This glossary draws from  
over 300 languages to  
provide a glimpse into  
how ancient as well as  
current place names have  
originated. Perfect for the  
student of geography as  
well as the casual  
etymologist, the  
International Glossary of  
Place Name Elements  
supplies the reader with  
comprehensive entries  
that cite examples of the  
use of many elements, as  
well as the language of  
origin and the English  
equivalent. From Afrikaan  
to Zuni, this reference  
work has been

painstakingly researched  
and will prove an  
invaluable tool to  
everyone from the high  
school geography teacher  
to advance  
onomasticians.

Keary. Published by Good  
Press. Good Press  
publishes a wide range of  
titles that encompasses  
every genre. From well-  
known classics & literary

fiction and non-fiction to forgotten—or yet undiscovered gems—of world literature, we issue the books that need to be read. Each Good Press edition has been meticulously edited and formatted to boost readability for all e-readers and devices. Our goal is to produce eBooks that are user-friendly and accessible to everyone in a high-quality digital format.

*The Odrysian Kingdom of Thrace* e-artnow

Drawing on a variety of sources of evidence and

over-coming many difficulties with the data, this study provides a good factual account of the Late Iron Age in North-West Thrace. It is at this time that the Thracian tribes reached the peak of their cultural development and Nikola Theodossiev assesses the major events and achievements of this period. Her reconstruction of cultural and historical development focuses on the archaeological and written evidence, and on the subjects of spatial organisation and territories, chronology,

mortuary practices and settlement. The evidence is collated and interpreted, frequently with statistical analysis, and is well presented.

Regions and regionalism have been staples of historical analysis for the Greek world for a very long time. What is meant by a region, however, is not always obvious. The contributions in this volume seek to address the question of defining regions and working out the implications of regionalism along different dimensions of analysis for Asia Minor in the Hellenistic and Roman

periods. Looking at culture, coinage, political institutions, the papers explore different markers of regional identity, consider ways in which these identities may remain stable or change over time, review the character of the interaction between regional entities and hegemonic powers, and challenge the usefulness in some cases of regional analysis. Questions of ethnicity are also addressed. This volume will be of interest to historians working in Asia

Minor and also to anyone concerned with the conceptual questions around regions and regionalism in the Mediterranean world. *Age of Conquests* Archaeopress Publishing Ltd  
The proceedings of the Sixth International Congress on Black Sea Antiquities (Constanța, 2017) is dedicated to the 90th birthday of Prof. Sir John Boardman, President of the Congress since its inception. The central theme returns to that considered 20 years

earlier: the importance of the Pontic Region for the Graeco-Roman World. *An Examination of the Creations of Mint Masters and Metal Smiths, and an Analysis of Stylistic Development During the Phase Between La Tène and Provincial Roman* Oxford University Press on Demand

 Who were the silver-clad  
 horsemen whose rich  
 tombs have been  
 discovered in Bulgaria and  
 North Aegean Greece?  
 This book sets out to show  
 that they belonged to the  
 Odrysians, a tribal  
 dynasty which created a  
 kingdom in the fifth  
 century BC, powerful

enough to challenge the  
 Greek states and  
 Macedon. A wealth of  
 archaeological material is  
 made available for the  
 first time in this schoarly  
 presentation.

 Over the past decades,  
 studies devoted to the  
 prosopography and  
 onomastic on of specific  
 regions have become a  
 valuable means for  
 students of the ancient  
 world seeking to attain a  
 fuller knowledge of a  
 society, its composition  
 and development over the

centuries; and their importance seems even greater in cases where these societies exhibit distinctive features, or where our knowledge of them remains only limited. This dimension was the main reason for writing a monograph devoted to the prosopography and onomasticon of Aegean Thrace; lying at the margins of the ancient Greek world, though at the same time at a vital point where different cultures met and made contact, this part of the

north Aegean coast, bounded by the lower course of the Nestos and Hebros rivers, attracted peoples of different ethnological origins from an early date. Study of the personal names has much of value to offer for the society and history of the area: the origin of the colonists, the presence of the former inhabitants, the later, sporadic settlement here of Macedonians and Romans, and even matters relating to changes in naming habits or the appearance and

dissemination of new religious beliefs. This objective, and the nature of the material itself, which, with very few exceptions, consists of names whose formation is clear and which are already known to scholarship, largely dictated the social and historical rather than philological and linguistic approach adopted in this work. Invaluable experience in the assembling and study of the material was gained from my participation in the publication of the

Greek and Latin inscriptions of Aegean Thrace, recently completed by the north Greek programme of the Centre for Greek and Roman Antiquity, under the direction of Prof. Louisa D. Loukopoulou and in collaboration with the XIX Ephorate of Prehistoric and Classical Antiquities of Komotini. This work made it possible not only to assemble the onomastic material found in inscriptions from the region -which, in Aegean Thrace, as in most areas of the ancient world, are a

valuable source of relevant information- but also to check the readings at the primary level, on the stone itself.

### **An Introduction**

Ausonius Éditions  
 Reproduction of the original: The Dawn of History by C.F Keary  
*A New Classical Dictionary of Greek and Roman Biography, Mythology and Geography* BoD - Books on Demand

This book explains the historical factors behind Rome's overt racial prejudice against the Celts and shows at the

same time the important Celtic contribution to the development of Roman culture - in weaponry and warfare, in transport technology and, above all, in the Celtic contribution to early Latin literature. [The Geography of Celtic Personal Names in the Latin Inscriptions of the Roman Empire](#) Taylor & Francis

This book deals with the history and migrations of Celtic people. In that remote age of which no personal records remain, but whose history may be derived from the known

dispersion of men and languages, we find that the Celts, first of the Indo-European nations, fled from their primitive homes in Central Asia, and, by the succeeding waves of emigration, were forced further and further to the West. It does not necessarily follow that their migrations, in the ante-historical period, were caused by war; although, amongst the races of men, whilst in an imperfect state of development, the tie of country is so strong that nothing but the most

positive evils of war, pestilence, and famine will compel them to abandon their native land. But the early migrations of the Celts may have been also caused by the pressure of the new Eastern populations forcing the tribes least willing or able to labor into new and virgin soils, producing a greater return in proportion to the farmer's toil. It has been conclusively established by Pritchard and Donaldson, following in the track of many continental ethnologists

and philologists, that the Celtic and German languages, with their derivatives, as well as the ancient Greek and Latin, all belong to the same family with the Sanscrit, and are in fact different modifications of the same language. From this, coupled with the slender traditions of the ante-historical period, it is concluded that the Celtic people are of Eastern origin—a kindred tribe with the nations who have settled on the Indus, as well as on the shores of the Mediterranean and

Baltic. In the most ancient times, they possessed the greater part of Europe. In Spain, at the Roman conquest, the population was almost wholly Celtic. To the north of Italy, they gave the name of Cisalpine Gaul. Modern Germany was long the seat of powerful Celtic communities Thrace was in their possession, and, under another Brennus, they plundered Greece. Asia Minor they long possessed, and left there the name of Galatia. It may be observed that the Celtic races have ever

been remarkable for sudden migrations. We do not find them well known to the early historians. Herodotus places them in the extreme West of Europe, beyond the pillars of Hercules. In the fourth century before the Christian Era, the Celts of Gaul crossed the Apennines and overran Central and Southern Italy. According to Livy, two hundred years before that period, one multitude of the Gauls crossed the Rhine, and settled in the Hercynian Forest; another crossed the Alps, settled

in the valley of the Po, and founded Milan. In the Gaelic invasion of Italy, they defeated the Romans in the battle of the Allia, and were in possession of Rome for six months, with the exception of the Capitol. But, unlike the northern invaders, during the decline of the Roman Empire, they established no states in Central or Southern Italy, and retired loaded with booty...
