need to  
provide a  
clear  
explication of  
the language

This edited

develops a

As such, it will be of considerable interest to examination boards who wish to validate their own speaking tests in a systematic and coherent manner, as well as to academic researchers and graduate students in the field of language assessment more generally. This is a

companion volume to the previously published titles Examining Writing and Examining Reading. Meaning-Focused Materials for Learning Cambridge University Press "IELTS Listening Practice Tests: IELTS Self-Study Exam Preparation Book for IELTS for Academic Purposes and General Training Modules" contains three complete IELTS practice

Secondly, you can examine the ways the ideas are organized and communicated, then apply what you learn to your own writing. Finally, they are a quick reference to look back before the exam date.

Over the  
years, various  
approaches to  
validation  
have emerged  
in  
psychological  
and  
educational

research,  
which can be  
classified into  
traditional

and modern  
approaches.  
Traditional  
approaches  
view validity

as a  
multicompone

including, for  
example,  
content,

predictive  
validity, while  
modern  
approaches  
conceptualize  
it as a unitary  
concept  
evaluated  
through  
argumentation  
. Drawing on  
the modern  
approach, this  
book builds a  
validity  
argument for

listening test  
sample. The

book provides some insights into the listening sub-skills that the test engages, the psychometric dimensionality of the test, variables that predict item difficulty parameters, bias across age, nationality, test experience, and gender, as well as predictive-referenced evidence of validity. A variety of techniques including the Rasch model and structural equation modelling are

used to answer the research questions and to build a validity argument framework; this argument organizes the thematically related findings into a coherent treatment of the validity of the listening test. The book presents the first treatment of validity argument and related analytical tools in one volume and maps the psychometric/statistical analysis tools onto the validity

argument framework. It also provides an extensive literature review of listening comprehension, validation, and psychometric modeling and proposes both methods for developing and validating self-assessment instruments and novel approaches to improving the quality of language assessments. Trivium LLC  
This publication is a result of the joint conference held by MATSDA and Fontys University of

Applied Sciences, the Netherlands, in Tilburg in June 2017. MATSDA is an international materials development association founded in 1993 which serves to bring together researchers, teachers, materials developers and publishers in an effort to improve the effectiveness of language learning materials. The 2017 conference centred on issues related to the development of meaning-

focused materials for language learning, and attracted presenters from twenty-five countries stretching from Greenland to Brazil. These issues are reflected in the chapters in this volume, with each one focusing on a different aspect of meaning-focused materials and many of them introducing the reader to previously unexplored facets of the theory of meaning-focused

instruction and its application to materials development. The contributions here are of essential value to post-graduate students, to teachers, to materials developers and to researchers. They are written to be academically rigorous, but at the same time accessible to newcomers to the field and to experienced experts alike.
