*how our brains make us happy and what we can do to get
happier* White Star Editions

Like fine wine, good tea is a gastronomic delicacy that possesses
a deliciously wide range of aromas and flavors. And, just like an

excellent wine guide, this richly illustrated volume initiates
drinkers into the art of tasting, making, and serving. A careful
examination of 50 grand cru teas—including some of the best-
known varieties available—will give drinkers a new appreciation
of what goes into a cup. A selection of exclusive recipes, along
with advice on pairing tea and food, completes this gorgeous
book—a must-have for anyone who savors this ancient beverage.

The Biology Coloring Book Kram Gallery LLC

Isn't 'odd' just another word for 'special'? Adjust your vision and

see the world through the eyes of a unique little girl in a world too big for her. With pigeons for family and a squirrel for a friend, life for Oddy—all of three inches tall—is plain sailing as she flies on her brother Pikku's back, savours tasty seeds and jumps about in hopes of someday sprouting wings of her own! But what will Oddy do when thrust into the world of ordinary and towering humans? Who is she and where does she really come from? Delve into the fantastical world of Oddbird, in which the normal boundaries between humans and animals are blurred by affection, joy and a dollop of the bizarre!

How Did Whales Get So Big? And Other Curious Questions about Animals, Nature, Geology, and Planet Earth New Page Books

The instant New York Times bestselling book of entertaining, irreverent, and totally accessible illustrated answers to the scientific “questions you had no idea were bugging you all your life” (Fast Company), from the creators of the wildly popular YouTube channel AsapSCIENCE. Why do we get hung over? What would happen if you stopped sleeping? Is binge-watching TV actually bad for you? Why should I take a power nap? In their first-ever book, Mitchell Moffit and Greg Brown, the geniuses behind the YouTube channel AsapSCIENCE, explain the true science of how things work in their trademark hilarious and fascinating fashion. Applying the fun, illustrated format of their addictive videos to topics ranging from brain freeze to hiccups to the science of the snooze button, AsapSCIENCE takes the underpinnings of biology, chemistry, physics, and other hard sciences and applies them to everyday life through quirky and relatable examples that will appeal to both science nerds and those who didn't exactly ace chemistry. This is the science that

people actually want to learn, shared in a friendly, engaging style. “Science is big fun. The ASAP guys get that, and they'll show you—they'll even draw you a diagram” (Bill Nye, “The Science Guy”). And amid the humor is great information and cocktail conversation fodder, all thoughtfully presented. Whether you're a total newbie or the next Albert Einstein, this guide is sure to educate and entertain...ASAP.

Great Scientists Scribe Publications

An exploration of one of the most universal human obsessions charts the rise of longevity science from its alchemical beginnings to modern-day genetic interventions and enters the world of those whose lives are shaped by a belief in immortality.

Unlocking the Power of Sleep and Dreams Authentic Media Inc

In fewer than fifty years video games have become one of the most popular forms of entertainment. But which are the best games, the ones you must play? Tony Mott, editor of popular gaming magazine Edge, presents 1001 of the best video games from around the world, from Donkey Kong to Doom, and from Frogger to Final Fantasy. Covering everything from old favourites to those breaking new ground, these are the games that should not be missed.

The World's Weirdest Places Simon & Schuster

From Stacy McAnulty, author of the funny STEM picture book *Earth! My First 4.54 Billion Years* and *Our Universe* series, comes the beginning of an exciting new picture book series focused on the science of the body. Brains. 78% water, 100% delicious. A zombie chef who has sworn off eating brains salivates over this super powerful organ in this funny and fact-filled picture book. From learning about how the brain processes messages from our

five senses, to learning why wrinkly human brains are so much more powerful than smooth mouse brains, this is a hilarious introduction to the organ that does it all. Rich with kid-friendly facts and beautifully brought to life by Matthew Rivera, this is a charming and irresistible picture book.

Answers to the World's Weirdest Questions, Most Persistent Rumors, and Unexplained Phenomena Springer Science & Business Media

There are 196 countries on earth and none of them use purple on their national flag! What's wrong with purple? It's such a popular color today. Why would no country want it on their flag?

Sometimes the simplest questions have the most extraordinary answers! This is the incredible true story of purple! Take a journey back to a time when purple dye was worth more than gold, diamonds or castles. This book was inspired by our original animation that has gone viral across the world. We decided to expand the story and enhance the art. Our mission is to make learning fun and to teach ideas that you won't necessarily find in a classroom.

ACSM's Metabolic Calculations Handbook Harper Collins
The international bestseller – an enthralling exploration of the how and why behind the science of happiness. We all know what it feels like to be happy, but what mechanisms inside our brains trigger such a positive emotion? What does it really mean to be happy, and why can't we feel that way all of the time?

Psychologists and neuroscientists have been studying negative emotions for decades, but until recently few have focused on the subject of happiness. Now, in *The Science of Happiness*, leading science journalist Stefan Klein ranges widely across the latest

frontiers of neuroscience and psychology to explain how happiness is generated in our brains, what biological purpose it serves, and the conditions required to foster 'the pursuit of happiness'. A remarkable synthesis of a growing body of research that has not been brought together before, *The Science of Happiness* is, ultimately, a book that helps us understand our own quest for happiness and is certain to help make you happier.

Tricks and Puzzles Henry Holt and Company (BYR)

Discovery Channel host and acclaimed writer Jay Ingram helps you find the answers to questions you've never really settled, like "What is déjà vu?" "Why do we blink?", "Why are yawns contagious?" and the perennial "Do we really use only 10% of our brains?" Note that this book is a combined and abridged edition of *The Science of Why* and *The Science of Why2*. Have you ever wondered if people really do weird things during the full moon? How about whether fingernails grow faster than toenails? And do we really dream in color? Jay Ingram is here to put these and many other long-lived scientific uncertainties to rest in this whimsically illustrated guide to the science of everyday life.

Combining the wit of *What If?* by Randall Munroe and the accessible science smarts of *ASAP Science*, this new collection features answers to common queries with part sections that address the supernatural, the human body, the animal kingdom, the natural world, and more. It includes fun facts, myth busters and line drawings, all with the end goal of delighting and surprising your inner science geek. Whether these questions have been on your mind constantly, or occasionally resurface like the myth of Loch Ness (Is it real?), whether they're silly (Why does my pee smell like asparagus?) or serious (Why does time speed

up as I age?) or just plain frustrating (Why do mosquitoes love me?), Ingram will settle them once and for all.

Tea Sommelier Courier Corporation

A black hole isn't really a hole . . . is it? Get ready to S-T-R-E-T-C-H your mind with this beloved and best-selling science book. Updated with an all-new chapter about the first black-hole image ever! What are black holes, what causes them, and how the heck did scientists discover them? Acclaimed STEM writer Carolyn DeCristofano's playful text shares how astronomers find black holes, introduces our nearest black-hole neighbors, and provides an excellent introduction to an extremely complex scientific topic. Gorgeous space paintings supplement real telescopic images, and funny doodles and speech bubbles keep the content light and fun.

Over 150 Curious Questions and Intriguing Answers W. W. Norton & Company

The shocking truth of plastic's impact on our planet -- and what we can do about it. The data is in and it's bad. We create and throw away too much plastic, and it is killing our planet. However, too many people have very little idea about just how far this problem reaches, and those who do know feel helpless with the enormity of the task at hand. To fill this void and provide some hope is Rachel Salt's simple and transformative book, *The Plastic Problem*. As a producer for the award-winning and wildly popular YouTube channel *AsapSCIENCE*, Salt is accustomed to taking big, complicated concepts and translating them into entertaining and easy-to-understand segments. She applies the same methodology to *The Plastic Problem*. The result is a critically important book that will change the lives of those who read it.

Never before has the problem been presented in such an impactful way. Readers of any age will emerge from this book with a thorough understanding of the problem, its individual and global impacts, and -- most importantly -- hope for the future. In 18 bite-sized chapters, *Salt* walks readers through the invention and globalized creation of plastic, its impacts and uses in our day-to-day lives, and its importance to the larger global economy. She then examines the how and why of what makes plastic so harmful to our planet and, just in case there was any doubt, *Salt* reinforces this danger by providing chapters on the planet-choking results of our plastic habit -- including the fact that there is almost certainly, plastic floating inside each and every person in the world. *Salt* finishes this vital book with a message of hope. All is not lost. We can make changes -- both at home and on a global scale. Big changes are already happening. If you want to be an actor and help change the future, *The Plastic Problem* is the best place to start. "Plastic kills. Breaking our plastic addiction is a matter of survival for humans and it impacts every creature on Earth to the deepest part of the ocean. With clear, concise prose and illustrations, *The Plastic Problem* navigates a way through this plastic mess we've found ourselves in." -- Erich Hoyt, author of *Encyclopedia of Whales, Dolphins and Porpoises*, *Orca: The Whale Called Killer and Creatures of the Deep*; Research Fellow, Whale and Dolphin Conservation; Co-chair, IUCN Marine Mammal Protected Areas Task Force

AsapSCIENCE Answers to the World's Weirdest Questions, Most Persistent Rumors, and Unexplained Phenomena Simon and Schuster

A Short Biography Simon and Schuster

A preliminary sketch, intended to acquaint the reader with the outlines of the Imam's life and the main aspects of his person as an Islamic leader of exceptional stature. Thanks to al-islam.org - islamicmobility.com Published by: The Institute for Compilation and Publication of Imam Khomeini's Works This book is one of the many Islamic publications distributed by Ahlulbayt Organization throughout the world in different languages with the aim of conveying the message of Islam to the people of the world.

Ahlulbayt Organization (www.shia.es) is a registered Organization that operates and is sustained through collaborative efforts of volunteers in many countries around the world, and it welcomes your involvement and support. Its objectives are numerous, yet its main goal is to spread the truth about the Islamic faith in general and the Shia School of Thought in particular due to the latter being misrepresented, misunderstood and its tenets often assaulted by many ignorant folks, Muslims and non-Muslims. Organization's purpose is to facilitate the dissemination of knowledge through a global medium, the Internet, to locations where such resources are not commonly or easily accessible or are resented, resisted and fought! In addition, For a complete list of our published books please refer to our website (www.shia.es) or send us an email to info@shia.es

The Complete Guide to Absolutely Everything (Abridged):

Adventures in Math and Science Simon and Schuster

"[A] solid how-to book...For amateur dream researchers, this is a must." WHOLE EARTH REVIEW This book goes far beyond the confines of pop dream psychology, establishing a scientifically researched framework for using lucid dreaming--that is,

consciously influencing the outcome of your dreams. Based on Dr. Stephen LaBerge's extensive laboratory work at Stanford University mapping mind/body relationships during the dream state, as well as the teachings of Tibetan dream yogis and the work of other scientists, including German psychologist Paul Tholey, this practical workbook will show you how to use your dreams to: Solve problems; Gain greater confidence; improve creativity, and more. From the Paperback edition.

Answers to the World's Weirdest Questions, Most Persistent Rumors, and Unexplained Phenomena Watkins Media Limited

Encompassing nature, science, art, architecture, and spirituality, and illustrated with over 700 photographs and line drawings, "The Hidden Geometry of Life" illuminates the secret underpinnings of existence. In her trademark easy-to-understand style, mathematician Karen French shows how sacred geometry permeates every level of being, manifesting itself in simple shapes and numbers, music and sounds, light and color, even in the mysteries of creation itself. But these geometrical archetypes are more than the building blocks of reality: they are gateways to profound new levels of awareness.

Wack Simon and Schuster

Diary of a Wimpy Kid meets Percy Jackson in *Odd Gods*, the first book in a hilarious illustrated series about the most unlikely, unusual Gods ever to grace the halls of Mount Olympus Middle School. Oddonis may be the son of Zeus, but he's a little bit...odd for a God. He's so odd, in fact, he's not sure if he has any powers at all. And if that isn't enough, his twin brother Adonis is the most popular, most athletic, and most otherworldly handsome God of

them all. Odonis's future at Mount Olympus Middle isn't looking bright, especially when he makes the last-minute decision to run against Adonis to be class president. With the help of his friends Mathena (Goddess of math and poultry), Germes (God of all things sniffing and snotty), Puneous (the smallest God of them all), and Gaseous (enough said?), Odonis is determined to win the race, prove that his friends are as good as any Greek God, and maybe, just maybe, find out what his true powers really are. Read the hilarious new adventures of Odonis and his friends from debut children's authors David Slavin and Daniel Weitzman, filled with dozens of black-and-white illustrations by award-winning artist Adam Lane.

101 Amazing Facts About The Human Body Puffin

A whirlwind romp through everyday science, perfect for fans of How Stuff Works, Stuff You Should Know and Netflix's Explained. In this quirky and endlessly surprising book, scientist and award-winning YouTuber Dr. Mai Thi Nguyen-Kim tells us about the amazing science behind everyday things (like drinking water,) and not-so-everyday things (like space travel and baby dinosaurs). Come along for the ride of a lifetime! Perfect for armchair scientists: a wide range of information means readers will never get bored. Told over the course of a single day: Mai shows the scientific reactions that occur from morning to bedtime. Quirky illustrations: break up the text and help readers visualize scientific reactions. Surprising facts: learn why an alarm clock triggers fight-or-flight, what alcohol does to our bodies (and minds), and the science behind the term "love drunk" (plus so much more). See the world in a new way: Mai shows us that science is behind everything we do and feel. Accessible and fun:

Mai shows us that we don't have to be scientists to think like one. Chemistry for Breakfast turns the ordinary into extraordinary, explaining everything from heat conduction to expiration dates, with a side of states-of-matter and biological clocks. With Mai as your guide, you'll find something fascinating in everything around you. (You'll also sound smarter at dinner parties.)

The Book of Immortality Bvrning Qvestions LLC

Katie was a normal American teenager when she decided to explore the possibility of voluntary work overseas. She temporarily 'quit life' to serve in Uganda for a year before going to college. However, returning to 'normal' became impossible and Katie 'quit life' - college, designer clothes, her little yellow convertible and her boyfriend - for good, remaining in Uganda. In the early days she felt as though she were trying to empty the ocean with an eyedropper, but has learnt that she is not called to change the world in itself, but to change the world for one person at a time. By the age of 22 Katie had adopted 14 girls and founded Amizima Ministries which currently has sponsors for over 600 children and a feeding program for Uganda's poorest citizens - so it is no wonder she feels Jesus wrecked her life, shattered it to pieces, and put it back together making it more beautiful than it was before.

These are the Ways the World Will End-- Penguin

A SUNDAY TIMES BESTSELLER From the creators of the wildly popular YouTube channel AsapSCIENCE comes a book about the science that people actually want to learn, presented in a quirky and accessible way. And in the spirit of science, no subject is taboo. Why do we get hungover? Which actually came first, the chicken or the egg? Is binge-watching TV bad for you? Now, for

the first time, Mitchell Moffit and Greg Brown, the geniuses behind AsapSCIENCE and AsapTHOUGHT, answer these questions by explaining the true science of how things work in this fascinating and hilarious book. Applying the fun, illustrated format of their addictive videos to topics ranging from brain freeze to hiccups to the science of the snooze button, AsapSCIENCE is the book that answers the questions you were too afraid to ask in science class. Whether you're a total science newbie or the next Albert Einstein, this guide is sure to educate and entertain ... ASAP. PRAISE FOR MITCHEL MOFFIT AND GREG BROWN 'Written by the two blokes who do the vids for the very

addictive AsapSCIENCE YouTube channel, a bunch of brilliant content that'll keep you hooked for hours. This book is a wonderful companion.' The Daily Telegraph 'Be educated and entertained by this quirky book, which unites baffling questions and their surprising answers.' The Observer
1001 Video Games You Must Play Before You Die Simon and Schuster
