### Translation Tools and

### Technologies Routledge

Audiovisual translation is the fastest growing strand within translation studies. This book addresses the need for more robust theoretical frameworks to investigate emerging text-types, address new methodological challenges (including the compilation, analysis and reproduction of audiovisual data), and understand new discourse communities bound together by the production and consumption of audiovisual texts. In this clear, user-friendly book, Luis Pérez-González introduces and explores the field, presenting and critiquing key concepts, research models and methodological approaches. Features include: • introductory overviews at the beginning of each chapter, outlining aims and relevant connections with other chapters • breakout boxes showcasing key concepts, research case studies or other relevant links to the wider field of translation

studies • examples of audiovisual texts in a range of languages with back translation support when required • summaries reinforcing key issues dealt with in each chapter • follow-up questions for further study • core references and suggestions for further reading. • additional online resources on an extensive companion website This will be an essential text for all students studying audiovisual or screen translation at postgraduate or advanced undergraduate level and key reading for all researchers working in the area.

### Reception Studies and Audiovisual Translation

Taylor & Francis

To trainee translators and established professionals alike, the range of tools and technologies now available, and the speed with which they change, can seem bewildering. This state-of-the-art, copiously illustrated textbook offers a straightforward and practical guide to translation tools and technologies. Demystifying the workings of computer-assisted translation (CAT) and machine translation (MT) technologies,

Translation Tools and Technologies offers clear step-by-step guidance on how to choose suitable tools (free or commercial) for the task in hand and quickly get up to speed with them, using examples from a wide range of languages. Translator trainers will also find it invaluable when constructing or updating their courses. This unique book covers many topics in addition to text translation. These include the history of the technologies, project management, terminology research and corpora, audiovisual translation, website, software and games localisation, and quality assurance. Professional workflows are at the heart of the narrative, and due consideration is also given to the legal and ethical questions arising from the reuse of translation data. With targeted suggestions for further reading at the end of each chapter to guide users in deepening their knowledge, this is the essential textbook for all courses in translation and technology within translation studies and translator training. Additional resources are available on the Routledge Translation Studies Portal.

*The Challenge of Subtitling Offensive and Taboo Language into Spanish* The Chinese University of Hong Kong Press

This book is a multidisciplinary study of the translation and localisation of video games. It offers a descriptive analysis of the industry - understood as a global phenomenon in entertainment - and aims to explain the norms governing present industry practices, as well as game localisation processes. Additionally, it discusses particular translation issues that are unique to the multichannel nature of video games, in which verbal and nonverbal signs must be cohesively combined with interactivity to achieve maximum playability and immerse players in the game's virtual world. Although positioned within the theoretical framework of descriptive translation studies, Bernal-Merino incorporates research from audiovisual translation, software localisation, computer assisted translation, comparative literature, and video game production. Moving beyond this framework,

Translation and Localisation in Video Games challenges some of the basic tenets of translation studies and proposes changes to established and unsatisfactory processes in the video game and language services industries.

Channel View Publications *Subtitling: Concepts and Practices* provides students, researchers and practitioners with a research-based introduction to the theory and practice of subtitling. The book, inspired by the highly successful *Audiovisual Translation: Subtitling* by the same authors, is a new publication reflecting the developments in practice and research that mark subtitling today, while considering the way ahead. It supplies the core concepts that will allow its users to acquaint themselves with the technical, linguistic and cultural features of this specific yet extremely diverse form of audiovisual translation and the many contexts in which it is deployed today. The book offers concrete subtitling strategies and contains a wealth of examples in numerous languages for dealing with specific

translation problems. State-of-the art translation technologies and their impact on the profession are explored along with a discussion of the ways in which they cater for the socio-political, multicultural and multilingual challenges that audiovisual productions and their translations must meet today. A truly multimedia package, *Subtitling: Concepts and Practices* comes with a companion website which includes a wide range of exercises with answer keys, video clips, dialogue lists, a glossary of concepts and terminology used in the industry and much more. It also provides access to a professional desktop subtitle editor, Wincaps Q4, and a leading cloud-based subtitling platform, OOONA.

[Translating and Interpreting in Australia and New Zealand](#) UCL Press

Translation, accessibility and the viewing experience of foreign, deaf and blind audiences has long been a neglected area of research within film studies. The same applies to the film industry, where current distribution strategies and exhibition platforms severely underestimate

the audience that exists for foreign and accessible cinema. Translated and accessible versions are usually produced with limited time, for little remuneration, and traditionally involving zero contact with the creative team. Against this background, this book presents accessible filmmaking as an alternative approach, integrating translation and accessibility into the filmmaking process through collaboration between translators and filmmakers. The book introduces a wide notion of media accessibility and the concepts of the global version, the dubbing effect and subtitling blindness. It presents scientific evidence showing how translation and accessibility can impact the nature and reception of a film by foreign and sensory-impaired audiences, often changing the film in a way that filmmakers are not always aware of. The book includes clips from the award-winning film *Notes on Blindness* on the Routledge Translation Studies Portal, testimonies from filmmakers who have adopted this approach, and a presentation of the accessible filmmaking

workflow and a new professional figure: the director of accessibility and translation. This is an essential resource for advanced students and scholars working in film, audiovisual translation and media accessibility, as well as for those (accessible) filmmakers who are not only concerned about their original viewers, but also about those of the foreign and accessible versions of their films, who are often left behind.

Subtitling Norms for Television John Benjamins Publishing

This collection of essays offers a multi-faceted exploration of audiovisual translation, both as a means of intercultural exchange and as a lens through which linguistic and cultural representations are negotiated and shaped. Examining case studies from a variety of media, including film, television, and video games, the volume focuses on different modes of audiovisual translation, including subtitling and dubbing, and the representations of linguistic and stylistic features, cultural mores, gender, and the translation process itself embedded within them.

The book also meditates on issues regarding accessibility, a growing concern in audiovisual translation research. Rooted in the most up-to-date issues in both audiovisual translation and media culture today, this volume is essential reading for students and scholars in translation studies, film studies, television studies, video game studies, and media studies.

### **Audiovisual Translation**

Routledge

This text provides a snapshot of issues reflecting the changing nature of translation studies at the beginning of a new millennium. Resulting from discussions between translation theorists from all over the world, topics covered include: the nature of translation; English as a "lingua franca"; public service translation and interpreting; assessment; and audio-visual translation. The first part of the work covers a discussion stimulated by Peter Newmark's paper, and the second part allows invited colleagues to develop his topics.

**Subtitling** John Benjamins Publishing

This book provides readers, students and

teachers with a clear and concise guide to understanding the concepts of offensive and taboo language and how this type of language can be subtitled into Spanish used in Spain. It combines theoretical and practical approaches and covers technical matters, as well as those of censorship, (ideological) manipulation, translation strategies and techniques, the treatment of offensive and taboo language and how to conduct research in this field. It includes an array of examples from recent films and TV series to present the reader with real samples of subtitles broadcast on digital platforms today. In addition, each chapter includes exercises with which the reader can put theory into practice, as well as possible solutions in the form of answer keys. It will be of use not only to researchers and students, but also to future audiovisual translators seeking to acquire further knowledge in the transfer of offensive and taboo language.

*The Didactics of Audiovisual Translation*  
Routledge

The coming of age of audiovisual translation studies has brought about a much-needed surge of

studies focusing on the audience, their comprehension, appreciation or rejection of what reaches them through the medium of translation. Although complex to perform, studies on the reception of translated audiovisual texts offer a uniquely thorough picture of the life and afterlife of these texts. This volume provides a detailed and comprehensive overview of reception studies related to audiovisual translation and accessibility, from a diachronic and synchronic perspective. Focusing on all audiovisual translation techniques and encompassing theoretical and methodological approaches from translation, media and film studies, it aims to become a reference for students and scholars across these fields.

**Universal Access in Human-Computer Interaction. Access to Media, Learning and Assistive Environments**  
Springer

This collection bridges disciplinary scholarship from critical language studies, Latinx critical communication, and media studies scholarship for a comprehensive exploration of Spanish-

English bilingualism in the US and in turn, elucidating, more broadly, our understanding of bilingualism in a post-digital society. Chapters offer a state-of-the-art on research at the intersection of language, communication, and media, with a focus on key debates in Spanish-English bilingualism research. The volume provides a truly interdisciplinary perspective, synthesizing a wide range of approaches to promote greater dialogue between these fields and examining different communicative bilingual spaces. These include ideological spaces, political spaces, publicity and advertising spaces, digital and social media spaces, entertainment and TV spaces, and school and family spaces. This book will be of interest to students and scholars in bilingualism, language and communication, language and media, and Latin American and Chicano/a studies.

John Benjamins Publishing Company  
Subtitling Audiovisual Translation:  
Subtitling Routledge

**Media for All** Routledge

This third volume in the Media for All series offers a diverse selection of articles which bear testimony to the vigour and versatility of research and developments in audiovisual translation and media accessibility. The collection reflects the critical impact of new technologies on AVT, media accessibility and consumer behaviour and shows the significant increase in collaborative and interdisciplinary research targeting changing consumer perceptions as well as quality issues.

Complementing newcomers such as crowdsourcing and potentially universal emoticons, classical themes of AVT studies such as linguistic analyses and corpus-based research are featured. Prevalent throughout the volume is the impact of technology on both methodologies and content. The book will be of interest to researchers from a wide range of disciplines as well as audiovisual translators, lecturers, trainers and students, producers and developers working in the field of language and media accessibility.

**Media for All** Taylor &

Francis

The Routledge Handbook of Translation and Media provides the first comprehensive account of the role of translation in the media, which has become a thriving area of research in recent decades. It offers theoretical and methodological perspectives on translation and media in the digital age, as well as analyses of a wide diversity of media contexts and translation forms. Divided into four parts with an editor introduction, the 33 chapters are written by leading international experts and provide a critical survey of each area with suggestions for further reading. The Handbook aims to showcase innovative approaches and developments, bridging the gap between currently separate disciplinary subfields and pointing to potential synergies and broad research topics and issues. With a broad-ranging, critical and interdisciplinary perspective, this Handbook is an indispensable resource for all students and researchers of translation studies, audiovisual translation, journalism

studies, film studies and media studies.

*Audiovisual Translation: Subtitling Multilingual Matters*

This edited collection offers a rounded vision of some of the ways in which audiovisual translation (AVT) can be approached from an academic, professional and educational point of view. The studies provide a stimulating and thought-provoking account of some of the most representative themes that are currently being researched in the field of AVT, while also highlighting new directions of potential research from a cognitive perspective. A conscious effort has been made to cover not only cultural and linguistic approaches to traditional domains of AVT (such as dubbing and subtitling), but also to look into lesser known areas of research that are attracting substantial interest from various stakeholders and gradually becoming part of the remit of AVT (including subtitling for the deaf and audio description for the blind). In this respect, the chapters of this book tackle the field of AVT from a plural, comprehensive and up-to-

date perspective; speak of a rich and complex academic subject in the making; broaden our existing knowledge on AVT; reflect the many crossroads and junctions it currently faces and outline some of the issues that will become topical in the near future in this fascinating, flourishing discipline.

Audiovisual Translation  
Routledge

Captioning and Subtitling for d/Deaf and Hard of Hearing Audiences is a comprehensive guide to the theory and practice of captioning and subtitling, a discipline that has evolved quickly in recent years. This guide is of a practical nature and contains examples and exercises at the end of each chapter. Some of the tasks stimulate reflection on the practice and reception, while others focus on particular captioning and SDH areas, such as paralinguistic features, music and sound effects. The requirements of d/Deaf and hard of hearing audiences are analysed in detail and are accompanied by linguistic and technical considerations. These considerations, though shared with generic subtitling parameters, are discussed specifically with

d/Deaf and hard of hearing audiences in mind. The reader will become familiar with the characteristics of d/Deaf and hard of hearing audiences, and the diversity – including cultural and linguistic differences – within this group of people. Based on first-hand experience in the field, the book also provides a step-by-step guide to making live performances accessible to d/Deaf and hard of hearing audiences. As well as exploring all linguistic and technical matters related to the creation of captions, aspects related to the overall set up of the captioned performance are discussed. The guide will be valuable reading to students of audiovisual translation at undergraduate and postgraduate level, to professional subtitlers and captioners, and to any organisation or venue that engages with d/Deaf and hard of hearing people.

Voice-over Translation

John Benjamins Publishing  
Audiovisual translation is the fastest growing strand within translation studies. This book addresses the need for more robust theoretical frameworks to investigate emerging text-types, address new

methodological challenges (including the compilation, analysis and reproduction of audiovisual data), and understand new discourse communities bound together by the production and consumption of audiovisual texts. In this clear, user-friendly book, Luis Pérez-González introduces and explores the field, presenting and critiquing key concepts, research models and methodological approaches. Features include: • introductory overviews at the beginning of each chapter, outlining aims and relevant connections with other chapters • breakout boxes showcasing key concepts, research case studies or other relevant links to the wider field of translation studies • examples of audiovisual texts in a range of languages with back translation support when required • summaries reinforcing key issues dealt with in each chapter • follow-up questions for further study • core references and suggestions for further reading. • additional online resources on an extensive companion website This will be an essential text

for all students studying audiovisual or screen translation at postgraduate or advanced undergraduate level and key reading for all researchers working in the area.

*An Encyclopedia of Practical Translation and Interpreting Multilingual Matters*

This volume seeks to investigate how humour translation has developed since the beginning of the 21st century, focusing in particular on new ways of communication. The authors, drawn from a range of countries, cultures and academic traditions, address and debate how today's globalised communication, media and new technologies are influencing and shaping the translation of humour. Examining both how humour translation exploits new means of communication and how the processes of humour translation may be challenged and enhanced by technologies, the chapters cover theoretical foundations and implications, and methodological practices and challenges. They include a description of current research or practice, and comments on possible future

developments. The contributions interconnect around the issue of humour creation and translation in the 21st century, which can truly be labelled as the age of multimedia. Accessible and engaging, this is essential reading for advanced students and researchers in Translation Studies and Humour Studies.

**Audiovisual Translation**  
Routledge

As a sequel to?An Encyclopedia of Translation: ChineseEnglish EnglishChinese, which was published in 1995, this volume,?An Encyclopedia of Practical Translation and Interpreting, focuses on practical translation and interpreting, the two emerging areas of increasing importance in recent decades. Some chapters in this volume are illustrated with examples in translation between Chinese and English. Scholars and experts from China, France, Hong Kong, Spain, Taiwan, the United Kingdom, and the United States share with us their experiences in translation or interpreting practice. This encyclopedia should be of great interest to both specialists and

general readers.

*Audiovisual Translation: Subtitling* Routledge

Focusing on multimodality in translation studies, this edited volume provides insights into the trends and practices of multimodal translation in a variety of media. Divided into four main themes, the book explores audiovisual translation in digital media, multimodal translation of Chinese classics, multimodal design in website translation, and the use of paratexts in conference interpreting. Contributors draw on a diverse range of methods and theoretical models, including systemic functional multimodal discourse analysis, narrative theory, Skopos-functional theory, multimodal analysis of digital discourse, and corpus-based multimodal analysis. It covers important topics in media translation, ranging from emerging multimodal translation models to multimodal creativity in interlingual subtitling for social media and identity construction in the multimodal translation of food advertising. Through robust empirical studies, the book aims to shed light on the

methodological development of multimodal translation in different media forms, including social media, websites, on-site interactions and books. The title will be of great value to scholars and students of linguistics, translation studies, multimodal discourse analysis and digital media.

*The Routledge Handbook of Translation and Technology*

Subtitling Audiovisual Translation: Subtitling Nowadays subtitling

accomplishes several purposes; it is meant for diverse audiences and comes in many forms. This collection of innovative contributions explores these different manifestations, and offers a snapshot of the state of the art of a dynamic and ever-evolving field of study. This volume intentionally assembles essays that analyse subtitling in various audiovisual genres, including television series, variety programmes, operas, operettas, feature films and live

conferences, and that consider various languages, such as Chinese, English, Finnish, French, Italian, Japanese and Polish. It underscores both traditional and novel viewpoints and approaches to the subject, thus broadening the horizons of such a fascinating field. The diversity of topics tackled will encourage further reflection on a well-established research area, and, as such, the volume will appeal to both novice and expert researchers and professionals.
