MATA SUSAN

Nitrogen oxides (NOx) why and how they are controlled Springer

Multiple Choice Questions on Renewable Energy book contains over 1500 multiple choice questions covering various sectors of renewable energy, including solar, wind, biomass, biogas, biofuels, hydro, energy from wastes, hydrogen, geothermal, ocean, tidal, and waves. The book has three levels of questions, ranging from school to graduate levels. A comprehensive overview of renewable energy development in India has also been presented. This book is useful for academicians, students pursuing engineering or agriculture-related courses, aspirants of various competitive exams, professionals, and stakeholders in the renewable energy sector. It can also be used for quiz programmes organized in schools, universities, engineering institutions, and on television.

Applied Engineering Analysis CRC Press

In this book, an attempt has been made by the author to present numerous important questions with answers which have been methodically prepared/selected from different text books, manuals of petroleum industries, SPE technical papers and teaching materials of distinguished persons. These questions are very relevant for promoting fundamental understanding of petroleum engineering and will be primarily useful for fresh graduates of petroleum engineering who can prepare themselves soundly for both written as well as oral examinations.

Logical Reasoning Elsevier

This comprehensive guide will prepare candidates for the test in all 50 states. It includes four complete practice exams, a real estate refresher course and complete math review, as well as a real estate terms glossary with over 900 terms, and expert test-prep tips.

Engineering Economic Analysis McGraw-Hill Education

This book presents all the publicly available questions from the PISA surveys. Some of these questions were used in the PISA 2000, 2003 and 2006 surveys and others were used in developing and trying out the assessment.

Fundamentals of Drilling Engineering Createspace Independent Publishing Platform

This reference provides an overview of the methods used in petroleum refining. Selected topics include exploration, production and refining, crude oils, quality control, petroleum products, thermal conversion, manufacture of bitumens, pollution control in refineries, and more.

PISA Take the Test Sample Questions from OECD's PISA Assessments New Age International

This textbook is targetted to undergraduate students in chemical engineering, chemical technology, and biochemical engineering for courses in mass transfer, separation processes, transport processes, and unit operations. The principles of mass transfer, both diffusional and convective have been comprehensively discussed. The application of these principles to separation processes is explained. The more common separation processes used in the chemical industries are individually described in separate chapters. The book also provides a good understanding of the construction, the operating principles, and the selection criteria of separation equipment. Recent developments in equipment have been included as far as possible.

The procedure of equipment design and sizing has been illustrated by simple examples. An overview of different applications and aspects of membrane separation has also been provided. 'Humidification and water cooling', necessary in every process industry, is also described. Finally, elementary principles of 'unsteady state diffusion' and mass transfer accompanied by a chemical reaction are covered. **SALIENT FEATURES :**

- A balanced coverage of theoretical principles and applications.
- Important recent developments in mass transfer equipment and practice are included.
- A large number of solved problems of varying levels of complexities showing the applications of the theory are included.
- Many end-chapter exercises.
- Chapter-wise multiple choice questions.
- An Instructors manual for the teachers.

Multiple Choice Questions on Oil, Gas, and Petrochemicals KHANNA PUBLISHING

The Acquisition of Logging Data

O Level Biology MCQ PDF Book (IGCSE/GCSE Biology eBook Download) Gulf Professional Publishing

Engineering Economic Analysis offers comprehensive coverage of financial and economic decision-making for engineering projects, with an emphasis on problem solving, life cycle costs, and the time value of money. The authors' concise, accessible writing style and practical emphasis make this text ideal for undergraduate engineering economy courses.

FE Chemical Practice Exam Khanna's Objective Questions in Petroleum Engineering

Workshop Processes, Practices and Materials is an ideal introduction to workshop processes, practices and materials for entry-level engineers and workshop technicians. With detailed illustrations throughout and simple, clear language, this is a practical introduction to what can be a very complex subject. It has been significantly updated and revised to include new material on adhesives, protective coatings, plastics and current Health and Safety legislation. It covers all the standard topics, including safe practices, measuring equipment, hand and machine tools, materials and joining methods, making it an indispensable handbook for use both in class and the workshop. Its broad coverage makes it a useful reference book for many different courses worldwide.

Petroleum Refining Technology Learning Express (NY)

Subsea production systems, overview of subsea engineering, subsea field development, subsea distribution system. Flow assurance and system engineering. Subsea structure and equipment. Subsea umbilical, risers and flowlines.

Khanna's Objective Type Questions & Answers in Chemical Engineering KHANNA PUBLISHING

Khanna's Objective Questions in Petroleum Engineering KHANNA PUBLISHING

Civil Engineering Objective Type Questions KHANNA PUBLISHING HOUSE

This book will be useful for degree & diploma Curriculum of Engineering and for various associate membership examinations conducted by professional bodies like Institution of Engineers (AMIE) and Indian Institute of chemical Engineers (AMICChE) etc. Salient Features of This Book * Subject matter has been presented in simple, lucid & easy to understand language * Covers all the topics included in the syllabus of various engineering colleges/Technical Institutes & professional bodies examination papers.

Microbiology The Energy and Resources Institute (TERI)

This book is meant for diploma & degree student of metallurgical engineering for their academic programs as well as for various competitive examination for securing jobs. This book has been structured in three section. First section contains multiple choice type questions of various subjects of metallurgical engineering. Second section contains chapter wise question of GATE (Graduate Aptitude Test in Engineering) from 1991 to 2016. Third section contains SHORT QUESTIONS & ANSWERS in METALLURGICAL ENGINEERING. Fourth section contains APPENDICES containing Glossary of terms related to Metallurgical Engineering and Q&A of GATE-2017. This book has been designed to serve as "Hand Book of Metallurgical Engineering" which will be useful for various competitive examinations for recruitment in various public sector & Private Sector companies as well as for GATE Examination. Question have been arranged subject wise and answers are given at the bottom of the page.

Environmental Engineering Diploma & Engineering MCQ Cambridge University Press

Contains two sections - descriptive and question bank sections. The descriptive part of the book contains concise and focused treatment of the different sub-disciplines of Geology. The book covers all the major topics in Geology, with an emphasis on the geology of India; contains more than 1400 objective type questions with answers; and presents solved GATE papers from the last 5 years.

Chemical Process Technology I K International Pvt Ltd

Optimization is used to determine the most appropriate value of variables under given conditions. The primary focus of using optimisation techniques is to measure the maximum or minimum value of a function depending on the circumstances. This book discusses problem formulation and problem solving with the help of algorithms such as secant method, quasi-Newton method, linear programming and dynamic programming. It also explains important chemical processes such as fluid flow systems, heat exchangers, chemical reactors and distillation systems using solved examples. The book begins by explaining the fundamental concepts followed by an elucidation of various modern techniques including trust-region methods, Levenberg-Marquardt algorithms, stochastic optimization, simulated annealing and statistical optimization. It studies the multi-objective optimization technique and its applications in chemical engineering and also discusses the theory and applications of various optimization software tools including LINGO, MATLAB, MINITAB and GAMS.

Khanna's Objective Questions in Petroleum Engineering PHI Learning Pvt. Ltd.

Ceramic Technology is a simple e-Book for Ceramic Technology Diploma & Engineering Course Revised Syllabus in 2018, It contains objective questions with underlined & bold correct answers MCQ covering all topics including all about the latest & Important about, Engineering Physics, Engineering Drawing/Graphics, Computer Programming and Utilization, Environmental Conservation and Hazard Management, Engineering Mathematics, Applied Chemistry, Basics of Mechanical Engineering, Ceramic Materials, Workshop (Practical), Advanced Chemistry, Fundamentals of White Ware, Fundamentals of Refractory, Fuels and Furnaces, Management, Glass, Industrial Management, Applied Ceramics, Quality Control, Industrial Training and lots more.

The Quest for Artificial Intelligence Manoj Dole

"Microbiology covers the scope and sequence requirements for a single-semester microbiology course for non-majors. The book presents the core concepts of microbiology with a focus on applications for careers in allied health. The pedagogical features of the text make the material interesting and accessible while maintaining the career-application focus and scientific rigor inherent in the subject matter. Microbiology's art program enhances students' understanding of concepts through clear and effective illustrations, diagrams, and photographs. Microbiology is produced through a collaborative publishing agreement between OpenStax and the American Society for Microbiology Press. The book aligns with the curriculum guidelines of the American Society for Microbiology."--BC Campus website.

Internal Combustion Engine Fundamentals National Academies Press

This text, by a leading authority in the field, presents a fundamental and factual development of the science and engineering underlying the design of combustion engines and turbines. An extensive illustration program supports the concepts and theories discussed.

Multiple Choice Questions on Renewable Energy John Wiley & Sons

A comprehensive study guide divided into four distinct sections, each representing a section of the official GMAT.

Khanna's Multichoice Questions & Answers in Metallurgical Engineering Bradley Dowden

Multiple Choice Questions on Oil, Gas and Petrochemicals includes over 1500 questions covering the the exploration of oil and gas, refining of oil, natural gas and petrochemical sectors. The book is useful for students pursuing their Bachelor's or Master's Degree in petroleum exploration and for the professionals working in upstream, midstream and downstream sector of oil and gas. The book would also be used by various academic institutions and libraries.
