### Multilingualism and Education in Africa Springer Science & Business Media

In 1980, the science world was stunned when a maverick team of researchers proposed that a massive meteor strike had wiped the dinosaurs and other fauna from the Earth 66 million years ago. Scientists found evidence for this theory in a “crater of doom” on the Yucatán Peninsula, showing that our planet had once been a target in a galactic shooting gallery. In *Cataclysms*, Michael R. Rampino builds on the latest findings from leading geoscientists to take “neocatastrophism” a step further, toward a richer understanding of the science behind major planetary upheavals and extinction events. Rampino recounts his conversion to the impact hypothesis, describing his visits to meteor-strike sites and his review of the existing geological record. The new geology he outlines explicitly rejects nineteenth-century “uniformitarianism,” which casts planetary change as gradual and driven by processes we can see at work today. Rampino offers a cosmic context for Earth’s geologic evolution, in which cataclysms from above in the form of comet and asteroid impacts and from below in the form of huge outpourings of lava in flood-basalt eruptions have led to severe and even catastrophic changes to the Earth’s surface. This new geology sees Earth’s position in our solar system and galaxy as the keys to understanding our planet’s geology and history of life. Rampino concludes with a controversial consideration of dark matter’s potential as a triggering mechanism, exploring its role in heating Earth’s core and spurring massive volcanism throughout geologic time.

### Higher Education Quality Assurance in Sub-Saharan Africa Columbia University Press

Are you a parent or guardian looking for a top-notch 21st-century private school in Zambia, one that will meet your family needs and expectations? This profound question is at the core of this first-ever book on private school education in Zambia. *Choosing a Good Private School for your Child: The Ultimate Guide for Parents and Guardians in Zambia* emerged from Monde Nyambe’s vast experience working as an educator and school leader in private international school settings. The book provides insights into pertinent factors that assist parents as they make important decisions about private school choices for their children. Through research and experience, the author draws on the views of key stakeholders to create a decision-making tool on choosing a good private school, ideal not only for parents but also for teachers, school leaders and private school proprietors. Make no mistake, this is a must-read for parents intending to give their children a solid head start by ensuring that they secure a good private school amidst the ever-rising number of private schools in Zambia.

### Early Education in a Global Context A&C Black

Master's Thesis from the year 2020 in the subject Pedagogy - School Pedagogics, University of Zambia (Postgraduate studies), course: Master of Mathematics Education, language: English, abstract: The study explored teachers’ classroom practices in addressing learners’ errors regarding how they engaged grade eight learners in reading; how they probed learners’ understanding; and what they did to enhance learners’ process skills and encoding abilities in algebraic word problems.

Five teachers and twenty five learners (in five focus groups discussions of five members each), at three secondary schools in Isoka district of Muchinga province, Zambia were purposively sampled to participate in the study. The study used a qualitative approach which followed a descriptive case study design. Data collection was done using lesson observations, semi-structured interviews, document analysis and focus group discussions. To capture observations and interviews in totality, video and audio recordings were used respectively. Thematic analysis was used to analyse data. The five performance strategies of solving word problems by Newman namely; reading ability, comprehension ability, transformation ability, process skills and encoding ability guided the analysis of data. The study was guided by the following research questions: How do teachers engage learners in reading algebraic word problems? How do teachers probe learners’ understanding of algebraic word problems? What do teachers do to enhance learners’ process skills and encoding abilities in algebraic word problems?

### Speculative Taxidermy Professors World Peace Academy

The African Development Bank and OECD's annual assessment and projections for the African economies, now covering 35 countries.

### Exhuming Violent Histories Columbia University Press

Discusses professional development in several contexts, children's understandings and programs for children. This book should give the reader an idea of the range of work that is being done around the globe. It brings together insider perspectives on early education in different contexts.

### **A Slave Between Empires** Columbia University Press

Anthony Comstock was America’s first professional censor. From 1873 to 1915, as Secretary of the New York Society for the Suppression of Vice, Comstock led a crusade against lasciviousness, salaciousness, and obscenity that resulted in the confiscation and incineration of more than three million pictures, postcards, and books he judged to be obscene. But as Amy Werbel shows in this rich cultural and social history, Comstock’s campaign to rid America of vice in fact led to greater acceptance of the materials he deemed objectionable, offering a revealing tale about the unintended consequences of censorship. In *Lust on Trial*, Werbel presents a colorful journey through Comstock’s career that doubles as a new history of post-Civil War America’s risqué visual and sexual culture. Born into a puritanical New England community, Anthony Comstock moved to New York in 1868 armed with his Christian faith and a burning desire to rid the city of vice. Werbel describes how Comstock’s raids shaped New York City and American culture through his obsession with the prevention of lust by means of censorship, and how his restrictions provided an impetus for the increased circulation and explicitness of “obscene” materials. By opposing women who preached sexual liberation and empowerment, suppressing contraceptives, and restricting artistic expression, Comstock drew the ire of civil liberties advocates, inspiring more open attitudes toward sexual and creative freedom and more sophisticated legal defenses. Drawing on material culture high and low, including numerous examples of the “obscenities” Comstock seized, *Lust on Trial* provides fresh insights into Comstock’s actions and motivations, the sexual habits of Americans during his era, and the complicated relationship between law and cultural change.

The study of software engineering and its applications to system engineering is critical in computer science research. Modern research methodologies, as well as the use of machine and statistical learning in software engineering research, are covered in this book. This book contains the refereed proceedings of the Software Engineering Perspectives in Systems part of the 11th Computer Science On-line Conference 2022 (CSOC 2022), which was held in April 2022 online.

*Teachers' classroom practices in addressing learners' errors in algebraic word problems* Partridge Publishing

Written by an international team of ophthalmic practitioners, this authoritative book is a vital resource not only for ophthalmic professionals, but for any healthcare professional who cares for patients with eye problems. In the ten years since the first edition was published, practice has moved on, as has the evidence for practice. This second edition draws on the passion and goodwill of the original team of authors, complemented by other colleagues, to fully revise and update the text in line with new findings, new practice and new and exciting treatments. The book is broadly divided into three sections. The first section considers the structure and function of the eye, as well as the basic principles of ophthalmology and eye examination. The second section considers patient care in diverse settings, as well as work-related issues and patient education. It also includes two entirely new chapters on eye banking and global eye health. The third section takes a systematic approach to patient care, working from the front to the back of the eye, discussing some of the common disorders affecting each structure (such as the lens or cornea) or group of structures (such as the eyelids or lacrimal drainage system). The book concludes with a very useful glossary of ophthalmic terms. Some aspects of practice discussed in the text are, of necessity, UK based, but these are clearly indicated and, wherever possible, principles (rather than specifics) are addressed and readers are directed to local policies and interpretations. The first edition of this book became a core text for ophthalmic nursing, in particular, and for the education of ophthalmic nurses across the world. This new edition will provide a comprehensive, up-to-date, evidence-based resource for all ophthalmic healthcare professionals. Contents include: • Physiology of vision • Optics • Pharmacology • Examination of the eye • Visual impairment • Patient education • Work and the eye • Care of the adult ophthalmic patient in an inpatient setting • The care of the child undergoing ophthalmic treatment • Developments in day care surgery for ophthalmic patients • Ophthalmic theatre nursing • The care of patients presenting with acute problems • Eye banking • Global eye health • The eyelids and lacrimal drainage system • The conjunctiva • The cornea • The sclera • The lens • The uveal tract • The angle and aqueous • The retina and vitreous • The orbit and extraocular muscles • Visual and pupillary pathways and neuro-ophthalmology • The eye and systemic disease

 An account of how children learn L2s in formal contexts and how that knowledge impacts on the design, development, and evaluation of their language assessment products.

*Some Basics of Religious Education in Zambia* Lulu.com

There have been some concerns on the poor performance of pupils in reading comprehension from people in different fora. For instance during School Programme for In-Service for the Term (SPRINT) Meetings in schools, and Grade Twelve Marking Centers. Examiners and teachers have expressed this concern generally in Zambia. The concern is that generally Grade Twelve pupils do not perform well in Reading Comprehension. An analysis of the Examinations Council of Zambia examiners report on the 2007 Joint School Certificate and General Certificate of Education examinations also shows this weakness on the part of pupils in reading comprehension tasks. Reporting on the passage, the report indicates that more than fifty percent of the candidates scored below half the total mark in reading comprehension section; with some scoring as low as between 0 and 5 marks out of 20. The 2008 Examination Council of Zambia, Examiners' report shows almost the same scenario. This state of affairs has raised concerns among education practitioners and officials in the country. However, the performance and reasons for the performance varies from one school to another.

**Official Verbatim Report of the Parliamentary Debates** OECD Publishing

Education in East and Central Africa is a comprehensive critical reference guide to education in the region. With chapters written by an international team of leading regional education experts, the book explores the education systems of Djibouti, Eritrea, Ethiopia, Kenya, Somalia, South Sudan, Tanzania, Uganda, Zambia, Angola, Burundi, the Central African Republic, the Democratic Republic of Congo, Equatorial Guinea and Sao Tome, Gabon, the Republic of Congo and Rwanda. The book critically examines the regional development of education provision in each country as well as recent reforms and global contexts. Including a comparative introduction to the issues facing education in the region as a whole and guides to available online datasets, this handbook is an essential reference for researchers, scholars, international agencies and policy-makers at all levels.

*Flagship Universities in Africa* Springer Nature

This report provides a systematic review of the collection, availability and quality of metadata as well as data regarding education, at the system level, for countries participating in the PISA for Development (PISA-D) project: Cambodia, Ecuador, Guatemala, Paraguay, Senegal and Zambia.

*South Africa Since 1500* Cambridge University Press

This study explores the dynamic relationship between science, numbers and politics. What can scientific evidence realistically do in and for politics? The volume contributes to that debate by focusing on the role of "numbers" as a means by which knowledge is expressed and through which that knowledge can be transferred into the political realm. Based on the assumption that numbers are constantly being actively created, translated, and used, and that they need to be interpreted in their respective and particular contexts, it examines how numbers and quantifications are made 'politically workable', examining their production, their transition into the sphere of politics and their eventual use therein. Key questions that are addressed include: In what ways does scientific evidence affect political decision-making in the contemporary world? How and why did quantification come to play such an important role within democratic politics? What kind of work do scientific evidence and numbers do politically?

**Examinations Council Report** Springer

Taxidermy, once the province of natural history and dedicated to the pursuit of lifelike realism, has

recently resurfaced in the world of contemporary art, culture, and interior design. In *Speculative Taxidermy*, Giovanni Aloï offers a comprehensive mapping of the discourses and practices that have enabled the emergence of taxidermy in contemporary art. Drawing on the speculative turn in philosophy and recovering past alternative histories of art and materiality from a biopolitical perspective, Aloï theorizes speculative taxidermy: a powerful interface that unlocks new ethical and political opportunities in human-animal relationships and speaks to how animal representation conveys the urgency of addressing climate change, capitalist exploitation, and mass extinction. A resolutely nonanthropocentric take on the materiality of one of the most controversial mediums in art, this approach relentlessly questions past and present ideas of human separation from the animal kingdom. It situates taxidermy as a powerful interface between humans and animals, rooted in a shared ontological and physical vulnerability. Carefully considering a select number of key examples including the work of Nandipha Mntambo, Maria Papadimitriou, Mark Dion, Berlinde De Bruyckere, Roni Horn, Oleg Kulik, Steve Bishop, Snæbjörnsdóttir/Wilson, and Cole Swanson, *Speculative Taxidermy* contextualizes the resilient presence of animal skin in the gallery space as a productive opportunity to rethink ethical and political stances in human-animal relationships.

[Choosing a Good Private School for Your Child](#) GRIN Verlag

Wellbeing is foundational to citizens' individual and collective ability to acknowledge, address, and alleviate ongoing struggles, shared risks, and the unprecedented challenges of our time. A holistic focus on wellness across campus communities is timely and important, given that national and global justice movements are calling upon post-secondary institutions to address the ways in which education systems have been reproducing dominant narratives, reinforcing systemic discrimination, and retaliating against education leaders who work to disrupt structural inequalities. *Leadership Wellness and Mental Health Concerns in Higher Education* offers diverse perspectives about whether and how campus leaders around the world are sustaining and advancing health and wellness in unprecedented times and amplifies diverse voices in the exploration of how to advance individual and collective wellbeing in higher education. Covering a wide range of topics such as stress management and burnout, this reference work is ideal for academicians, scholars, researchers, administrators, practitioners, instructors, and students.

**Zambia in the 1990s** World Bank Publications

The past is not just, as has been famously said, another country with foreign customs: it is a contested and colonized terrain. Indigenous histories have been expropriated, eclipsed, sometimes even wholly eradicated, in the service of imperialist aims buttressed by a distinctly Western philosophy of history. Ranajit Guha, perhaps the most influential figure in postcolonial and subaltern studies at work today, offers a critique of such historiography by taking issue with the Hegelian concept of World-history. That concept, he contends, reduces the course of human history to the amoral record of states and empires, great men and clashing civilizations. It renders invisible the quotidian experience of ordinary people and casts off all that came before it into the nether-existence known as "Prehistory." On the Indian subcontinent, Guha believes, this Western way of looking at the past was so successfully insinuated by British colonization that few today can see clearly its ongoing and pernicious influence. He argues that to break out of this habit of mind and go beyond the Eurocentric and statist limit of World-history historians should learn from literature to

make their narratives doubly inclusive: to extend them in scope not only to make room for the pasts of the so-called peoples without history but to address the historicity of everyday life as well. Only then, as Guha demonstrates through an examination of Rabindranath Tagore's critique of historiography, can we recapture a more fully human past of "experience and wonder."

*Living with Cerebral Palsy: A Parents Guide to Managing Cerebral Palsy* History Religious Education Civics Examinations Council Report Leadership Wellness and Mental Health Concerns in Higher Education

In June 1887, a man known as General Husayn, a manumitted slave turned dignitary in the Ottoman province of Tunis, passed away in Florence after a life crossing empires. As a youth, Husayn was brought from Circassia to Turkey, where he was sold as a slave. In Tunis, he ascended to the rank of general before French conquest forced his exile to the northern shores of the Mediterranean. His death was followed by wrangling over his estate that spanned a surprising array of actors: Ottoman Sultan Abdülhamid II and his viziers; the Tunisian, French, and Italian governments; and representatives of Muslim and Jewish diasporic communities. *A Slave Between Empires* investigates Husayn's transimperial life and the posthumous battle over his fortune to recover the transnational dimensions of North African history. M'hamed Oualdi places Husayn within the international context of the struggle between Ottoman and French forces for control of the Mediterranean amid social and intellectual ferment that crossed empires. Oualdi considers this part of the world not as a colonial borderland but as a central space where overlapping imperial ambitions transformed dynamic societies. He explores how the transition between Ottoman rule and European colonial domination was felt in the daily lives of North African Muslims, Christians, and Jews and how North Africans conceived of and acted upon this shift. Drawing on a wide range of Arabic, French, Italian, and English sources, *A Slave Between Empires* is a groundbreaking transimperial microhistory that demands a major analytical shift in the conceptualization of North African history.

[Report of the Auditor-General for ... on the Accounts of Parastatal Bodies](#) IGI Global

This book is a must-read for every language teaching professional and researcher working in a multilingual context. *Multilingualism and Education in Africa: The State of the State of the Art* is an up-to-date exploration and wide-ranging review of the symbiotic relationship between multilingualism and education in Africa. The African continent is rich in languages. Most of her inhabitants are multilingual and many of the nations have embraced multilingual education. This book examines multilingualism in education from three broad perspectives: multilingualism and language in education policy in Africa; multilingualism as an educational resource in Africa; and attitudes and challenges of multilingualism and education in Africa. The book's nineteen chapters discuss these three perspectives from East, West, Central and South Africa. All the contributors are leading authorities in multilingualism and education. The chapters combine a wide range of viewpoints based on theoretical, empirical and personal experiences. The reader is left with a deeper understanding of the unique features of multilingualism and education in Africa that have seldom been addressed by those who experience them first-hand. The book demonstrates successful practices in multilingualism and education; showing how African nations have determined what works for them without ignoring challenges such as policies on paper, attitudes towards African languages and limited resources. The benefits of multilingual education override the challenges. The

book's extensive coverage makes it an important resource for scholars and policy makers in the field of multilingualism and education. Overall, this book represents an important contribution to an important subject in education globally. The editors have provided an introductory overview to the book and commentaries on the three sections.

*Equity in Educational Expenditures* Springer

Winner, 2023 Charles Tilly Distinguished Contribution to Scholarship Book Award, Collective Behavior and Social Movements Section, American Sociological Association Honorable Mention, 2023 Peace, War, and Social Conflict Section Outstanding Book Award, Peace, War, and Social Conflict Section, American Sociological Association Many years after the fall of Franco's regime, Spanish human rights activists have turned to new methods to keep the memory of state terror alive. By excavating mass graves, exhuming remains, and employing forensic analysis and DNA testing, they seek to provide direct evidence of repression and break through the silence about the dictatorship's

atrocities that persisted well into Spain's transition to democracy. Nicole Iturriaga offers an ethnographic examination of how Spanish human rights activists use forensic methods to challenge dominant histories, reshape collective memory, and create new forms of transitional justice. She argues that by grounding their claims in science, activists can present themselves as credible and impartial, helping them intervene in fraught public disputes about the remembrance of the past. The perceived legitimacy and authenticity of scientific techniques allows their users to contest the state's historical claims and offer new narratives of violence in pursuit of long-delayed justice. Iturriaga draws on interviews with technicians and forensics experts and provides a detailed case study of Spain's best-known forensic human rights organization, the Association for the Recovery of Historical Memory. She also considers how the tools and tactics used in Spain can be adopted by human rights and civil society groups pursuing transitional justice in other parts of the world. An ethnographically rich account, *Exhuming Violent Histories* sheds new light on how science and technology intersect with human rights and collective memory.
