*Medical Case Studies for the Paramedic*  
Jones & Bartlett Learning  
The case study has proved of enduring interest to all Western societies, particularly in relation to questions of subjectivity and the sexed self. This volume interrogates how case studies have been used by doctors, lawyers, psychoanalysts, and writers to

communicate their findings both within the specialist circles of their academic disciplines, and beyond, to wider publics. At the same time, it questions how case studies have been taken up by a range of audiences to refute and dispute academic knowledge. As such, this book engages with case studies as sites of interdisciplinary negotiation, transnational exchange and influence, exploring the effects of forces such as war, migration, and internationalization. Case Studies and the Dissemination of Knowledge challenges the limits of disciplinary-based

research in the humanities. The cases examined serve as a means of passage between disciplines, genres, and publics, from law to psychoanalysis, and from auto/biography to modernist fiction. Its chapters scrutinize the case study in order to sharpen understanding of the genre's dynamic role in the construction and dissemination of knowledge within and across disciplinary, temporal, and national boundaries. In doing so, they position the case at the center of cultural and social understandings of the emergence of modern subjectivities.

### **Trauma Case Studies for the Paramedic** Garland Science

This research report presents a case study of the application of the proposed methodology to Sudan using data captured by the 2014-2015 National Household Budget and Poverty Survey (NHBS). The application of the methodology proposed in the toolkit requires the identification of individuals' characteristics to fit them into specific social groups, and the risks to which each of these categories is exposed. This survey enables the identification of different social groups according to the age, gender and place of residence of the respondents, as well as six risks: a child being out of school, food insecurity, unemployment, insufficient earnings, crop failure and livestock issues, and natural disaster. In conclusion, this study indicates a significant social protection coverage gap in Sudan. Government social protection programmes reach less than 3 per cent of women and men in rural and urban areas. Also government provision of formal social protection makes the smallest contribution to mitigating risks (0.4 per cent) as compared to other sources of protection.

In other words, the benefits currently provided by the government are insufficient to address the risks that affect the population throughout the life cycle, hampering people's livelihoods and the country's development.

*Study Guide for Brunner & Suddarth's Textbook of Medical-Surgical Nursing* Jones & Bartlett Learning

A case-based companion study guide to *Pharmacotherapy Principles and Practice, 2e* - learn how to apply your knowledge to actual patient situations *Pharmacotherapy Principles and Practice Study Guide* uses 98 cases to help you learn how to apply pharmacotherapeutic concepts to specific patient situations. Each case is presented in a consistent manner, similar to what you would see in a clinical setting and focuses on one primary topic or problem. Patients discussed in these cases will have drug therapy problems requiring identification and management. For each case, you will be asked to develop a Patient Database, Drug Therapy Problem Worksheet, and Pharmacotherapy Care Plan using the forms provided. These forms are adapted from those originally developed by the American Society of

Health System Pharmacists Clinical Skills program. Each case includes: Learning Objectives Patient Presentation Targeted Questions followed by a hint that refers you to pages in *Pharmacotherapy Principles and Practice, 2e* where you can find the information to answer the question Follow-up Global Perspective which highlights an issue related to the case that is important to countries outside of North America or involve different ethnic groups or races Case Summary **Study Guide for Pathophysiology - E-Book** Jones & Bartlett Publishers Children are not simply adults. They commonly present with unique problems that are typically not encountered in older patients. These unique problems require the paramedic to alter, to some degree, his or her approach to the sick or injured child. Because a relatively small percentage of EMS calls involve a critically ill or injured child, it is common for the paramedic to experience anxiety when such a call is received. *Pediatric Case Studies for the Paramedic* contains 20 case studies representing a variety of pediatric emergencies that paramedics may encounter in the field.

**Case Studies in Infectious Disease: Streptococcus Pyogenes** F.A. Davis

Pediatric Education for Prehospital Professionals (PEPP), Fourth Edition is an evidence-based resource of essential medical content for the assessment and management of infants and children in the field. This respected and ground-breaking program paired physicians and EMS providers together to ensure the content reflects current best practices and the realities of the field. Developed by the American Academy of Pediatrics, PEPP is designed to give prehospital professionals the knowledge, skills, and confidence they need to effectively assess and manage pediatric patients. PEPP combines world-class content with engaging features and an interactive course to truly prepare prehospital professionals to care for pediatric patients. The Fourth Edition Includes: A new chapter on Behavioral Emergencies A top-flight EMS author team working with AAP physician reviewers to ensure exceptional medical content with a focus on how it is applied in the “streets” New procedures on tourniquet application and intranasal medication administration Features Include: The Pediatric

Assessment Triangle (PAT) represents the essence of the PEPP patient assessment method, which includes assessing appearance, work of breathing, and circulation to the skin. The Patient Assessment Flowchart provides students with an easy-to-understand reference of the pediatric patient assessment process. Case Studies provide an opportunity for students to apply the foundational knowledge presented in the chapter and strengthen their critical-thinking skills. Procedures provide step-by-step explanations and visual summaries of vital BLS and ALS pediatric care skills. Flexible Course Options: PEPP Course Coordinators may offer a 2-day onsite course or a 1-day enhanced hybrid course at the BLS or ALS level. The onsite course features interactive case-based lectures where students apply their knowledge in a safe environment. The hybrid course features case-based online modules with engaging interactivities, including rapid skills demonstration videos that students complete before attending the onsite portion for hands-on skill station coaching and small-group discussions. The BLS-level courses are geared toward emergency

responders and EMTs, while the ALS-level courses are geared toward AEMTs and Paramedics.

**Clinical Cases: Fundamentals of nursing case studies** Jones & Bartlett Publishers

Medical Case Studies for the Paramedic contains 20 case studies representing a variety of medical emergencies that the paramedic may encounter in the field. Each case study begins by presenting dispatch information and a general impression of the patient upon arriving at the scene. Then, as the case progresses, pertinent patient information is provided, interspersed with a series of standardized questions designed to assess the paramedic's ability in correlating specific signs and symptoms with a particular medical condition and providing the appropriate treatment.

*Paramedic: Pharmacology Applications* Jones & Bartlett Learning

Lewis's Medical-Surgical Nursing, Fourth South Asia Edition, is adapted from the 11th edition of Lewis's Medical-Surgical Nursing and provides an authoritative, comprehensive approach to medical-surgical nursing/adult health nursing in a

concise and readable format. Content written and reviewed by leading experts in the field ensures that information is comprehensive, current, and clinically accurate. Key Features Over 800 full-color illustrations (diagrams and photographs) clearly demonstrate disease processes and related anatomy and physiology. Case studies followed by questions to help you put your learning to practical use. Contains exam-oriented questions selected from previous years' exam papers, along with NCLEX questions, to help students prepare for exams. Content mapped and aligned to the revised BSc Nursing syllabus Nearly 60 nursing care plans incorporated within the textbook, focusing on nursing assessment, diagnoses, intervention, and outcome, applying them to nursing practice Several new pathophysiology maps added to the chapters National programs added National Blindness Control Program National Deafness Control Program Indian Transplantation programs Other topics incorporated in the text Eye banking Post heart transplant follow-up management with checklist Nursing management of patients in emergency and disaster

situations Highlights of newly introduced courses, e.g. Nurse Practitioner Midwifery Hospice care in India National Pressure Ulcer Advisory Panel (NPUAP) guidelines for assessment of pressure ulcers Screening for breast cancer and cervical cancer Content on occupational and industrial disorders added Ancillary Content on MedEnact Website Educator Resources TEACH for Nurses lesson plans PowerPoint presentations Image Collection Nursing Care Plans Student Resources Key Points Review Questions Case Studies Answer Keys for Case Studies and Rationales for Bridge to NCLEX Examination questions Nursing Care Plans Social protection coverage - Sudan case study Routledge Basic Life Support Provider: Pediatric Education for Prehospital Professionals (BLS PEPP) is a comprehensive source of prehospital medical information for the emergency care of infants and children. BLS PEPP is designed to give First Responders and EMT-Basics the education, skills, and confidence they need to effectively treat pediatric patients. Developed by the American Academy of Pediatrics, BLS PEPP specifically teaches

prehospital professionals how to better assess and manage ill or injured children. BLS PEPP combines complete medical content with dynamic features and an interactive course to better prepare prehospital professionals for the field. Case Studies in Immunology: Toxic Shock Syndrome Oxford University Press, USA Paramedics must perform a systematic assessment of the patient, determine appropriate treatment, and give it. While assessment and management principles are learned in initial training, they are not practiced until training is completed. Now, paramedic students can apply these principles with Medical Case Studies for the Paramedic. Medical Case Studies for the Paramedic presents 20 case studies on the most important medical emergencies for the ALS-level reader. A superb supplement to classroom and textbook learning, this book allows the reader to practice applying knowledge to cases before actually going on an emergency call. The types of emergencies include a range of presentations such as semiconsciousness, unconsciousness, difficulty breathing, weakness, nausea, headache, slurred speech, chest pain,

allergic reaction, seizure, and anxiety. Each case study is presented in full, poses questions to the reader, and is followed by a summary of the case, including answers to the questions posed. The objectives for each of the case studies in this book are as follows: Describe the appropriate initial management based on initial assessment findings. Interpret the patient's cardiac rhythm, and determine if a correlation exists between the patient's condition and their cardiac rhythm. Formulate a field impression based on the patient's signs and symptoms, and findings of the focused history and physical examination. Determine if the patient's vital sign values and SAMPLE history findings are consistent with your field impression. Identify specific treatment that is required for the patient's condition. Determine if further treatment is required following a post-treatment reassessment of the patient. Based on the patient's condition, identify any special considerations for care.

A Case Study Approach to Patient Care  
Cambridge University Press

Containing detailed and up-to-date case studies on critical care conditions with

accompanying questions and answers for applied learning of the practice of critical care nursing, this resource allows the reader to hone vital skills that are necessary in a critical care environment.

Critical Thinking and Application SAGE Publications

This text is intended to reinforce the importance of a systematic patient assessment and management approach to paramedic students by presenting them with 20 case studies on the most important trauma emergencies they are likely to encounter in the field. emergencies *Pediatric Education for Prehospital Professionals* Jones & Bartlett Learning Pediatric Education for Prehospital Professionals (PEPP), United Kingdom Revised Third Edition represents a comprehensive source of prehospital medical information for the emergency care of infants and children. PEPP is designed to give prehospital professionals the education, skills, and confidence they need to effectively treat pediatric patients. Developed by the American Academy of Pediatrics, PEPP specifically teaches prehospital professionals how to better assess and manage ill or injured children.

PEPP combines comprehensive medical content with dynamic features and an interactive course to fully prepare prehospital professionals to care for children in the field. New to the Revised Third Edition: Meets 2015 CPR and ECC Guidelines The textbook content addresses every pediatric-specific competency statement in the National EMS Education Standards Shock and resuscitation content is covered in two separate chapters, placing more emphasis on these critical topics A top-flight EMS author team working in conjunction with AAP physician reviewers ensures exceptional medical content with a "street" focus A free eBook is included with every printed copy of the Revised Third Edition Features include: The Pediatric Assessment Triangle (PAT) represents the essence of the PEPP patient assessment method, which includes assessing appearance, work of breathing, and circulation to the skin The Patient Assessment Flowchart provides students with an easy-to-understand reference of the pediatric patient assessment process Case Studies provide an opportunity for critical thinking and encourage students to

consider how they would treat a similar case in the field Procedures provide written step-by-step explanations and visual summaries of important BLS and ALS pediatric skills Interactive Course and Flexible Course Options: PEPP Course Coordinators now have the option of offering onsite or hybrid courses The hybrid course includes engaging, interactive online modules that students complete before attending the onsite portion of the course for scenarios and hands-on skill stations The onsite course includes case-based lectures, live-action video, small group scenarios, and hands-on skill stations A new renewal course for providers to keep up-to-date with their skills The BLS course is geared toward Emergency Medical Responders and EMTs, while the ALS course is ideal for AEMTs and Paramedics. What captivates learners and interests them in studying social psychology? In *Case Studies for Teaching Social Psychology*, Tom Heinzen and Wind Goodfriend use brief, entertaining case stories to further enhance the historical context, evolution of, and challenges to major theories within the field. By employing a mix of unique, contemporary research and hallmark studies to illustrate classic concepts, Heinzen and Goodfriend steer students to explore new, meaningful ways of thinking about and connecting with foundational course concepts. In turn, this approach facilitates engaged conversation and deeper critical thinking both in and outside of the classroom.

*A Case-Based Care Plan Approach* Springer Science & Business Media

Now edited by a pulmonologist, the 3rd edition is still one of the most well-written texts for students learning to understand the assessment and treatment of patients with respiratory disease. Each chapter begins with a background of selected disorders, followed by a case study with

questions and answers designed to stimulate critical thinking skills.

*50 Studies Every Intensivist Should Know*

*Trauma Case Studies for the Paramedic* Pharmacologic intervention is a cornerstone of paramedic treatment. *Paramedic: Pharmacology Applications* covers the relevant issues of pharmacology as they relate to the field practice of the paramedic. The text gives students a comprehensive understanding of the indications, contraindications, and side effects of medications, as well as insight into the pathophysiology and etiology of conditions requiring rapid pharmacologic intervention. In addition, progressive case studies are found in each chapter. The cases follow patients from dispatch through delivery to the emergency department and cover every aspect of assessment and treatment. Each case study includes eight critical thinking questions. Important Notice: The digital edition of this book is missing some of the images or content found in the physical edition.

*Case Studies in Critical Care Nursing*

Lippincott Williams & Wilkins

English for Paramedics is a reading book

for doctors and medical students whose mother language is other than English and who need to perfect their language skills and professional knowledge at the same time. In the first volume the cases concern the following topics: airway and breathing assessment; proper interventions for patients with respiratory compromise; oxygen delivery systems; ventilatory support; respiratory anatomy and physiology; basic airway management; basic cardiopulmonary resuscitation; advanced interventions, cardiology, Other casuistics describe medical emergencies (respiratory neurology; endocrinology; allergies/anaphylaxis; gastroenterology; urology; environmental; behavioural; toxicology). Further chapters are devoted to trauma, assessment recognition and treatment of various traumatic injuries still others to gynaecology, obstetrics and paediatrics. The last part of the first volume deals with operations, scene safety; legal considerations; vehicle operations; communications; documentation; infection controlling; quality improvement; DNR; basic patient assessment; basic physiology; hazardous materials; mass casualty incidents; and

scene management. The second volume is divided into 24 units each of which contains about 20 casuistics. These covers the whole area of emergency services but are not grouped according to their subjects which enables to revise the information in a new and discovering manner. Case studies were taken over from materials for self study and testing professional knowledge of future paramedics (see Bibliography). The reading book is suitable for intermediate students but vocabularies at the end of each unit are so detailed than also beginners can use the book and continue in his or her own pace. All texts are short, written in actual language and always contain the right answer (marked with \*). The method of filling in the right answers is not only popular with students but also very efficient in learning new words in context of well known facts. The teachers can find inspiration for further use of casuistics in dialogues and model situations. Some English teachers may find the idea of translating the vocabularies into their own languages interesting which would be a great satisfaction for the author. This reading book will be followed

soon by English for Paramedics Textbook and Exercise book. The author wishes the students a lot of pleasure and success in learning professional medical English. Prague 2014

*Assessment and Management of Clinical Problems, Single Volume* Xlibris Corporation

50 Studies Every Intensivist Should Know presents key studies that have shaped the practice of critical care medicine. Selected using a rigorous methodology, the studies cover topics including: sedation and analgesia, resuscitation, shock, ARDS, nutrition, renal failure, trauma, infection, diabetes, and physical therapy. For each study, a concise summary is presented with an emphasis on the results and limitations of the study, and its implications for practice. An illustrative clinical case concludes each review, followed by brief information on other relevant studies. This book is a must-read for health care professionals and anyone who wants to learn more about the data behind clinical practice. "While clinicians in the intensive care unit increasingly rely on practice guidelines that take into account

the best available published research data, sorting through the studies efficiently, and separating the good from the not-so-good is a daunting task even for seasoned practitioners, much less trainees. This superb effort by Dr. Bittner and his group of extremely accomplished and experienced clinicians is a huge step in the right direction. *50 Studies Every Intensivist Should Know* provides an excellent list of the landmark studies in the arena of critical care medicine and should be required reading for all our residents and critical care fellows." Hasan B. Alam, MD Norman Thompson Professor and Head of General Surgery University of Michigan

*Pediatric Advanced Life Support Provider Manual* Jones & Bartlett Learning

The perfect companion to Brunner & Suddarth's Textbook of Medical-Surgical Nursing, this exemplary study tool helps you better understand the concepts, disease processes, and nursing care detailed in the textbook. Designed to help you review and apply important concepts from the textbook to prepare for exams as well as for your nursing career, each fully revised chapter includes three sections:

Assessing Your Understanding (including fill-in-the-blank, short answer, and matching questions), Applying Your Knowledge (comprised of case-based questions), and Practicing for NCLEX (containing both multiple-choice and alternate-format NCLEX-style questions). An Answer Key is included at the end of the book.

*Pharmacology and the Nursing Process E-Book* W B Saunders Company

Help students make the most of what they've learned in Brunner & Suddarth's Textbook of Medical-Surgical Nursing, 15th Edition, with this easy-to-use study companion. Updated to reflect the latest textbook material, this Study Guide provides everything students need to assess their understanding and practice applying their knowledge, preparing them for success in your class, on the NCLEX® exam, and in nursing practice.

*Critical Care Study Guide* Jones & Bartlett Learning

This new edition of *Classic Case Studies* is the essential selection of case studies and stories that illustrate not only many of the most fundamental tenets of psychology, but also some of the most extreme forms

of human behavior. The human mind is both extraordinary and compelling. From the leader who convinced his followers to kill themselves to the man who lost his memory, these famous accounts have provided invaluable insights for scholars and researchers and amazed the public at large. Brought to life by Rolls, each case is contextualized with more typical behaviour, while the latest thinking in each subfield is also discussed. Revised and updated, the new edition features two new case studies, including the 'Jim Twins' by Thomas Bouchard, an amazing case of twins separated at birth and adopted by different parents, yet when reunited 30 years later shared so many behavioural characteristics. Also featuring a new chapter on approaches, issues and debates, accessibly written and requiring no prior knowledge of psychology, this book is essential reading for A-Level students and undergraduates alike. Geoff Rolls has taught psychology for over 26 years and is currently Head of Psychology at Peter Symonds College, Winchester. He is the author of the popular *Women Can't Park, Men Can't Pack* (Chambers, 2009), which investigates gender stereotypes

(including driving), and also Taking the Proverbial (Chambers, 2007), which well-known proverbs and sayings. .  
explores the psychological truth behind
