This picture-packed encyclopedia shows a wonderful variety of plants, from fantastic ferns to spiky cacti. It explores the diverse habitats of plants, herbs and spices that make our food tasty, and even how astronauts grow plants in space. It also takes a fun, more sideways look at some truly weird and wonderful plants, including leaves that are home to frogs,

orchids that look like parrots, and seeds that spin like helicopters. So open this fascinating ebook and find out more about the amazing world of trees, leaves, flowers, and seeds.

Disciplining Terror
Penguin

Since 9/11, we have been told that terrorists are pathological evildoers. Yet before the 1970s, hijackings, assassinations, and other acts now called 'terrorism' were considered the work of rational actors. *Disciplining Terror* explains how political violence became 'terrorism', and how this transformation ultimately led to the current 'war on terror'.
