... Essential
Oils Contact
Allergy
AndThe most
commonly
reported
allergic
reaction to
essential oils
is contact
dermatitis.
Contact
dermatitis
from essential
oils causes an
itchy, bumpy
rash on the

skin at the site
of contact
with the oil.

The rash may
appear similar
to poison oak,
may have
blisters and
peel when the
rash is
resolving. It is
also possible
to have
systemic
contact
dermatitis
from taking
the essential
oils internally
(by
mouth).Are
