GIOVANNY MATTHEWS

The Paradox of Punishment St. Martin's Press

The Palgrave Handbook of Criminal and Terrorism Financing Law focuses on how criminal and terrorist assets pose significant and unrelenting threats to the integrity, security, and stability of contemporary societies. In response to the funds generated by or for organised crime and transnational terrorism, strategies

have been elaborated at national, regional, and international levels for laws, organisations and procedures, and economic systems. Reflecting on these strands, this handbook brings together leading experts from different jurisdictions across Europe, America, Asia, and Africa and from different disciplines, including law, criminology, political science, international studies, and business. The authors examine the institutional and legal responses, set within the context of both policy and practice, with a view to critiquing these actions on the grounds of effective delivery and compliance with

legality and rights. In addition, the book draws upon the experiences of the many senior practitioners and policy-makers who participated in the research project which was funded by a major Arts and Humanities Research Council grant. This comprehensive collection is a must-read for academics and practitioners alike with an interest in money laundering, terrorism financing, security, and international relations.

Criminal Law Springer

This book offers a historical presentation of how international criminal law has evolved from a national setting to embodying a truly international outlook. As a growing part of international law this

is an area that has attracted growing attention as a result of the mass atrocities and heinous crimes committed in different parts of the world. Çakmak pays particular attention to how the first permanent international criminal court was created and goes on to show how solutions developed to address international crimes have remained inadequate and failed to restore justice. Calling for a truly global approach as the only real solution to dealing with the most severe international crimes, this text will be of great interest to scholars of criminal justice, political science, and international relations. *Criminal Justice, Risk and the Revolt against Uncertainty* Springer

China's Changing Legal System

Springer

This book examines the impact and implications of the relationship between risk and criminal justice in advanced liberal democracies, in the context of the 'revolt against uncertainty' which has underpinned the rise of populist politics across these societies in recent years. It asks what impact the demands for more certainty and security, and the insistence that national identity be reasserted, will have on criminal law and penal policy. Drawing upon contributions made at a symposium held at Victoria University of Wellington, New Zealand in November 2018, this edited collection also discusses the way in which risk has come to inform sentencing practices, broader criminal justice processes and the critical issues associated with this. It also examines the growth and making of new 'risky populations' and the harnessing of risk-prevention logics, techniques and mechanisms which have inflated the influence of risk on criminal justice.

The Palgrave Handbook of Applied Ethics and the Criminal Law Oxford University Press, USA

A recent study estimates that thousands of innocent people are wrongfully imprisoned each year in the United States. Some are exonerated through DNA evidence, but many more languish in prison because their convictions were based on faulty eyewitness accounts and no DNA is available. Prominent criminal lawyer and law professor Abbe Smith weaves together real life cases to show what it is like to champion the rights of the accused. Smith describes the moral and ethical dilemmas of representing the guilty and the weighty burden of fighting for the innocent, including the victorious story of how she helped free a woman wrongly imprisoned for nearly three decades. For

fans of Law and Order and investigative news programs like 20/20, *Case of a Lifetime* is a chilling look at what really determines a person's innocence.

Victim Participation Rights Palgrave MacMillan

This book explores the insights that can be gained by looking at the criminal justice system from an economic point of view. It provides an economic analysis of the institutional structure and function of the criminal justice system, how its policies are formulated, and how they affect behavior. Yet it goes beyond an examination of specific policies to address the broad question of how law influences behavior. For example, it examines how concepts such as the possibility of redemption affect the decisions of repeat offenders, and whether individual responsibility is (or should be) a pre-requisite for punishment. Finally, the book argues that, in addition to the threat of criminal sanctions, law inculcates principles of acceptable behavior among citizens by asserting that certain acts are "against the law." This "expressive function" of law can influence behavior to the extent that at least some people in

society are receptive to such a message. For these people, the moral content of law has more than mere symbolic value, and consequently, it can expand the scope of traditional law enforcement while lowering its cost. Another goal of the book is therefore to use economic theory to assess this dualistic function of law by specifically recognizing how its policies can both internalize an ethic of obedience to the law among some people irrespective of its consequences, while simultaneously threatening to punish those who only respond to external incentives.

Criminal Law Red Globe Press

In a break from the contemporary focus on the law's response to inter-racial crime, the authors examine the law's approach to the victimization of one Indigenous person by another. Drawing on a wealth of archival material relating to homicides in Australia, they conclude that settlers and Indigenous peoples still live in the shadow of empire.

Contract Law Springer

This handbook consists of essays on contemporary issues in criminal law and their theoretical underpinnings. Some of

the essays deal with the relationship between morality and criminalization. Others deal with criminalization in the context of specific crimes such as fraud, blackmail, and revenge pornography. The contributors also address questions of responsible agency such as the effects of

addiction or insanity, and some deal with punishment, its mode and severity, and the justness of the state's imposition of it. These chapters are authored by some of the most distinguished scholars in the fields of applied ethics, criminal law, and jurisprudence.
