This second new OSCE title delivers another set of up to date popular cases encountered on the wards and in the exams. OSCE Stations for Medical Finals Book 2: Scenarios is created to reflect current exam topics, each scenario is subdivided into 4 to 6 related tasks. The reader is guided through stations covering: history taking, clinical signs, data interpretation, and clinical therapeutics. By working methodically through the tasks the authors hope to promote the application and utilisation of knowledge and skills, asking candidates to think and act on the clinical information they have gathered. As the stations and tasks are linked, the candidate starts at station 1, and moves through each of the subsequent stations in the given order. Mirroring the real

world, each task would be performed on the same patient.

Care of the Critically Ill Surgical Patient
Libri Publishing Limited

This is the second edition of a well-received book that enriches the

understanding of radiographers and radiologic technologists across the globe, and is designed to meet the needs of courses (units) on radiographic imaging equipment, procedures, production, and exposure. The book also serves as a supplement for courses that address digital imaging techniques, such as radiologic physics, radiographic equipment and quality control. In a broader sense, the purpose of the book is to meet readers' needs in connection with the change from film-based imaging to film-less or digital imaging; today, all radiographic imaging worldwide is based on digital imaging technologies. The book covers a wide range of topics to address the needs of members of various professional radiologic technology associations, such as the

American Society of Radiologic Technologists, the Canadian Association of Medical Radiation Technologists, the College of Radiographers in the UK, and the Australian and New Zealand Societies for Radiographers.

Colorectal Cancer Screening provides a complete overview of colorectal cancer screening, from epidemiology and molecular abnormalities, to the latest screening techniques such as stool DNA

and FIT, Computerized Tomography (CT) Colonography, High Definition Colonoscopes and Narrow Band Imaging. As the text is devoted entirely to CRC screening, it features many facts, principles, guidelines and figures related to screening in an easy access format. This volume provides a complete guide to colorectal cancer screening which will be informative to the subspecialist as well as the primary care practitioner. It represents the only text that provides this up to date information about a subject that is continually changing. For the primary practitioner, information on the guidelines for screening as well as increasing patient participation is presented. For the subspecialist, information regarding the latest imaging techniques as well as flat adenomas and

chromoendoscopy are covered. The section on the molecular changes in CRC will appeal to both groups. The text includes up to date information about colorectal screening that encompasses the entire spectrum of the topic and features photographs of polyps as well as diagrams of the morphology of polyps as well as photographs of CT colonography images. Algorithms are presented for all the suggested guidelines. Chapters are devoted to patient participation in screening and risk factors as well as new imaging technology. This useful volume explains the rationale behind screening for CRC. In addition, it covers the different screening options as well as the performance characteristics, when available in the literature, for each test.

This volume will be used by the sub specialists who perform screening tests as well as primary care practitioners who refer patients to be screened for colorectal cancer.

the MRCS Cambridge University Press
The examination for Membership of the Royal College of Obstetricians and Gynaecologists (MRCOG) remains one of the most internationally recognised postgraduate examinations in the specialty. Over the years, the examination has evolved in keeping with changes in medical education; the Part 3 examination now consists of 14 tasks, each covering one of the 14 core modules in the curriculum and assessing specific skills which may include all or some of Information Gathering, Communication with Patients and Families, Communication with Colleagues, Patient Safety, and Applied Clinical Knowledge. This invaluable resource consists of analyses of different aspects of what is being tested, with

general advice on how to prepare for the examination and discussion of the reasons why trainees fail the examination. There follow four sample 'papers' of tasks; in each of them, attempts have been made to cover all 14 modules in the core curriculum. There is also an additional paper with random tasks to help with preparation.

Hamilton Bailey's Demonstrations of Physical Signs in Clinical Surgery Cambridge University Press

An understanding of how to manage patients in the critical care environment is a key objective of surgical training, and the MRCS viva voce examination remains an area of much anxiety for many candidates. Surgical Critical Care

Vivas aims to dispel at least some of this anxiety by providing some of the most common questions that are likely to be encountered, along with detailed model answers, which help the reader to consolidate their knowledge and understand key concepts. The answers themselves are structured so that the main points needed to address the question fully are clearly summarised and easily understood. Packed with useful information presented in an accessible A-Z format, this useful book allows the busy candidate to work through any number of questions, alone or as part of a group, to practice their oral examination technique, focus on areas of weakness and most effectively plan their revision. Essential reading for MRCS/AFRCS(Ed) viva examination

candidates. Also useful as an aide memoire to the junior surgeon and anaesthetist and as a quick reference and self-assessment tool for other ICU-based personnel such as emergency nurses or operating department assistants.
