and inclusive education. Articles that present new ideas, suggest future research directions or potential ways forward for educational practice are of particular interest.

Issue IV (Paperback) Taylor & Francis

This volume gathers work from a wide range of disciplines - anthropology, cultural studies, geography, history, law, sociology, and post-colonial studies - to explore the paradoxical processes of emulation, resistance and transformation that are at work in the global diffusion and development of sport and body cultures. Lulu.com

The COVID-19 pandemic was a forceful reminder that education plays an important role in delivering not just academic learning, but also in supporting physical and emotional well-being. Balancing traditional "book learning" with broader social and personal development means new roles for schools and education more generally.

World Development Report 2018 World Bank Publications
 Educating for the Twenty-First Century explores critical issues facing education in the 21st century.

Educational Research and Innovation Education in the Digital Age Healthy and Happy Children World Bank Publications

Participation of beneficiaries in the monitoring of public services is increasingly seen as a key to improving their efficiency. In India, the current government flagship program on universal primary education organizes both locally elected leaders and parents of children enrolled in public schools into committees and gives these groups powers over resource allocation, and monitoring and management of school performance. However, in a baseline survey we found that people were not aware of the existence of these committees and their potential for improving education. This paper evaluates three different interventions to encourage beneficiaries' participation through these committees: providing information, training community members in a new testing tool,

and training and organizing volunteers to hold remedial reading camps for illiterate children. We find that these interventions had no impact on community involvement in public schools, and no impact on teacher effort or learning outcomes in those schools. However, we do find that the intervention that trained volunteers to teach children to read had a large impact on activity outside public schools -- local youths volunteered to be trained to teach, and children who attended these camps substantially improved their reading skills. These results suggest that citizens face substantial constraints in participating to improve the public education system, even when they care about education and are willing to do something to improve it.

Learning without Burden McGraw-Hill Education (UK)
 Education and Disability in the Global South brings together new and established researchers from a variety of disciplines to explore the complexities and dilemmas encountered in providing education to children and young people with disabilities in countries in South Asia and Africa. Applying a range of methodological, theoretical and conceptual frameworks across different levels of education systems, from pre-school to higher education, the contributors examine not just the barriers but also the opportunities within the educational systems, in order to make strong policy recommendations. Together, the chapters offer a comprehensive overview of a range of issues, including a nuanced appreciation of the tensions between the local and global in relation to key developments in the field, critiquing a globalized notion of inclusive education, as well as proposing new methodological advancements in taking the research agenda forward. Empirical insights are captured not just from the perspectives of educators but also through engaging with children and young people with disabilities, who are uniquely powerful in providing insights for future developments.

Global Wage Report 2020-21 World Bank Publications
 Non-state actors' role extends beyond provision of schooling to interventions at various education levels and influence spheres. Alongside its review of progress towards SDG 4, including emerging evidence on the COVID-19 pandemic's impact, the 2021/2 Global Education Monitoring Report urges governments to see all institutions, students and teachers as part of a single system. Standards, information, incentives and accountability should help governments protect, respect and fulfil the right to education of all, without turning their eyes away from privilege or exploitation. Publicly funded education does not have to be publicly provided but disparity in education processes, student outcomes and teacher working conditions must be addressed. Efficiency and innovation, rather than being commercial secrets, should be diffused and practised by all. To that end, transparency and integrity in the public education policy process need to be maintained to block vested interests. The report's rallying call -

Who chooses? Who loses? - invites policymakers to question relationships with non-state actors in terms of fundamental choices: between equity and freedom of choice; between encouraging initiative and setting standards; between groups of varying means and needs; between immediate commitments under SDG 4 and those to be progressively realized (e.g. post-secondary education); and between education and other social sectors.

MAH-B.Ed. M.Ed CET Exam Prep Book 2023 | Maharashtra - Common Entrance Test | 12 Full Practice Tests (1200 Solved Questions) UNESCO Publishing

This work sets out to answer questions such as, what have we learned after three decades of research into school effectiveness? What can we say with confidence about how schools improve? It reviews findings from seminal international work.

Education of Socio-Economic Disadvantaged Groups Routledge
 This book explores policy measures and social programmes designed to make quality education accessible to socio-economic disadvantaged groups (SEDGs) in India. It discusses the status of education of disadvantaged or marginalized groups, the discourse around education and equity in India, and innovative practices undertaken by both government and non-government institutions to increase accessibility to education. The book highlights the disparity in the quality of education available to disadvantaged groups, including religious, ethnic, and caste minorities, women and girls, transgender people, people with disabilities, and migrant or displaced children. It examines the effectiveness of initiatives and policies which have been implemented to bring quality education to the SEDG in India. It also offers suggestions and policy recommendations to bridge the disparity in education which will consequently lead to greater economic and social mobility, inclusion, and socio-economic development. The book will be of interest to teachers, students, and researchers of education, sociology, development studies, social work, and disability studies. It will also be useful for policymakers, academicians, and professionals working in the fields of education, social work, and rehabilitation.

Human rights and equality in education UNESCO Publishing
 The State of Food Security and Nutrition in the World gives updates on the prevalence of undernourishment globally and the absolute number of undernourished, as well as the latest estimates for a number of global nutrition targets. This latest edition looks at the role of economic slowdowns and downturns in

the rise of hunger and makes policy recommendations to safeguard food security and nutrition worldwide.

[Striking a Balance](#) Policy Press

Despite India's record of rapid economic growth and poverty reduction over recent decades, rising inequality in the country has been a subject of concern among policy makers, academics, and activists alike. *Poverty and Social Exclusion in India* focuses on social exclusion, which has its roots in India's historical divisions along lines of caste, tribe, and the excluded sex, that is, women. These inequalities are more structural in nature and have kept entire groups trapped, unable to take advantage of opportunities that economic growth offers. Culturally rooted systems perpetuate inequality, and, rather than a culture of poverty that afflicts disadvantaged groups, it is, in fact, these inequality traps that prevent these groups from breaking out. Combining rigorous quantitative research with a discussion of these underlying processes, this book finds that exclusion can be explained by inequality in opportunities, inequality in access to markets, and inequality in voice and agency. This report will be of interest to policy makers, development practitioners, social scientists, and academics working to foster equality in India.

[Educating for the Twenty-First Century: Seven Global Challenges](#) Routledge

This ILO flagship report examines the evolution of real wages around the world, giving a unique picture of wage trends globally and by region. The 2020-21 edition analyses the relationship of minimum wages and inequality, as well as the wage impacts of the COVID-19 crisis. The 2020-21 edition also reviews minimum wage systems across the world and identifies the conditions under which minimum wages can reduce inequality. The report presents comprehensive data on levels of minimum wages, their effectiveness, and the number and characteristics of workers paid at or below the minimum. The report highlights how adequate minimum wages, statutory or negotiated, can play a key role in a human-centred recovery from the crisis

[Global Education Monitoring Report 2019](#) Global Education Monitoring Report

India's landmark Right of Children to Free and Compulsory Education Act (2009) guarantees education to all children aged 6-14 years. The Act mandates specific student-teacher ratios and emphasizes teacher quality. Writing this into legislation took seven years, but the seven years since has proven that ensuring effective teachers are recruited and placed in all schools in a time-bound manner is considerably more challenging. This report takes a detailed look at the complexity of the teacher management landscape in elementary and secondary schools in nine Indian states. On a daily basis, the administrative machinery of these states has to manage between 19,000 to nearly a million teachers in different types of schools and employment contracts, and cope with recruiting thousands more and distributing them

equitably across schools. This report examines the following issues: official requirements for becoming a schoolteacher in India; policies and processes for teacher recruitment, deployment and transfers; salaries and benefits of teachers; professional growth of teachers; and grievance redressal mechanisms for teachers. For the first time in India, this report compares and contrasts stated policy with actual practice in teacher management in the country, using a combination of primary and secondary data. In so doing, the report reveals the hidden challenges and the nature of problems faced by administrators in attempting to build an effective teacher workforce which serves the needs of all of India's 200 million school children. The report examines states with varying characteristics, thus generating knowledge and evidence likely to be of interest to policy makers and practitioners in a wide range of contexts.

[Pitfalls of Participatory Programs](#) World Bank Publications
Discover motivating, personalized learning strategies that all of your students will love! Build an active, responsive, and inclusive classroom where every student benefits. Through step-by-step directions, reproducible handouts, classroom-tested examples, and specific guidelines, teachers and teacher teams will discover 60 activities to help you: Quickly and easily modify and adapt design instruction for diverse learners, including students with cultural, language, learning, physical, or sensory differences Transform lectures and whole-class discussions through dynamic, student-centered learning experiences Immerse students in discussion, debate, creative thinking, questioning, teamwork, and collaborative learning Flexibly co-plan and co-teach with a variety of school professionals

[Education and Disability in the Global South](#) OECD Publishing
Thousands of children from minority and disadvantaged groups will never cross the threshold of a classroom. What can human rights contribute to the struggle to ensure that every learner is able to access high quality education? This brilliant interdisciplinary collection explores how a human rights perspective offers new insights and tools into the current obstacles to education. It examines the role of private actors, the need to hold states to account for the quality of education, how to strike a balance between religion, culture and education, the innovative responses needed to guarantee girls' right to education and the role of courts. This unique book draws together contributors who have been deeply involved in this field from both developing and developed countries which enriches the understanding and remedial approaches to tackle current obstacles to universal education.

[Renewable Energy Integration](#) Routledge

The Report examines the education impact of migration and displacement across all population movements: within and across borders, voluntary and forced, for employment and education. It also reviews progress on education in the 2030 Agenda for

Sustainable Development. In view of increasing diversity, the report analyses how education can build inclusive societies and help people move beyond tolerance and learn to live together.

[RTE and the Resource Requirements](#) UNESCO Publishing

This book looks at education reforms, planning and policy through an exploration of the Yash Pal Committee report (1993) in India, which made recommendations to improve the quality of learning while reducing cognitive burden on students. It analyses the wide-ranging impact the report had on curriculum, pedagogy, teacher education reforms and the national policy on education. The book examines the legacy of the report, tracing the various deliberations and critical engagements with issues around literacy, language and mathematics learning, curriculum reforms and classroom practices, assessment and evaluation. It reviews contemporary developments in research on learning in diverse disciplines and languages through the lens of the recommendations made by the Learning without Burden report while engaging with challenges and systemic issues which limit inclusivity and access to quality education. Drawing on extensive research and first-hand academic and teaching experience, this book will attract attention and interest of students and researchers of educational policy and analysis, linguistics, sociology and South Asian studies. It will also be of interest to policy makers, think tanks and civil society organisations.

[Global Education Monitoring Report 2020](#) Observer Research Foundation

Upon its release several years ago, *The Beautiful Tree* was instantly embraced and praised by individuals and organizations across the globe. James Tooley's extraordinary ability to braid together personal experience, community action, individual courage, and family devotion, brought readers to the very heart of education. This book follows Tooley in his travels from the largest shanty town in Africa to the mountains of Gansu, China, and of the children, parents, teachers, and entrepreneurs who taught him that the poor are not waiting for educational handouts. They are building their own schools and learning to save themselves. Now in paperback with a new postscript, *The Beautiful Tree* is not another book lamenting what has gone wrong in some of the world's poorest communities. It is a book about what is going right, and powerfully demonstrates how the entrepreneurial spirit and the love of parents for their children can be found in every corner of the globe.

[Global Education Monitoring Report](#) Article 19

The Report examines the education impact of migration and displacement across all population movements: within and across borders, voluntary and forced, for employment and education. It also reviews progress on education in the 2030 Agenda for Sustainable Development. In view of increasing diversity, the report analyses how education can build inclusive societies and help people move beyond tolerance and learn to live together.
