History of Canadian Business Pearson Education Canada
From the back cover: Richard Wright's study chronicles and analyses the Japanese business presence in Canada. It reveals several distinguishing characteristics of Japanese investment, which should help allay some traditional Canadian concerns about foreign investment. Japanese investment is small in proportion to the total volume of Canada-Japan trade. Moreover, unlike other traditional foreign investors, who generally seek to gain direct control of affiliated companies in Canada, Japanese investors aim primarily to secure reliable flows of raw materials. Because the Japanese emphasis is on trade rather than on investment flows, a high proportion of Japanese investment is in the form of loans rather than equity, and the Japanese often take minority holdings or enter into joint ventures. The role of Japanese investment is thus a very different one from that which has been a source of concern about foreign ownership in Canada.

Canadian Business English, 8th Edition Pearson Education Canada

The late twentieth century has seen profound changes in the character of the international economic order. According to the authors of this study, Canada has failed to come to terms with those changes. Our industrial policy is diffuse, ad hoc, and sectoral. Michael Atkinson and William Coleman argue that in order to analyse Canada's industrial policy effectively, particular attention must be given to industry organization, state structures, and systems of interest intermediation at the sectoral level. To make such an analysis they introduce the concept of policy network, and apply it to three types of industrial sectors: the research-intensive sectors of telecommunications manufacturing and pharmaceuticals; the rapidly changing sectors of petrochemicals and meat processing; and the contracting and troubled sectors of textiles, clothing, and dairy processing. Through the lens of these sectors Coleman and Atkinson shed considerable light on the intersection of political considerations and policy development, and offer a new base on which to move forward in planning for economic growth.
