 You find me on a Tuesday, on my Tuesday trip to town. A note sellotaped to the inside of the jumble-shop window: COMPASSIONATE & TOLERANT OWNER. A PERSON WITHOUT OTHER PETS & WITHOUT CHILDREN UNDER FOUR. A misfit man finds a misfit dog. Ray, aged fifty-seven, 'too old for starting over, too young for giving up', and One Eye, a vicious little bugger, smaller than expected, a good ratter. Both are accustomed to being alone, unloved, outcast – but they quickly find in each other a strange companionship of sorts. As spring turns to summer, their relationship grows and intensifies, until a savage act forces them to abandon the precarious life they'd established, and take to the road. *Spill Simmer Falter Wither* is a wholly different kind of love story: a devastating portrait of loneliness, loss and friendship, and of the scars that are more than skin-deep. Written with tremendous empathy and insight, in lyrical language that surprises and delights, this is an extraordinary and heartbreaking debut by a major new talent

Bringing together contributions from some of the leading experts in the field of Spanish as a Heritage Language, this volume aims to provide an in-depth understanding of current and emerging trends in research and praxis. To this end, the volume is divided into three thematic units. The first unit surveys the study of Spanish heritage speaker bilingualism from a formal/theoretical linguistic point of view. The second unit focuses on issues shaping the current state of affairs in heritage language education. Finally, the third unit maps out future lines of development within heritage language instruction. The wide topical scope within this single volume will undoubtedly provide a valuable resource for researchers, students, and professionals working in different areas of Spanish as a heritage language.

The Oxford Handbook of Deaf Studies in Literacy brings together state-of-the-art research on literacy learning among deaf and hard of hearing learners (DHH). With contributions from experts in the field, this volume covers topics such as the importance of language and cognition, phonological or orthographic awareness, morphosyntactic and vocabulary understanding, reading comprehension and classroom engagement, written language, and learning among challenged populations. Avoiding sweeping generalizations about DHH readers that overlook varied experiences, this volume takes a nuanced approach, providing readers with the research to help DHH students gain competence in reading comprehension.

Neurobiology of Language explores the study of language, a field that has seen tremendous progress in the last two decades. Key to this progress is the accelerating trend toward integration of neurobiological approaches with the more established understanding of language within cognitive psychology, computer science, and linguistics. This volume serves as the definitive reference on the neurobiology of language, bringing these various advances together into a single volume of 100 concise entries. The organization includes sections on the field's major subfields, with each section covering both empirical data and theoretical perspectives. "Foundational" neurobiological coverage is also provided, including neuroanatomy, neurophysiology, genetics, linguistic, and psycholinguistic data, and models. Foundational reference for the current state of the field of the neurobiology of language Enables brain and language researchers and students to remain up-to-date in this fast-

moving field that crosses many disciplinary and subdisciplinary boundaries Provides an accessible entry point for other scientists interested in the area, but not actively working in it – e.g., speech therapists, neurologists, and cognitive psychologists Chapters authored by world leaders in the field – the broadest, most expert coverage available

Language A for the IB Diploma: Concept-based learning Bloomsbury Publishing

Perspectives on Language Assessment Literacy describes how the elements of language assessment literacy can help teachers gather information about when and how to assess learners, and about using the appropriate assessment tools to interpret results in a fair way. It provides highlights from past and current research, descriptions of assessment processes that enhance LAL, case studies from classrooms, and suggestions for professional dialogue and collaboration. This book will help to foster continuous learning, empower learners and teachers and make them more confident in their assessment tasks, and reassure decision makers that what is going on in assessment meets international benchmarks and standards. It addresses issues like concepts and challenges of assessment, the impacts of reflective feedback on assessment, the ontogenetic nature of assessment literacy, the reliability of classroom-based assessment, and interfaces between teaching and assessment. It fills this gap in the literature by addressing the current status and future challenges of language assessment literacy. This book will be of great interest for academics, researchers, and post-graduate students in the fields of language assessment literacy and English language teaching.

Clean energy and fuel storage are often required for both stationary and automotive applications. Some of these clean energy and fuel storage technologies currently under extensive research and development include hydrogen storage, direct electric storage, mechanical energy storage, solar-thermal energy storage, electrochemical (batteries and supercapacitors), and thermochemical storage. The gravimetric and volumetric storage capacity, energy storage density, power output, operating temperature and pressure, cycle life, recyclability, and cost of clean energy or fuel storage are some of the factors that govern efficient energy and fuel storage technologies for potential deployment in energy harvesting (solar and wind farms) stations and onboard vehicular transportation. This Special Issue thus serves the need for promoting exploratory research and development on clean energy and fuel storage technologies while addressing their challenges to practical and sustainable infrastructures.

This book is a detailed examination of social connections to language evaluation with a specific focus on the values associated with both prescriptivism and descriptivism. The chapters, written by authors from many different linguistic and national backgrounds, use a variety of approaches and methods to discuss values in linguistic prescriptivism. In particular, the chapters break down the traditional binary approaches that characterize prescriptive discourse to create a view of the complex phenomena associated with prescriptivism and the values of those who practice it. Most importantly, this volume continues serious academic conversations about prescriptivism and lays the foundation for continued exploration.

Arthur M. Schlesinger, Jr., John Hope Franklin, Daniel Boorstin, C. Vann Woodward, Edmund S. Morgan, Barbara Tuckman, Eric Hobsbawm, Hugh Trevor Roper, Lawrence Stone -- aside from carrying the distinction as some of the most successful and well-respected historians of the twentieth century, these scholars found their lives and careers evolving amid some of the world's pivotal historical moments. Dubbed the World War II Generation, the twenty-two English and American historians chronicled by William Palmer grew up in the aftermath of World War I, went to college in the 1930s as the threats of the Great Depression, Hitler, and Communism loomed over them, saw their careers interrupted by World War II, and faced the prospect of nuclear annihilation. They gained from their experiences the perspective and insight necessary to write definitive histories on topics ranging from slavery to revolution. Engagement with the Past offers biographies of these individuals in the context of their generation's intellectual achievement. Based upon extensive personal interviews and careful reading of their work, Engagement with the Past is a fascinating behind-the-scenes look at a generation of historians and how they helped record and shape modern history.

IB Biology Study Guide: 2014 Edition Oxford University Press

This book examines the UK's response to terrorist communication. Its principle question asks, has individual privacy and collective security been successfully managed and balanced? The author begins by assessing several technologically-based problems facing British law enforcement agencies, including use of the Internet; the existence of 'darknet'; untraceable Internet telephone calls and messages; smart encrypted device direct messaging applications; and commercially available encryption software. These problems are then related to the traceability and typecasting of potential terrorists, showing that law enforcement agencies are searching for needles in the ever-expanding haystacks. To this end, the book examines the bulk powers of digital surveillance introduced by the Investigatory Powers Act 2016. The book then moves on to assess whether these new powers and the new legislative safeguards introduced are compatible with international human rights standards. The author creates a 'digital rights criterion' from which to challenge the bulk surveillance powers against human rights norms. Lord Carlile of Berriew CBE QC in recommending this book notes this particular legal advancement, commenting that rightly so the author concludes the UK has fairly balanced individual privacy with collective security. The book further analyses the potential impact on intelligence exchange between the EU and the UK, following Brexit. Using the US as a case study, the book shows that UK laws must remain within the ambit of EU law and the Court of Justice of the European Union's (CJEU's) jurisprudence, to maintain the effectiveness of the exchange. It addresses the topics with regard to terrorism and counterterrorism methods and will be of interest to researchers, academics, professionals, and students researching counterterrorism and digital electronic communications, international human rights, data protection, and international intelligence exchange.

This comprehensive collection equips readers with a state-of-the-art description of clinical phonetics and a practical guide on how to employ phonetic techniques in disordered speech analysis. Divided into four sections, the manual covers the foundations of phonetics, sociophonetic variation and its clinical application, clinical phonetic transcription, and instrumental approaches to the description of disordered speech. The book offers in-depth analysis of the instrumentation used in articulatory, auditory, perceptual, and acoustic phonetics and provides clear instruction on how to use the equipment for each technique as well as a critical discussion of how these techniques have been used in studies of speech disorders. With fascinating topics such as multilingual sources of phonetic variation, principles of phonetic transcription, speech recognition and synthesis, and statistical analysis of phonetic data, this is the essential companion for students and professionals of phonetics, phonology, language acquisition, clinical linguistics, and communication sciences and disorders.

Emergentist Approaches to Language The Stationery Office

This volume is the first handbook dedicated to language attrition, the study of how a speaker's language may be affected by crosslinguistic interference and non-use. The effects of language attrition can be felt in all aspects of language knowledge, processing, and production, and can offer unique insights into the mind of bilingual language users. In this book, international experts in the field explore a comprehensive range of topics in language attrition, examining its theoretical implications, psycho- and neurolinguistic approaches, linguistic and extralinguistic factors, L2 attrition, and heritage languages. The chapters summarize current research and draw on insights from related fields such as child language development, language contact, language change, pathological developments, and second language acquisition.

Hilaire Barnett's Constitutional and Administrative Law has consistently provided students with reliable, accessible and comprehensive coverage of the Public Law syllabus. Mapped to the common course outline, the Fifteenth edition equips students with a thorough understanding of the UK constitution's past, present and future by analysing and illustrating the political and socio-historical contexts that have shaped the major rules and principles of constitutional and administrative law, as well as ongoing constitutional reform. This edition has been fully updated throughout, including a restructure to Chapters 22 and 26, as well as additional pause and reflect sections in order to aid student understanding of this complex area of the law. The online digital content also includes updates to the Multiple Choice Questions, Instructor Test Bank and Web Links. Ideal for students studying constitutional and administrative law for the first time, this is an indispensable guide to the challenging concepts and legal rules in public law.

Bilingual Language Development: The Role of Dominance American Library Association

The abolition of the Regional Development Agencies removed the main source of match funding for ERDF sponsored projects, and the economic downturn has curbed alternative options for match funding even further. There is a pressing need to spend each region's ERDF allocation before 2015, but unless ministers take urgent steps to deliver on the Government's promise to make it easier for projects to secure match funding through the Regional Growth Fund, there is a significant risk that value for money will suffer and ERDF will not make the impact it could to help rebalance the UK's economy. The Committee endorses a number of sensible rule changes that will govern the next ERDF round (2014-20) currently proposed and related proposals to give Member States the power to tailor the size of their Operational Programme areas - which could permit Local Economic Partnerships in England to take responsibility for managing EU funds. MPs also challenge the current allocation system where even the wealthiest Member States receive some ERDF funding when a portion of what they pay in originally gets recycled back to them. The cross party group of MPs calls for this 'circular money flow' to end, and for England to retain this portion of funding to deliver its own regional policy. The Government would have to guarantee the same level of funding across the EU's 7 year funding cycle. This change would not affect the Government's contribution to ERDF for the poorer Member States. Lastly, MPs challenge the Government to evaluate the value for money of ERDF funded projects

The Irish Yearbook of International Law (IYIL) supports research into Ireland's practice in international affairs and foreign policy, filling a gap in existing legal scholarship and assisting in the dissemination of Irish thinking and practice on matters of international law. On an annual basis, the Yearbook presents peer-reviewed academic articles and book reviews on general issues of international law. Designated correspondents provide reports on international law developments in Ireland, Irish practice in international bodies, Ireland and the Law of the Sea and the law of the European Union as relevant to developments in Ireland. In addition, the Yearbook reproduces key documents that reflect Irish practice on contemporary issues of international law. Publication of The Irish Yearbook of International Law makes Irish practice and opinio juris more readily available to governments, academics and international bodies when determining the content of international law. In providing a forum for the documentation and analysis of North-South relations the Yearbook also makes an important contribution to post-conflict and transitional justice studies internationally. As a matter of editorial policy, the Yearbook seeks to promote a multilateral approach to international affairs, reflecting and reinforcing Ireland's long-standing commitment to multilateralism as a core element of foreign policy. The tenth volume of The Irish Yearbook of International Law engages with contemporary issues in international law, raising questions both as to the conceptual underpinnings of international law in relation to the Responsibility to Protect doctrine, and state practice in fields such as Law of the Sea and belligerent occupation, prosecution of war crimes in domestic courts, and the evolving field of international disability law.
