Stepping Up Financial Reporting Systems in an Expanding Global Economy The United States already has the most stringent financial reporting requirements in the world due to its Generally Accepted Accounting Principles (GAAP). Now financial institutions must also contend with the global impact of new stipulations regarding auditing and reporting practices. This book provides comprehensive guidance as to what companies should now be doing to make their financial reporting more efficient and reliable, and illustrates how a sound internal control policy-based on the work of the Treadway Commission and the COSO report -will be a requirement for the organization that wants to compete in the evolving global marketplace. Based on months of research by the author, *Reliable Financial Reporting and Internal Control* brings together three issues crucial to risk management:

* Internal control and international accounting standards * Reliable financial reporting as defined by COSO * The New Capital Adequacy Framework by the Basle Committee on Banking Supervision Also covered is the work accomplished by the Federal Reserve and the International Organizations of Securities Commissions (IOSCO). Here is a must-have guide for CFOs, controllers, and other corporate financial personnel in multinational companies and other companies who do business globally, as well as internal and external auditors, bank managers, and brokers.

Applied Accounting for the Microcomputer User

EXECUTIVE SUMMARY Haiti's 2006 and 2010 Fund-supported programs started under very different circumstances but shared the main objectives of preserving macroeconomic stability and creating the conditions for a sustained growth takeoff through structural reform. The 2006 program started as Haiti was making progress toward macroeconomic stabilization. Reducing inflation and avoiding fiscal dominance of monetary policy were top priorities. The 2010 program started in the aftermath of a devastating earthquake. It faced the challenges of dealing with a huge inflow of aid and scaling up public investment. Both programs aimed to foster reforms to address long-standing governance and transparency concerns, as well as improving revenue mobilization to increase fiscal space and reduce fiscal vulnerabilities. Growth was to rise to 4-6 percent, an ambitious objective given Haiti's long history of serious fragility with near zero or negative growth. There were notable successes during the two programs. Despite a series of shocks, inflation remained in single digits and international reserves increased by more than expected, which helped to limit exchange rate volatility in the context of the large aid inflow. Program performance criteria effectively eliminated central bank credit to the government, thus reducing risks of fiscal dominance. Structural reforms also advanced, particularly during the 2006 program which coincided with the HIPC process. Revenue administration improved, with tax revenue rising steadily over the two programs. These achievements were not negligible given Haiti's history.

This book gives a broad analysis of the legal issues raised by the international fight against money laundering. It offers an extensive comparative research of the criminal and preventive law aspects from an international perspective. Stessens portrays money laundering as a new criminal trend threatening both national and international societies which must be addressed multilaterally through banking practice, international conventions and human rights. Most of this volume is devoted to specific legal problems that spring from the international nature of the money laundering phenomenon. It contains a most detailed overview on the rules and practices of international co-operation in the fight against money laundering. The publication gives a thorough examination of the exchange of information, lifting banking secrecy, and seizing and confiscating assets, as well as the jurisdictional questions that inevitably arise in this context. The result is a rich and detailed study of international and comparative law.
