TRISTIN BAILEY

Modi's Textbook of Medical Jurisprudence and Toxicology CBS Publishers & Distributors Private Limited

All high performance organizations have one thing in common: execution. The men and women who work there sustain performance at seemingly otherworldly levels of precision, accuracy, and consistency. In the fifth and final book of Mark Miller's High Performance series, he uses his trademark business fable format to show how any organization can cultivate the kind of everyday habits that yield extraordinary results. Miller tells the story of Blake Brown, a CEO who learns how to help his team to consistently excel at execution from a perhaps unlikely source: his son's high school football coach. The story is fictional, but the principles and practices are very real, derived from years of research led by a team from Stanford University. Miller and his team interviewed leaders and employees from numerous world-class organizations, including the Navy SEALs, Starbucks, Apple, Southwest Airlines, the Seattle Seahawks, Mayo Clinic, Cirque du Soleil, and

more. The lessons learned were then field-tested with over seventy businesses employing over 7,000 people. Miller gives you proven tools to release the untapped potential in your people, create a strong competitive advantage, and win not just on game day but every day.

Modi's Textbook of Medical Jurisprudence and Toxicology Elsevier

Textbook of Forensic Medicine and Toxicology is a comprehensive book for undergraduate students of Forensic sciences. The book comprises chapters on thanatology, deaths from other causes, forensic psychiatry, forensic science, corrosive poisons, irritant poisons, and poisons acting on the brain and spinal cord. In addition, the book consists of several diagrams and illustrations to help understand the concepts better. This book is essential for forensic scientists.

Modi's Textbook of Medical Jurisprudence and Toxicology Berrett-Koehler Publishers
 This is a thoroughly revised, updated and enlarged edition of the popular student-friendly textbook on the subject. Now in full colour, with the addition of a large number of colour pictures and introduction of new literature on the concerned law as well as toxic agents, it is the favourite textbook for MBBS students, as well as a handy reference for the professionals in FMT.

A Text-Book of Medical Jurisprudence and Toxicology Franklin Classics

A Textbook of Medical Jurisprudence and Toxicology John Wiley & Sons

A Textbook of Medical Jurisprudence and Toxicology, Sixth Edition discusses medico-legal points concerning the different causes of death, examination of evidence, and crimes that merit medical attention and advice. The author reviews the legal procedures in criminal courts of medical jurisprudence, including the inquest procedures, the difficulties encountered in detecting crime, medical evidence, rules for presenting evidence, and the powers of criminal courts. The post-mortem examination concerns the external and internal examination of the deceased to establish identity (if unknown), to determine time and cause of death. Under the written orders of the court, an exhumation can take place when suspicions of foul play arises after death. The author discusses death in terms of somatic (physical) or molecular (tissues and cells dying individually after vital organs have stopped functioning). The book also describes in detail the primary modes of dying, namely, syncope, asphyxia, and coma. The book explains the medico-legal aspects of injuries, pregnancy, legitimacy, rape, miscarriage, infanticide, and insanity. This book is intended for medical students, but can also benefit students in law courses, and practitioners of legal

jurisprudence and of the medical sciences.

Forensic Anthropology and Medicine Franklin Classics

Recent political, religious, ethnic, and racial conflicts, as well as mass disasters, have significantly helped to bring to light the almost unknown discipline of forensic anthropology. This science has become particularly useful to forensic pathologists because it aids in solving various puzzles, such as identifying victims and documenting crimes. On topics such as mass disasters and crimes against humanity, teamwork between forensic pathologists and forensic anthropologists has significantly increased over the few last years. This relationship has also improved the study of routine cases in local medicolegal institutes. When human remains are badly decomposed, partially skeletonized, and/or burned, it is particularly useful for the forensic pathologist to be assisted by a forensic anthropologist. It is not a one-way situation: when the forensic anthropologist deals with skeletonized bodies that have some kind of soft tissue, the advice of a forensic pathologist would be welcome. Forensic anthropology is a subspecialty/field of physical anthropology. Most of the background on skeletal biology was gathered on the basis of skeletal remains from past populations. Physical anthropologists then developed an indisputable "know-how"; nevertheless, one must keep in mind that looking for a missing person or checking an assumed identity is quite a different matter. Pieces of information needed by forensic anthropologists require a higher level of reliability and accuracy than those granted in a general archaeological context. To achieve a positive identification, findings have to match with evidence, particularly when genetic identification is not possible.

Modi's Textbook of Medical Jurisprudence and Toxicology Butterworth-Heinemann

Medical Jurisprudence and Toxicology for India covers some essential details and practical aspects of medical jurisprudence and toxicology. This book is organized into two parts encompassing 34 chapters. The opening chapters of Part I deal with legal procedure in criminal courts, physical evidence of the crime, autopsy, exhumation, and some medico-legal practices. Considerable chapters are devoted to other aspects of legal medicine, including determination of death causation, legitimacy of evidence, incident of rape and unnatural offenses, miscarriage, infanticide, insanity, and the privileges of medical men. Part II focuses on the toxicological aspects. This part emphasizes the medico-legal aspects of some classes of poisons, such as corrosive, irritant, neurotic, cerebral, spinal, cardiac, and peripheral poisons. This book will prove useful to medical college students.

For the Use of Medical Students and Practitioners Elsevier India

The book is a comprehensive and authoritative exposition of Forensic Medicine and Toxicology. It provides precise and useful information on relevant legal provisions and forensic anatomy, and promotes interdisciplinary understanding of issues where law and medicine converge. The text is oriented towards the practical problems encountered during day-to-day medicolegal work. About the Author : - Krishnan Vij, MD, L.L.B. is Professor and Head, Department of Forensic Medicine and Toxicology, Government Medical College & Hospital, Chandigarh, India.

A Textbook of Medical Jurisprudence and Toxicology ... Fifth Edition, Etc A Text-Book of Medical Jurisprudence and Toxicology

Forensic Ballistics in Court: Interpretation and Presentation of Firearms Evidence is an accessible introduction to firearms and ballistics evidence and how this is analysed and presented as evidence in a court of law. The book approaches the subject in terms of the realities of case work, opening with a clear and illustrated explanation of the correct nomenclature for various weapon types and their parts. Ammunition is also extensively covered, again with annotated illustrations. Basic external and terminal ballistics, wounding capabilities are likewise covered to give an overview of the subject. A key aspect of the book covers the theory and philosophy behind striation matches and the associated statistics, how positive matches should be peer reviewed and the importance accreditation has on this subject. Gunshot residue formation and identification and the various methods used in its analysis are reviewed in depth. This includes a critical examination of the pros and cons of each type of examination and the evidential weight which can be applied to each method. Accessible and reader-friendly introduction to firearms and ballistics. Clarifies the limitations of firearms evidence. Extensive use of global case-studies throughout. Focus on the interpretation and assessment of the weight of firearms/ballistics evidence presented at court. Covers the importance of witness and accused statements and their interpretation in relation to the investigation under review. Includes coverage of gunshot residue collection, examination and interpretation and the potential for contamination of GSR samples. Includes numerous real life case studies that the author has dealt with over the past 45 years. Takes an applied approach to the subject.

Necrophilia Avichal Publishing Company

Elements of Hygiene and Public Health: For the Use of Medical Students and Practitioners, Second Edition explores India's hygiene and public health status. This book is composed of 24 chapters.

The first four chapters deal with the elements of hygiene, including water, air, ventilation, heating, and cooling. The subsequent chapters discuss industrial hygiene, occupational diseases, offensive trades, hospitals, school hygiene, and some infectious diseases. These topics are followed by surveys of other elements of hygiene and public health, such as food, refuse disposal, and personal hygiene. The remaining chapters tackle the issue of village sanitation, sanitary arrangements for fairs, the chief cause of the spread of cholera in Northern India, and the measures recommended for famine and segregation. This book will prove useful to medical practitioners, sanitary inspectors, health personnel, and medical students.

Complementary Sciences From Recovery to Cause of Death Elsevier

Necrophilia: Forensic and Medico-legal Aspects is the first text that deals with the scientific aspects of necrophilia from a multidisciplinary point of view. After an introduction that provides a general scientific, social, and historical perspective, this volume explores causes and contributing factors, covering biological theories and genetics, *Interpretation and Presentation of Firearms Evidence* CRC Press
