"A must-read for every American who longs to bring sanity to our nation's gun laws," this book debunks the lethal logic behind the myths that have framed the gun control debate (Ariana Huffington, co-founder of HuffingtonPost) The gun lobby's remarkable success in using engaging slogans to frame the gun control debate has allowed it to block lifesaving gun legislation for decades. But is there any truth to this bumper-sticker logic? Dennis Henigan exposes the mythology and misguided thinking at the core of these pro-gun catchphrases, which continue to have an outsized influence on public attitudes toward guns and gun control. He counters the gun lobby's messages by weaving together the most compelling current research and insights drawn from the grim reality of deadly gunfire in our homes and communities. Henigan charts a new path toward ending the American nightmare of gun violence. Pro-Gun Myths Include: "When guns are outlawed, only outlaws will have guns." "An armed society is a polite society." "The only thing that stops a bad guy with a gun is a good guy with a gun." "Gun control doesn't work because criminals don't follow the law." "Gun manufacturers shouldn't be responsible for gun crime, any more than Budweiser is responsible for drunk driving." "We don't need new gun laws. We just need to enforce the ones we have." "Gun control is a slippery slope to complete gun bans."

Reward and recognition programs can be costly and inefficient, and they primarily reward employees who are already highly engaged and productive performers. Worse still, these programs actually decrease employee motivation because they can make individual recognition, rather than the overall success of the team, the goal. Yet many businesses turn to these measures first—unaware of a better alternative. So, when it comes to changing your organizational culture, carrots and sticks don't work! What does work is Dr. Paul Marciano's acclaimed RESPECT model, which gives you specific, low-cost, turnkey solutions and action plans-- based on seven key drivers of employee engagement that are proven and supported by decades of research and practice—that will empower you to assess, troubleshoot, and resolve engagement issues in the workplace: Recognition and acknowledgment of employees' contributions Empowerment via tools, resources, and information that set employees up to succeed Supportive feedback through ongoing performance coaching and mentoring Partnering to encourage and foster collaborative working relationships Expectations that set clear, challenging, and attainable performance goals Consideration that lets employees know that they are cared about Trust in your employees' abilities, skills, and judgment Carrots and Sticks Don't Work delivers the same proven resources and techniques that have enabled trainers, executives, managers, and owners at operations ranging from branches of the United States government to Fortune 500 corporations to twenty-person outfits to realize demonstrable gains in employee productivity and job satisfaction. When you give a little RESPECT you get a more effective organization, with reduced turnover and absenteeism and employees at all levels who are engaged, focused, and committed to succeed as a team. In short, you get maximum ROI from your organization's most powerful resource: its people!

Besides providing a summary of German Infantry tactics of the First World War, this study offers insight into the crucial role of leadership in facilitating doctrinal change during battle. It reminds us that success in war demands extensive and vigorous training calculated to insure that field commanders understand and apply sound tactical principles as guidelines for action and not as a substitute for good judgment. It points out the need for a timely effort in collecting and evaluating doctrinal lessons from battlefield experience. --Abstract.
