A UGC recommended textbook for various commerce graduate programmes like B.Com, BBA, BBM and BBS. Also useful for CA, CS, ICMA, M.Com and MBA. The revised edition of Cost Accounting—Principles and Practice gives students a thorough grounding in cost concepts, cost behaviour, and costing methods. The subject matter has been presented in a student-friendly, systematic and intelligible manner. Every discussion involving conceptual difficulties is immediately followed by a numerical example. A large number of charts and diagrams bring to light finer points of the subject and make it easily comprehensible. The subject matter has been organized on 'first things first' basis to sustain the interest of the students. Additional problems and solutions have been included in the Appendix to help students.

Principles of Accounting is designed to meet the scope and sequence requirements of a two-semester accounting course that covers the fundamentals of financial and managerial accounting. This book is specifically designed to appeal to both accounting and non-accounting majors, exposing students to the core concepts of accounting in familiar ways to build a strong foundation that can be applied across business fields. Each chapter opens with a relatable real-life scenario for today's college student. Thoughtfully designed examples are presented throughout each chapter, allowing students to build on emerging accounting knowledge. Concepts are further reinforced through applicable connections to more detailed business processes. Students are immersed in the "why" as well as the "how" aspects of accounting in order to reinforce concepts and promote comprehension over rote memorization.
