In the first book to systematically explore the linkages between war and emergency response, Hoffman and Weiss focus on the profound impact of new wars with non-state actors. The authors trace the evolution of the international humanitarian system from its inception in the 1860s through the current challenges cast by recent U.S. military action in Afghanistan and Iraq. By bringing historical perspective to bear on the mechanics of war and humanitarian action, *Sword & Salve* provides an essential analytical framework for grasping the nature of crises and how aid agencies can respond strategically rather than reactively to change. Students will find it a powerful tool for understanding the roles of state and non-state actors in international relations, as well as the panoply of means and ends encompassed by contemporary humanitarianisms.

My Swordhand Is Singing Ignatius Press

Adopted from the Celts in the 1st century BC, the spatha, a lethal and formidable chopping blade, became the primary sword of the

Roman soldier in the Later Empire. Over the following centuries, the blade, its scabbard, and its system of carriage underwent a series of developments, until by the 3rd century AD it was the universal sidearm of both infantry and cavalry. Thanks to its long reach, the spatha was the ideal cavalry weapon, replacing the long gladius hispaniensis in the later Republican period. As the manner in which Roman infantrymen fought evolved, styles of hand-to-hand combat changed so much that the gladius was superseded by the longer spatha during the 2nd century AD. Like the gladius, the spatha was technologically advanced, with a carefully controlled use of steel. Easy maintenance was key to its success and the spatha was designed to be easily repaired in the field where access to a forge may have been limited. It remained the main Roman sword into the Late Roman period and its influence survived into the Dark Ages with Byzantine, Carolingian and Viking blades. Drawing together historical accounts, excavated artefacts and the results of the latest scientific analyses of the blades, renowned authority M.C. Bishop reveals the full history of the development, technology, training and use of the spatha: the sword that defended an empire.

Takuan Sōho's (1573-1645) two works on Zen and swordsmanship are among the most straightforward and lively presentations of Zen ever written and have enjoyed great popularity in both premodern and modern Japan. Although dealing ostensibly with the art of the sword, *Record of Immovable Wisdom* and *On the Sword Taie* are basic guides to Zen—"user's manuals" for Zen mind that show one how to manifest it not only in sword play but from moment to moment in everyday life. Along with translations of *Record of Immovable Wisdom* and *On the Sword Taie* (the former, composed in all likelihood for the shogun Tokugawa Iemitsu and his fencing master, Yagyū Munenori), this book includes an introduction to Takuan's distinctive approach to Zen, drawing on excerpts from the master's other writings. It also offers an accessible overview of the actual role of the sword in Takuan's day, a period that witnessed both a bloody age of civil

warfare and Japan's final unification under the Tokugawa shoguns. Takuan was arguably the most famous Zen priest of his time, and as a pivotal figure, bridging the Zen of the late medieval and early modern periods, his story (presented in the book's biographical section) offers a rare picture of Japanese Zen in transition. For modern readers, whether practitioners of Zen or the martial arts, Takuan's emphasis on freedom of mind as the crux of his teaching resonates as powerfully as it did with the samurai and swordsmen of Tokugawa Japan. Scholars will welcome this new, annotated translation of Takuan's sword-related works as well as the host of detail it provides, illuminating an obscure period in Zen's history in Japan.

One of the most feared weapons in the ancient world, the gladius was lethal both on the battlefield and in the arena. Literary sources tell of the terror it inspired, while archaeological evidence of wounds inflicted is testament to its deadly effect. By pulling together strands of literary, sculptural and archaeological evidence renowned expert M.C. Bishop creates a narrative of the gladius' development, exploring the way in which the shape of the short sword changed as soldiers and gladiators evolved their fighting style. Drawing together historical accounts, excavated artefacts and the results of the latest scientific analyses of the blades, this volume reveals the development, technology, training and use of the gladius hispaniensis: the sword that conquered the Mediterranean.

The search for the legendary Sword of Peter... Two thousand years ago, when the Romans came to arrest Jesus in the Garden of Gethsemane, the disciple Peter cut off the ear of an innocent man. Jesus rebuked Peter and quickly healed the servant's ear - and the Sword of Peter took on supernatural powers. Fast forward to modern day where a Biblical archaeology quest for the Sword of Peter is imperative to both Israel and to the Christian world. It's also a race against others who would possess and use the Sword of Peter for their own purposes, if they find it first. In Summer Lee's second Biblical treasure hunt adventure, Achava, a guardian of sacred artifacts, has her Jewish heritage and her Christian faith. She also has unique DNA from her ancestor, Achsah, who lived during the time of Joshua. Like Samson in the Bible, Achava is capable of exercising supernatural strength, as well as other unusual powers.
