Studies and Reviews Bloomsbury Publishing

Sardinia, one of the great prizes of the Mediterranean, was fought over by the Phoenicians, Romans, Arabs, Spanish and Austrians before ending up as part of the unified Italy. It bears traces of all these cultures - plus thousands of prehistoric

stone dwellings called nuraghi. These days it is equally popular with the jet set and with rock climbers, sailors, and wind-surfers. With so much going on, you need a detailed guide, and the Eyewitness Travel Guide provides everything you could wish for, from hotel and restaurant recommendations to detailed maps and tips on the best local cheeses. You'll find cutaways and floor-plans of all the major sights, walks, scenic routes and thematic tours. Whether you wish to explore the beautiful old quarter at Alghero or soak-up

some sun on the fashionable beaches of Costa Smeralda, this updated and expanded edition is indispensable. Don't miss a thing on your vacation with the DK Eyewitness Travel guidebook to Sardinia.

The Oligocene and Miocene Epochs comprise the most important phases in the Cenozoic global cooling that led from a greenhouse to an icehouse Earth. Recent major advances in the understanding and time-resolution of climate events taking place at this time, as well as the proliferation of studies on Oligocene and Miocene shallow-water/neritic carbonate systems, invite us to re-evaluate the significance of these carbonate systems in the context of changes in climate and Earth surface processes. Carbonate systems, because of a wide dependence on the ecological requirements of organisms producing the sediment, are sensitive recorders of changes in environmental conditions on the Earth surface. The papers included in this Special Publication address the dynamic evolution of carbonate systems deposited during the Oligocene and Miocene in the context on climatic and Earth surfaces processes focusing on climatic trends and controls over deposition; temporal changes in carbonate producers and palaeoecology; carbonate terminology; facies; processes and environmental

parameters (including water temperature and production depth profiles); carbonate producers and their spatial and temporal variability; and tectonic controls over architecture. This book is part of the International Association of Sedimentologists (IAS) Special Publications. The Special Publications from the IAS are a set of thematic volumes edited by specialists on subjects of central interest to sedimentologists. Papers are reviewed and printed to the same high standards as those published in the journal *Sedimentology* and several of these volumes have become standard works of reference.

Special Publication Touring Editore
Phoenicia has long been known as the homeland of the Mediterranean seafarers who gave the Greeks their alphabet. But along with this fairly well-known reality, many mysteries remain, in part because the record of the coastal cities and regions that the people of Phoenicia inhabited is fragmentary and episodic. In this magnum opus, the late Brian Peckham examines all of the evidence currently available to paint as complete a portrait as is possible of the land, its history, its people, and its culture.

In fact, it was not the Phoenicians but the Canaanites who invented the alphabet; what distinguished the Phoenicians in their turn was the transmission of the alphabet, which was a revolutionary invention, to everyone they met. The Phoenicians were traders and merchants, the Tyrians especially, thriving in the back-and-forth of barter in copper for Levantine produce. They were artists, especially the Sidonians, known for gold and silver masterpieces engraved with scenes from the stories they told and which they exchanged for iron and eventually steel; and they were builders, like the Bybians, who taught the alphabet and numbers as elements of their trade. When the Greeks went west, the Phoenicians went with them. Italy was the first destination; settlements in Spain eventually followed; but Carthage in North Africa was a uniquely Phoenician foundation. The Atlantic Spanish settlements retained their Phoenician character, but the Mediterranean settlements in Spain, Sicily, Sardinia, and Malta were quickly converted into resource centers for the North African colony of Carthage, a colony that came to eclipse the influence of the

Levantine coastal city-states. An emerging independent Western Phoenicia left Tyre free to consolidate its hegemony in the East. It became the sole west-Asiatic agent of the Assyrian Empire. But then the Babylonians let it all slip away; and the Persians, intent on war and world domination, wasted their own and everyone's time trying to dominate the irascible and indomitable Greeks. The Punic West (Carthage) made the same mistake until it was handed off to the Romans. But Phoenicia had been born in a Greek matrix and in time had the sense and good grace to slip quietly into the dominant and sustaining Occidental culture. This complicated history shows up in episodes and anecdotes along a frangible and fractured timeline. Individual men and women come forward in their artifacts, amulets, or seals. There are king lists and alliances, companies, and city assemblies. Years or centuries are skipped in the twinkling of any eye and only occasionally recovered. Phoenicia, like all history, is a construct, a product of historiography, an answer to questions. The history of Phoenicia is the history of its cities in relationship to each other and to

the peoples, cities, and kingdoms who nourished their curiosity and their ambition. It is written by deduction and extrapolation, by shaping hard data into malleable evidence, by working from the peripheries of their worlds to the centers where they lived, by trying to uncover their mentalities, plans, beliefs, suppositions, and dreams in the residue of their products and accomplishments. For this reason, the subtitle, *Episodes and Anecdotes from the Ancient Mediterranean*, is a particularly appropriate description of Peckham's masterful (posthumous) volume, the fruit of a lifetime of research into the history and culture of the Phoenicians.

Corsica and North Sardinia is a well-established guide to Corsica and the northern region of Sardinia, which together constitute several varied cruising

grounds- from the sometimes exposed and often dramatic bays of Corsica's west coast to the more protected and gentle cruising on its eastern side, to the rich choice of anchorages in the Bouches de Bonifacio and on Sardinia's island-studded north coast. This whole region is justifiably popular with cruising sailors, particularly in the summer season. This fourth edition has been thoroughly revised by the authors, who have spent the past two years exploring the Corsican and Sardinian coastlines on their Bowman 40, Easy Rider. Included are a multitude of new photographs as well as thorough updates to the plans and text. Several marine reserves have been established in the region and the latest restrictions of these are well documented. Corsica and North Sardinia is the ideal guide, either for charter skippers or longer-term cruising sailors who want to make the most of this very special corner of the Mediterranean.

The author of *The Puglian Cookbook* heads to the Italian island of Sardinia for a unique twist on the Mediterranean diet. Sardinia, the isolated and majestic island

off the southwest coast of Italy, has a rich and ancient history as home to different Mediterranean peoples whose customs have intertwined over the centuries. The result is an unparalleled richness of cuisine. The Sardinian Cookbook captures these wonderful flavors, delivering more than 100 easy-to-make recipes that are as healthful as they are delicious. Sardinia is an island of many distinct landscapes and nationalities, from its rugged interior and breathtaking coastline to its diverse blend of Spanish, French, Italian, and Moorish cultures. From myrtle, saffron, and honey to lamb, seafood, and specialty cheeses, Sardinian food features a broad variety of flavors for any occasion. Many traditional Sardinian recipes are simple and straightforward—reflecting the peasant cuisine heavy on legumes, fresh vegetables, olive oil, and bread. However, it is common for Sardinians to celebrate holidays with lavish feasts and special delicacies: suckling pig, lobster, bottarga (Sardinian caviar), and the full-bodied yet natural flavorings of Sardinian sausages. Praise for The Puglian Cookbook “We love that before cranking up the heat at the stove, Todorovska pauses to make sure

we have a deep understanding of the ingredients that are the fundamentals of Puglian cuisine. She writes for the home cook, with no fancy tricks, no hard-to-find ingredients.” —Chicago Tribune “For those who want a taste of excellent, yet different Italian cooking, The Puglian Cookbook is not to be missed.” —Midwest Book Review [Catalog of Mapping](#) BRILL

An exploration of Sardinia's incredibly rich history and culture, which stretches back to the Neolithic period. This book details everyone from the Phoenicians to the Carthaginians and Aragonese who invaded Sardinia, which is covered with some of the most fascinating historical and archaeological sites in Europe - from thousands of nuraghi, Bronze Age towers and settlements, to 'giant's grave' and 'fairy house' tombs. It also holds eccentric festivals, from Barbagia's carnival parade of ghoulish mamuthones, said to banish winter demons, to the death-defying S'Ardia horse race in Sedilo. There are shipwrecks off Cagliari's coast, underwater caves and submerged Roman ruins in addition to ancient castles, churches, undisturbed hilltop villages and 2,000 miles of some of the most beautiful

coastline in the world.

Following the Congress of Vienna in 1815, the 'Congress System' became the primary instrument of diplomacy in Europe. So central was the Austrian Chancellor Metternich to the political-legal Congress System that the period has often been referred to as the 'Age of Metternich'. In this book, Miroslav Šedivý analyses Metternich's policy towards the pre-united Italian states from 1830 to 1848. With an emphasis on geopolitics and international law and drawing attention to the unsettled role of the Italian states within European diplomacy in the period, this book explains why the Italian peninsula never developed into the stable region that Metternich hoped to establish at the heart of the Congress System. Owing to the self-interested policies of some European Powers as well as the larger of the Italian states. Metternich proved unable to bring about 'the transformation of European politics' in Italy. Using a thorough analysis of the role that Italy played in the Congress System and based on extensive research in 18

European archives, this book explains why it was in Italy that the first war broke out after the end of the Napoleonic Wars, an event representing the first brutal blow to the Congress System.

This volume presents an overview of the main hazards affecting karst, including collapse and subsidence phenomena, hydrological hazards and human-induced geohazards. Consideration is also given to the problems of geohazard management in karst. Aimed at providing the reader with worldwide case studies, the contributions cover a range of geological and morphological settings.

Geographically, the fourteen papers discuss very different karst areas, from North America, the Caribbean and Asia to several karst areas in Europe, including the British Isles, Spain, France and Italy.

Interactions Between Aquaculture

and Capture Fisheries Ihw-Verlag

Explores the main issues dealing with interactions between aquaculture and capture fisheries using the existing knowledge at Adriatic basin level. Includes discussions of: local fishing communities (i.e. competition for coastal area use), the impact of aquaculture on local aquatic resources (i.e. genetic pollution, exotic species introduction, pathology spreads), market competition, quality of product, mechanisms to control and prevent competition as well as existing agreements. Also includes three case studies on blue fin tuna, eel and shellfish culture.

Map Link Catalog Penguin

This landmark volume combines classic and revisionist essays to explore the historiography of Sardinia's exceptional transition from an island of the Byzantine empire to the rise of its own autonomous rulers, the iudikes, by the 1000s.

Bulletin of the United States Geological Survey Agate Publishing

Profound changes have occurred in the demography and sociology of Italian fertility since Napoleonic times. Using the statistical system instituted in 1861 with

national unification, Massimo Livi-Bacci provides a systematic and detailed analysis of fertility trends in Italy in the nineteenth and twentieth centuries. He brings to light the main features of the secular decline: its rapid occurrence in the northern and central areas; the widening urban-rural gap; the shaping of social and economic differences; and the late, slow downward trend in the South. Multivariate statistical analysis enables the author to measure the changing relationship between fertility and social or economic phenomena. Historical evidence illustrates the effect on fertility of mass emigration and Fascist policy as well as of social changes such as those in agrarian structure, mobility, and communications. An altered attitude toward procreation is evident in some parts of Italy in the early nineteenth century. The decline becomes apparent in certain northern and central regions in the 1870s and 1880s and it appears at the aggregate national level in the 1890s. Originally published in 1977. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist

of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905. This volume is the fourth in the series. Each contains the papers presented at the annual conferences of the Construction History Society. This volume contains papers on the history and development of concrete construction, on the education of architects, on the development of

scaffolding and roof construction and much more.

[Subject Index of the Modern Works Added to the Library of the British Museum in the Years 1881-1900](#) Imray, Laurie, Norie and Wilson Ltd

Rocky landforms dominate large portions of the world's coast. Cliffs and shore platforms form spectacular landscapes, yet when compared to other landforms they are relatively unstudied with many contemporary controversies dating back to the mid-nineteenth century. The past decade has seen a reinvigoration of research driven by advances in technology that now enable precise measurements of erosion to the micron scale and quantification of wave energy onto and through cliff edifices to be made, as well as being able to directly date rock

surfaces. In order to integrate this diverse range of research this volume's regional approach first integrates the latest data with longstanding theory and then analyses this research through the boundary conditions that exist in each area. The volume brings together the research leaders in the field; includes chapters on nearly all the major rock coasts of the world and identifies future research needs.
