Guide to Ph.D. in Law Entrance Examination U of Minnesota Press

Increasingly, modern medicine relies on so called traditional or ancient medical knowledge. Holistic practices such as adhering to proper diet, observing rules for appropriate behavior, and administering medical preparations are coupled with the latest technology and methods to treat the whole patient. In light of this trend, there is much to be gained from understanding of one of the oldest medical systems still in existence. Tibetan Medicinal Plants provides you a detailed analysis of how Tibetan plants are used in this centuries old system. The book opens with a summary of Tibetan medicine and covers the various habitats in which the plants are found. The main part of this volume encompasses 60 monographs listed by the Tibetan plant name. Each monograph consists of several chapters addressing different topics related either to the Tibetan or the Western approach. Most of the monographs contain a description of the macroscopic and microscopic characteristics of the used plant parts, and anatomical features of 76 plants are provided. Each monograph presents an overview of the known chemical constituents and pharmacological properties of each plant and describes their use in Tibetan medicine. In contrast to other publications on Tibetan medicine, where translations of the Tibetan terms are given in other languages, this book treats the Tibetan word as a technical term, keeps the Tibetan term and explains its meaning, lessening confusion by reducing the number of translations. Traditional Tibetan medicine has been in existence for centuries. Curative practices existed in the

prebuddistic era, and the art of healing developed more than 2500 years ago. Tibetan Medicinal Plants provides a comprehensive overview of all plant types, thus making it easier to grasp the Tibetan concept. It gives you a comprehensive look at this centuries old science.

Therapeutic Group Work with Children was first published in 1949. Minnesota Archive Editions uses digital technology to make long-unavailable books once again accessible, and are published unaltered from the original University of Minnesota Press editions. This is an account of two significant projects in therapeutic group work with emotionally disturbed adolescents. In detailed and often dramatic reports of many group sessions, the author provides insight into the use of therapeutic group work methods. In a preface to this second printing, Professor Konopka points out that when the book was first published the use of group therapy in the treatment of delinquent or emotionally disturbed youngsters was quite new. Now, the practice has proved its worth, and the book has become increasingly important as teaching material for social work students, as well as a guide for practicing social workers. It is also helpful to those in other professions who are concerned with the problems of delinquent or disturbed children. The projects described involved a group of delinquent boys under observation by the Minnesota Youth Conservation Commission and a group of emotionally disturbed girls in a child guidance clinic. Through her account, Professor Konopka shows many kinds of situations which arise in group therapy and ways in which they may be handled by a trained social worker. Reviewers have been generous in their appraisal of the book. Saul Bernstein said in Social Work Journal: "We have here a rich gold mine for promoting human adjustment." Harleigh B. Trecker, in Federal Probation,

called it: "a vivid, clear, warm story of social group work in action." There is a new foreword in this printing by Hyman S. Lippman, M.D., director of the Amherst H. Wilder Child Guidance Clinic, St. Paul, Minnesota.
