 ...The physics of metal forming and metal removing is normally
 expressed using non-linear partial differential equations which
 can be solved using the finite element method (FEM). However,
 when the process parameters are uncertain and/or the physics of
 the process is not well understood, soft computing techniques
 can be used with FEM or alone to model the process. Modeling of
 Metal Forming and Machining Processes on ...Coining, flow
 forming, and ironing are examples of sheet-bulk metal forming.
 Modeling of metal forming started since the beginning of the 20th
 century . Initial attempts were directed to estimate the load
 required for plastic deformation. Prominent methods were slip-

line field method, slab method, and upper bound
 method. Modeling of metal forming: a review -
