Diffusion : mass transfer in fluid systems / E.L. Cussler ...Mass transfer by convection involves the transport of material between a boundary surface (such as solid or liquid surface) and a moving fluid or between two relatively immiscible, moving fluids. Convective mass transfer is really diffusion (the random movement of molecules) in combination with advection (molecules being carried along with the motion of

the fluid). Mass Transfer — Introduction to Chemical and Biological ... The textbook starts out with the fundamentals of diffusion - the small scale stuff. After you've struggled with diffusion coefficients, it gets into mass transfer and a lot of weird mass transfer scenarios.
