Lawrence Lessig, "the most important thinker on intellectual property in the Internet era", masterfully argues that never before in human history has the power to control creative progress been so concentrated in the hands of the powerful few, the so-called Big Media. Never before have the cultural powers- that-be been able to exert such control over what we can and can't do with the culture around us. Our society defends free markets and free speech; why then does it permit such top-down control? To lose our long tradition of free culture, Lawrence Lessig shows us, is to lose our freedom to create,

our freedom to build, and, ultimately, our freedom to imagine.

The year 1818 saw the publication of one of the most influential science-fiction stories of all time. Frankenstein: Or, Modern Prometheus by Mary Shelley had a huge impact on gothic horror and science-fiction genres, and her creation has become part of our everyday culture, from cartoons to Hallowe'en costumes. Even the name 'Frankenstein' has become a by-word for evil scientists and dangerous experiments. How did a teenager with no formal education come up with the idea for an extraordinary novel such as

Frankenstein? Clues are dotted throughout Georgian science and popular culture. The years before the book's publication saw huge advances in our understanding of the natural sciences, in areas such as electricity and physiology, for example. Sensational science demonstrations caught the imagination of the general public, while the newspapers were full of lurid tales of murderers and resurrectionists. Making the Monster explores the scientific background behind Mary Shelley's book. Is there any science fact behind the science fiction? And how might a real-life Victor Frankenstein have gone about creating his monster? From tales of volcanic eruptions, artificial life and chemical revolutions, to experimental surgery, 'monsters' and electrical experiments on human cadavers, Kathryn Harkup examines the science and

scientists that influenced Shelley, and inspired her most famous creation. *Australian National Bibliography* National Register Publishing

In 1913, Charles T. Sprading (1871-1959) wrote a book of remarkable prescience that anticipated the systematic development of an American libertarian tradition. He called it *Liberty and the Great Libertarians*. What he provided was a biography and intellectual analysis of some thirty great thinkers. Most valuable is his extraordinary job of editing. He chooses the best and most enlightening of their writings and brings them to life. The thinkers covered include Edmund Burke, Thomas Paine, Thomas Jefferson, William Godwin, Wilhelm von Humboldt, John Stuart Mill, Ralph Waldo Emerson, William Lloyd Garrison, Wendell Phillips, Josiah Warren, Max Stirner, Henry D. Thoreau, Herbert Spencer, Lysander Spooner, Henry George, Benjamin Tucker, Pierre Kropotkin, Abraham Lincoln, Auberon Herbert, G. Bernard Shaw, Oscar Wilde, Maria Montessori, and others. Now, not all of these people would be considered libertarians by the modern understanding. Some even called themselves socialists, as absurd as that may sound to us today. But they all exhibited in their writings a deep and abiding attachment to the idea of human liberty. They agree in the primacy of the individual. They agreed that the greatest threat to individual rights is the state. And they believed in fighting for these rights. They believed in the freedom of assembly, freedom of press, freedom of religion, freedom to think and act. They hated war and social control. They rejected every form of authoritarianism, and, in all these areas, they made huge contributions. As Sprading says in his introduction: The greatest violator of the principle of equal liberty is the State. Its functions are to control, to rule, to dictate, to regulate, and in exercising these functions it interferes with and injures individuals who have done no wrong. The objection to government is, not that it controls those who invade the liberty of others, but that it controls the non-invader. It may be necessary to govern one who will not govern himself, but that in no wise justifies governing one who is capable of and willing to govern himself. To argue that because some need restraint all must be restrained is neither consistent nor logical. Governments cannot accept liberty as their fundamental basis for justice, because governments rest upon authority and not upon liberty. To accept liberty as the fundamental basis is to discard authority; that is, to discard government itself; as this would mean the

dethronement of the leaders of government, we can expect only those who have no economic compromises to make, to accept equal liberty as the basis of justice. The introduction alone is extraordinary, given the times. On war he writes: "How is war to be abolished? By going to war? Is bloodshed to be stopped by the shedding of blood? No; the way to stop war is to stop going to war; stop supporting it and it will fall, just as slavery did, just as the Inquisition did. The end of war is in sight; there will be no more world wars. The laboring-man, who has always done the fighting, is losing his patriotism; he is beginning to realize that he has no country or much of anything else to fight for, and is beginning to decline the honor of being killed for the glory and profits of the few. Those who profit by war, those who own the country, will not fight for it; that is, they are not patriotic if it is necessary for them to do the killing or to be killed in war. In all the wars of history there are very few instances of the rich meeting their death on the battlefield." This is a fat book, 542 pages, with a vast index. It remains the best chronicle of libertarian thought ever put together, which is why Murray Rothbard chose this book as one of his favorites. This edition is a reprint of the original 1913 volume. Black people are not dark-skinned white people, says advertising visionary Tom Burrell. In fact, they are a lot more. They are survivors of the Middle Passage and centuries of humiliation and deprivation, who have excelled against the odds, constantly making a way out of no way! In the last several years, much has been

written about growing economic challenges, increasing income inequality, and political polarization in the United States. Addressing these new realities in America's metropolitan regions, this book argues that a few lessons are emerging: first, inequity is bad for economic growth; second, bringing together the concerns of equity and growth requires concerted local action; and third, the fundamental building block for doing this is the creation of diverse and dynamic epistemic (or knowledge) communities, which help to overcome political polarization and to address the challenges of economic restructuring and social divides. "As America bolts toward a more multiracial future in the face of skyrocketing inequality, local leaders are desperately seeking strategies to foster more inclusive growth. Chris Benner and Manuel Pastor's research uncovers a critical ingredient of success: diverse regional leaders coming together to build a foundation of shared knowledge and advance positive change." -- ANGELA GLOVER BLACKWELL, Founder and CEO, PolicyLink

CHRIS BENNER is the Dorothy E. Everett Chair in Global Information and Social Entrepreneurship, Director of the Everett Program for Digital Tools for Social Innovation, and Professor of Environmental Studies and Sociology at the University of California, Santa Cruz. *Killing Mister Watson, Lost Man's River, and Bone by Bone*—Peter Matthiessen's great American epic about Everglades

sugar planter and notorious outlaw E. J. Watson on the wild Florida frontier at the turn of the twentieth century—were originally conceived as one vast, mysterious novel. Now, in this bold new rendering, Matthiessen has marvelously distilled a monumental work while deepening the insights and motivations of his characters with brilliant rewriting throughout. Praise for *Shadow Country* “Magnificent . . . breathtaking . . . Finally now we have [this three-part saga] welded like a bell, and with Watson’s song the last sound, all the elements fuse and resonate.”—Los Angeles Times “Peter Matthiessen has done great things with the Watson trilogy. It’s the story of our continent, both land and people, and his writing does every justice to the blood fury of his themes.”—Don DeLillo “The fiction of Peter Matthiessen is the reason a lot of people in my generation decided to be writers. No doubt about it. *Shadow Country* lives up to anyone’s highest expectations for great writing.”—Richard Ford “*Shadow Country*, Matthiessen’s distillation of the earlier Watson saga, represents his original vision. It is the quintessence of his lifelong concerns, and a great legacy.”—W. S. Merwin “[An] epic masterpiece . . . a great American novel.”—The Miami Herald

Over the course of a literary career that extended from the lingering Malthusian controversies of the late eighteenth century to the brink of the Reform Act of 1832, William Hazlitt produced a remarkable body of committed radical journalism. Against the view that partisan passion undermined his aesthetic judgment and compromised his celebrated disinterestedness, William Hazlitt: Political Essayist restores politics to the center of his achievement as a critic and essayist. In doing so Kevin Gilmartin explores his constructive relationship with the early nineteenth-century popular reform movement, while acknowledging his desire to reflect critically on radical politics and express his own doubts about social progress. Early chapters attend closely to his critical method and matters of style and form, focusing on the political development of his contradictory prose manner. Paradox and inconsistency are central to his attack on 'Legitimacy', a term he drew from the lexicon of post-Napoleonic political journalism. In treating legitimate government as a revived form of divine right monarchy, Hazlitt often produced harrowing visions of the perfect refinement of oppressive power and the complete elimination of any principle of

liberty or resistance. At the same time he found ways to preserve his commitment to oppositional political expression and the redemptive necessity of what he termed 'a word uttered against'. Later chapters bring together the spiritual heritage of rational Dissent and emerging democratic developments in London to understand Hazlitt's distinctive mobilization of radical memory as a way of contending with present injustice and envisioning a political future.

A “funny, heart-hammering, wise” (The New York Times) best-selling portrait of a family that will remind you why “to read a novel by Anne Tyler is to fall in love” (PEOPLE). Abandoned by her wanderlusting husband, stoic Pearl raised her three children on her own. Now grown, the siblings are inextricably linked by their memories—some painful—which hold them together despite their differences. Hardened by life’s disappointments, wealthy, charismatic Cody has turned cruel and envious. Thrice-married Jenny is errant and passionate. And Ezra, the flawed saint of the family, who stayed at home to look after his mother, runs a restaurant where he cooks what other people are homesick for, stubbornly yearning for the perfect family he never had. Now gathered during a time of loss, they will reluctantly unlock the shared secrets of their past and discover if what binds them together is stronger than what tears them apart. “[In Dinner at the Homesick Restaurant Tyler] has arrived at a new level of power.”—John Updike, The New Yorker “Marvelous, astringent, hilarious, [and] strewn with the banana peels of love.”—Cosmopolitan

Are Russian propaganda or "Fake news" entrepreneurs on Facebook undermining our sense of a shared reality? A conventional wisdom has emerged since the election of Donald Trump in 2016 that new technologies and their manipulation by foreign actors played a decisive role in his victory and are responsible for the sense of a "post-truth" moment in which disinformation and propaganda thrives. *Network Propaganda* challenges that received wisdom through the most comprehensive study yet published on media coverage of American presidential politics from the start of the election cycle in April 2015 to the one year

anniversary of the Trump presidency. Analysing millions of news stories together with Twitter and Facebook shares, broadcast television and YouTube, the book provides a comprehensive overview of the architecture of contemporary American political communications. Through data analysis and detailed qualitative case studies of coverage of immigration, Clinton scandals, and the Trump Russia investigation, the book finds that the right-wing media ecosystem operates fundamentally differently than the rest of the media environment. The authors argue that longstanding institutional, political, and cultural patterns in American politics interacted with technological change since the 1970s to create a propaganda feedback loop in American conservative media. This dynamic has marginalized centre-right media and politicians, radicalized the right wing ecosystem, and rendered it susceptible to propaganda efforts, foreign and domestic. For readers outside the United States, the book offers a new perspective and methods for diagnosing the sources of, and potential solutions for, the perceived global crisis of democratic politics.

When Bound loses its lead guitarist, yours truly is chosen to fill his shoes. From dive bars to the big stage, my instant claim to fame is nothing short of a fairytale. The only problem? My new bandmates. Jaded, gorgeous, and ridiculously talented—they're determined to turn my dream into a nightmare. It's no secret I wasn't their first choice. I wasn't even their last. The label wants a new image, Bound wants me gone, but I've got my own agenda. To succeed I have to survive a world tour, public scrutiny, and idols turned enemies. But the biggest threat of all isn't a meticulous frontman, a

narcissistic bassist, and a drummer with too many secrets. It's me. Somehow, I must resist the temptation of Houston Morrow, Loren James, and Jericho Noble. It seemed easy enough when I boarded their tour bus, but it only took one city for the lines we'd drawn to blur. Only ninety-nine more to go. sufficient data exists to examine the temporal and spatial relationships that existed in terrorist group planning, and if so, could patterns of preparatory conduct be identified? About one-half of the terrorists resided, planned, and prepared for terrorism relatively close to their eventual target. The terrorist groups existed for 1,205 days from the first planning meeting to the date of the actual/planned terrorist incident. The planning process for specific acts began 2-3 months prior to the terrorist incident. This study examined selected terrorist groups/incidents in the U.S. from 1980-2002. It provides for the potential to identify patterns of conduct that might lead to intervention prior to the commission of the actual terrorist incidents. Illustrations.

In the last 20 years, there has been a remarkable emergence of innovations and technological advances that are generating promising changes and opportunities for sustainable agriculture, yet at the same time the agricultural sector worldwide faces numerous daunting challenges. Not only is the agricultural sector expected to produce adequate food, fiber, and feed, and contribute to biofuels to meet the needs of a rising global population, it is expected to do so under increasingly scarce natural resources and climate change. Growing awareness of the unintended impacts associated with some agricultural production practices has led to heightened societal expectations for improved environmental, community, labor, and animal welfare standards in agriculture. *Toward Sustainable Agricultural Systems in the 21st Century* assesses the scientific evidence for the strengths and weaknesses of different production, marketing, and policy approaches for improving and reducing the costs and unintended consequences of agricultural production. It discusses the principles

underlying farming systems and practices that could improve the sustainability. It also explores how those lessons learned could be applied to agriculture in different regional and international settings, with an emphasis on sub-Saharan Africa. By focusing on a systems approach to improving the sustainability of U.S. agriculture, this book can have a profound impact on the development and implementation of sustainable farming systems. *Toward Sustainable Agricultural Systems in the 21st Century* serves as a valuable resource for policy makers, farmers, experts in food production and agribusiness, and federal regulatory agencies.

*Benjamin Franklin and the Politics of Improvement* Cengage AU

This fascinating book explores Benjamin Franklin's social and political thought. Although Franklin is often considered the first American, his intellectual world was cosmopolitan. An active participant in eighteenth-century Atlantic debates over the modern commercial republic, Franklin combined abstract analyses with practical proposals. Houston treats Franklin as shrewd, creative, and engaged a lively thinker who joined both learned controversies and political conflicts at home and abroad. Drawing on meticulous archival research, Houston examines such tantalizing themes as trade and commerce, voluntary associations and civic militias, population growth and immigration policy, political union and electoral institutions, freedom and slavery. In each case, he shows how Franklin urged the improvement of self and society. Engagingly written and richly illustrated, this book provides a compelling portrait of Franklin, a fresh perspective on American identity, and a vital account of what it means to be practical.
