 This title was first published in 2003. Germain Boffrand was one of the great French architects of the early eighteenth century. His work encompassed not only the design of town and country houses for the wealthy but also mines, bridges and hospitals. His *Livre d'Architecture* is one of the most original books on architecture ever written in France. Taking the Art of Poetry by the Latin poet Horace as its starting point, it developed an aesthetic of architecture focused on character, style and the emotional impact of a building that influenced Blondel, Le Camus de Mezieres and Soane, and is still central to contemporary debate about the nature and meaning of architecture. Translated for the first time by David Britt, Boffrand's text is here accompanied by an extensive introduction and notes by Caroline van Eck who situates Boffrand within the main issues of eighteenth-century architectural aesthetics. Beautifully

illustrated, including all the pictures chosen by Boffrand for his original publication, this book is an invaluable tool for teaching the history of architectural theory and an essential work for any architectural library. Germain Boffrand is published with the assistance of the Getty Foundation.

**General Catalogue of Printed Books to 1955** Veloce Publishing Ltd

Mises' classic avoids the formidable mathematical structure of fluid dynamics, while conveying — by often unorthodox methods — a full understanding of the physical phenomena and mathematical concepts of aeronautical engineering.

*Factory and Industrial Management* Taylor & Francis

"An indispensable tool ... for the student of Surrealism and book illustration ... [and] also for those interested in the complicated intrications between literature and pictorial movements from Romanticism to present-day Postmodernism"—Blurb.

*The Technical Literature of Agricultural Motor Fuels* Copyright Office, Library of Congress

First published in 2003. Routledge is an imprint of Taylor & Francis, an informa company.

*André Lefebvre, and the Cars He Created at Voisin and Citroën*

 Porsche 996 The Essential Companion

Together with his colleagues at Citroën, Andre Lefebvre created the Traction Avant (1934), the TUB (1939) – Citroën's first front wheel drive utility van that was succeeded by the H and HY vans (1947) – the Deux Chevaux (1948), and, last but not least, the DS (1955). From 1923 to 1931 Lefebvre also designed several highly original and outstanding competition cars and record-breaking automobiles for Voisin. He even drove some these cars in races

and record attempts. It is obvious that during his 16 years with Gabriel Voisin he was very much influenced by the ideas of this illustrious aviation pioneer and car manufacturer. The experience gained during that period gave him the self-confidence to persuade his successive bosses at Citroën that his unorthodox approach to automobile design was what the company needed; first he convinced André Citroën, later Pierre Michelin, then Pierre-Jules Boulanger, and finally Robert Puiseux and Pierre Bercot. His oeuvre for Citroën alone earns him a place of honour among the great automobile designers of the past century. The fact that most present-day cars still carry the DNA of his design philosophy makes him stand out above other automotive pioneers and innovators. That is why it is amazing that so little is known about this fascinating and brilliant engineer. This book was written in order to remedy that, and to pay tribute to André Lefebvre: the passionate pioneer who left car enthusiasts around the world such an important heritage.
