MRCPsych Paper B: 600 MCQs and EMIs JP Medical
 The past decade has seen several revisions to the MRCPsych examinations but the latest changes have been the most radical. It is now a three part written examination along with a clinical assessment of skills and competencies. This has changed the focus of the 'new' MRCPsych Paper I, which now includes two thirds 'one-best-item-from-five' multiple choice questions (MCQs). This collection of 'one-best-item-from-five' style multiple choice questions mirrors the new format for the exam. Its companion volume Extended Matching Items for the MRCPsych Examinations Part 1 by Michael Reilly and Bangaru Raju remains relevant for the new format where EMIs make up one third of the questions. Together, these two guides thoroughly prepare you for the revised format, incorporating the new areas of study such as basic ethics, philosophy and history of psychiatry, and stigma and culture. With varying degrees of question difficulty, a wide-range

of styles and topics, and full explanations of answers overleaf, MRCPsych Paper I One-Best-Item MCQs is ideal for examination preparation and self-study.

Get Through MRCPsych Paper B Radcliffe Publishing

Completely up to date with the latest examination changes, Get Through MRCPsych: MCQs for Paper 2 contains 350 'best answer 1 of 5' multiple choice questions (MCQs) presented in a format closely matching the new syllabus. Modelled on actual exam questions so that they accurately reflect the style and level of difficulty, candidates can test and assess their knowledge aiding thorough exam preparation. Providing useful revision advice on question comprehension and answer strategies, candidates can feel fully prepared when they enter the examination room.

Featuring an invaluable collection of revision MCQs and detailed explanatory answers referenced to major journals and specialist textbooks, Get Through MRCPsych: MCQs for Paper 2 is the essential revision book for trainee psychiatrists.

The New MRCPsych Paper III Practice MCQs and EMIs Oxford University Press, USA

A study guide for candidates of the Fellowship of the Royal College of Surgeons examination. Contains revision notes, MCQs and SBAs.

Postgraduate Orthopaedics Springer Science & Business Media

This new revision guide with over 1500 questions, reasoned answers and links to explanatory text gives a comprehensive range of multiple choice questions (MCQs) and extended matching items (EMIs). Complete with sample papers, this book provides everything you need for the written parts of the MRCPsych and comparable higher postgraduate examinations in psychiatry. Contains over 550 MCQs and 350 EMIs divided into syllabus topics Includes full-length sample exam papers for Parts 1, 2 and 3 of the MRCPsych Challenging questions written to bring out key learning points Full, detailed answers and links to revision and remediation Prepared by experienced teachers and writers of examination questions This book is essential for all psychiatrists preparing for the written MRCPsych and similar examinations, allowing candidates to approach the exam with confidence.

Disha Psychiatric care

As the first revision text aimed specifically at the Knowledge-Based Assessment, Essential Revision Notes for Cardiology KBA is the cornerstone of your revision for this new and compulsory examination. Each chapter exactly maps the core cardiology training curriculum, giving measurable assurance that you are getting the information you need to pass. Each chapter is written by a senior cardiology trainee in collaboration with a senior consultant who has expertise in that specific field, ensuring that the content is both authoritative and accessible. Drawing on the latest guidelines and documents, the concise, bullet-pointed layout allows easy access to and digestion of the key points you'll need during revision. Numerous tables, boxes and figures make this the ideal accompaniment to retaining the large and varied amount of information needed to pass the examination.

New MRCPsych Paper II Mock MCQ Papers CRC Press

Fundamentals of Air Pollution, Second Edition discusses the basic chemistry, physics, and engineering of air pollution. This edition explores the processes and equipment that produce less pollution in the atmosphere. This book is comprised of six parts encompassing 28 chapters. This text starts with an overview of the predominant air pollution problems during the Industrial Revolution, including smoke and ash produced by burning oil or coal in the boiler furnaces of power plants, marine vessels, and locomotives. This edition then explores the mathematical models of atmospheric transport and diffusion and discusses the air pollution control in communities. Other chapters deal with atmospheric chemistry, control technology, and visibility through the atmosphere. This book further examines the regulatory concepts that have become more significant, such as the bubble concept, air quality, emission standards, and the trading and banking of emission rights. Air pollution scientists, atmospheric scientists, ecologists, engineers, educators, researchers, and students will find this book extremely useful.

FRCS General Surgery Viva Topics and Revision Notes CRC Press

Proper design of printed circuit boards can make the difference between a product passing emissions requirements during the first cycle or not. Traditional EMC design practices have been simply rule-based, that is, a list of rules-of-thumb are presented to the board designers to implement. When a particular rule-of-thumb is difficult to implement, it is often ignored. After the product is built, it will often fail emission requirements and various time consuming and costly add-ons are then required. Proper EMC design does not require advanced degrees from

universities, nor does it require strenuous mathematics. It does require a basic understanding of the underlying principles of the potential causes of EMC emissions. With this basic understanding, circuit board designers can make trade-off decisions during the design phase to ensure optimum EMC design. Consideration of these potential sources will allow the design to pass the emissions requirements the first time in the test laboratory. A number of other books have been published on EMC. Most are general books on EMC and do not focus on printed circuit board design. This book is intended to help EMC engineers and design design. This book engineers understand the potential sources of emissions and how to reduce, control, or eliminate these sources. This book is intended to be a 'hands-on' book, that is, designers should be able to apply the concepts in this book directly to their designs in the real-world.

MRCPsych CASC: 150 Clinical Scenarios CRC Press

MRCPsych Paper B: 600 MCQs and EMIs offers the most up-to-date and comprehensive collection of practice questions for trainees preparing for the new MRCPsych Paper B. Questions are mapped to the syllabus to deliver structured revision in all the key topics, allowing readers to focus on areas of weakness.

Featuring a wealth of practice questions and answers, this book is an essential revision tool to maximise the chances of exam success.

The State of the World's Land and Water Resources for Food and Agriculture Lippincott Raven

First FRCR Anatomy: Mock Papers offers the most up-to-date and comprehensive coverage of practice cases for trainees preparing for the First FRCR Anatomy exam. Chapters presented as 15 complete mock papers, covering the full range of imaging modalities. Featuring a wealth of practice cases covering all the key topics, this book provides the essential revision tool to maximise chances of exam success. Key Points 300 high quality images, reflecting the breadth of topics encountered in the actual exam 15 mock papers to enable trainees to practice and improve exam technique Highly illustrated to simplify complex anatomy and improve understanding Edited by highly experienced radiological anatomist, Professor Jamie Weir Complements First FRCR Anatomy: Practice Cases - the complete FRCR Anatomy revision package

PCB Design for Real-World EMI Control CRC Press

The third edition of Postgraduate Orthopaedics has been fully updated, revised and expanded to meet the challenges of a continually changing exam format, providing detailed core orthopaedic knowledge and insight into tactics and pre-exam planning to increase a candidate's chance of success. Written by a core of authors chosen specifically for their knowledge of the key factors for exam success, this edition includes more illustrations and diagrams and additional exam-focused material for the trickier areas of the syllabus. The trauma chapter has been separated into four distinct sections to improve the overall trauma content. The book also includes a dedicated chapter on what books to read, reflecting the fact that this area has become more complicated in recent years, and an applied basic science chapter, which focuses on basic science viva questions in detail. This guide continues to evolve and has established itself as the definitive text for the FRCS (Tr & Orth) exam.

First FRCR Anatomy CRC Press

The State of the World's Land and Water Resources for Food and Agriculture is FAO's first flagship publication on the global status of land and water resources. It is an 'advocacy' report, to be published every three to five years, and targeted at senior level decision makers in agriculture as well as in other sectors. SOLAW is aimed at sensitizing its target audience on the status of land resources at global and regional levels and FAO's viewpoint on

appropriate recommendations for policy formulation. SOLAW focuses on these key dimensions of analysis: (i) quantity, quality of land and water resources, (ii) the rate of use and sustainable management of these resources in the context of relevant socio-economic driving factors and concerns, including food security and poverty, and climate change. This is the first time that a global, baseline status report on land and water resources has been made. It is based on several global spatial databases (e.g. land suitability for agriculture, land use and management, land and water degradation and depletion) for which FAO is the world-recognized data source. Topical and emerging issues on land and water are dealt with in an integrated rather than sectoral manner. The implications of the status and trends are used to advocate remedial interventions which are tailored to major farming systems within different geographic regions.

Get Through MRCPsych Paper A2 CRC Press

Thoroughly updated for its Third Edition, this popular quick-reference handbook remains a staple for medical students on psychiatric rotations as well as psychiatric residents and practitioners. In an easy-to-scan outline format, the book presents the etiology, epidemiology, clinical characteristics, and treatment of all psychiatric disorders. Additional chapters cover the psychiatric examination, special populations, psychotherapy, biological therapies, medication-induced movement disorders, legal issues, and laboratory tests. The book is replete with tables and includes color photographs of psychiatric drugs. Each chapter ends with suggestions for further reading, which include cross-references to specific page numbers in Kaplan and Sadock's *Comprehensive Textbook of Psychiatry, Seventh Edition*.

Revision Notes in Psychiatry, Third Edition CRC Press

Constructing test items for standardized tests of achievement, ability, and aptitude is a task of enormous importance. The interpretability of a test's scores flows directly from the quality of its items and exercises. Concomitant with score interpretability is the notion that including only carefully crafted items on a test is the primary method by which the skilled test developer reduces unwanted error variance, or errors of measurement, and thereby increases a test score's reliability. The aim of this entire book is to increase the test constructor's awareness of this source of measurement error, and then to describe methods for identifying and minimizing it during item construction and later review. Persons involved in assessment are keenly aware of the increased attention given to alternative formats for test items in recent years. Yet, in many writers' zeal to be 'curriculum-relevant' or 'authentic' or 'realistic', the items are often developed seemingly without conscious thought to the interpretations that may be garnered from them. This book argues that the format for such alternative items and exercises also requires rigor in their construction and even offers some solutions, as one chapter is devoted to these alternative formats. This book addresses major issues in constructing test items by focusing on four ideas. First, it describes the characteristics and functions of test items. A second feature of this book is the presentation of editorial guidelines for writing test items in all of the commonly used item formats, including constructed-response formats and performance tests. A third aspect of this book is the presentation of methods for determining the quality of test items. Finally, this book presents a compendium of important issues about test items, including procedures for ordering items in a test, ethical and legal concerns over using copyrighted test items, item scoring schemes, computer-generated items and more.

MCQs for ENT Oxford University Press

Completely up to date with the latest examination changes, *Get Through MRCPsych: MCQs for Paper 1* contains 640 'best answer

1 of 5' multiple choice questions (MCQs) presented in a format closely matching the new syllabus. Modelled on actual exam questions so that they accurately reflect the style and level of difficulty, candidates can test and assess their knowledge aiding thorough exam preparation. Providing useful revision advice on question comprehension and answer strategies, candidates can feel fully prepared when they enter the examination room.

Featuring an invaluable collection of revision MCQs and detailed explanatory answers referenced to major journals and specialist textbooks, *Get Through MRCPsych: MCQs for Paper 1* is the essential revision book for trainee psychiatrists.

Kaplan & Sadock's Pocket Handbook of Clinical Psychiatry
Elsevier Health Sciences

MCQs for ENT: Specialist Revision Guide for the FRCS is a key resource for candidates preparing to sit the FRCS (ORL-HNS). It contains over 300 single best answer questions and over 70 extended matching questions to help candidates prepare for all aspects of ENT they may face in this challenging exam. Written by expert consultants who have succeeded in the exam, this resource provides comprehensive coverage of theory and practice, including new questions on challenging topics such as electroneurography and voice clinic procedures, and questions on rare topics such as oropharyngeal cancers. All answers have full explanations, providing candidates with high-quality self-assessment in order to maximize exam success. Providing a thorough assessment of the reader's ENT knowledge, this is an essential revision book for any candidate facing the FRCS ORL-HNS exam.

Mosby's Manual of Diagnostic and Laboratory Tests - E-Book Elsevier Health Sciences

The structure of the MRCPsych examination has changed significantly. This book is specifically written for the new exam, providing 250 practice best-of-five multiple choice questions (MCQs) and 100 extended matching item (EMI) questions for Paper II. It contains clear, concise answers to questions, along with explanatory notes and further reading for each topic. It gives practical advice on the format and content of the examination and techniques for answering questions. It is comprehensive and authoritative: both authors are members of the Psychiatric Trainees' Committee of the Royal College of Psychiatrists. This is an essential revision aid for candidates sitting Paper II of the MRCPsych examination.

Essential Revision Notes for Cardiology KBA Revision MCQs and EMIs for the MRCPsych

The MRCPsych examinations, conducted by the Royal College of Psychiatrists, are the most important exams for psychiatric trainees to achieve specialist accreditation. Written by authors with recent exam success and edited by the distinguished team behind *Revision Notes in Psychiatry*, *Get Through MRCPsych Paper B: Mock Examination Papers* provides candidates with the most realistic and up-to-date MCQ and EMIs, closely matched to themes appearing most often in the Paper B exam.

MRCPsych Elsevier

Rev. ed. of: *Head and neck surgery and oncology*. 3rd ed. 2003.
The New MRCPsych Paper II Practice MCQs and EMIs Lulu.com
Ear, Nose and Throat (ENT) surgery has traditionally been a difficult and specialised topic in undergraduate medicine and for junior doctors. Many textbooks are too detailed for undergraduate use, or lack self assessment questions to help those wishing to underpin their learning. This concise and easy-to-read self-assessment guide aims to clarify the topic, and find and fill gaps in understanding. The multiple choice questions (MCQs) contained cover all levels of knowledge and the learning objectives of most of the UK medical school curricula, aiding preparation for end of unit, module and final exams for ENT. This

book will be a valuable companion for clinics and teaching sessions and an indispensable revision primer for graduate entry medical curricula. 'An excellent means of preparation for medical undergraduate examinations as gaps in core knowledge are quickly revealed. Further, this text is a good guide for students to identify those subject areas requiring more focused study, especially when time is short.' - From the Foreword by Samir Soma

MCQs for ENT Radcliffe Publishing

The Royal College of Psychiatrists has recently changed the format of its membership examination to adopt multiple choice questions (MCQs). The book of mock MCQ papers includes 650 questions and answers covering all subjects of the Paper II curriculum. It is an essential aid for all candidates preparing for the MRCPsych Paper II, and will also be useful for those revising for the related Paper I and Paper III examinations.
