To most people, cars are just appliances to be disposed of when they rust, become unreliable, or are outgrown. But to car people, it's different. Cars are like photographs that occupy physical space. They hold aromas that trigger memories, and remind us of who we once were. In addition, to some people, the relationship with the car itself is a real thing. Many enthusiasts pine for the cars of their youth, regret that they ever let them go, and yearn and search for them the way people do with old lovers, hoping to find them and rekindle that old spark. In *Resurrecting Bertha*, Rob Siegel assures you that this is normal (well, as normal as anything is with car people), and embarks on this journey himself. Writing in his trademark Hack Mechanic voice that's enthralled readers for 35 years, Rob describes his original eight-year relationship with his highly-modified 1975 BMW 2002 "Bertha," selling the car to a dear friend, its 26 years of storage, and buying it back in a weak whisky-soaked moment only to experience the "oh dear God what did I just do" regret when he raises the long-closed garage door and comes face-to-face with the badly deteriorated car. The book details the steps Rob went through to get the car running, then driving, then sufficiently sorted to make a 2000-mile drive, and how the reconnection with the car was so much deeper than he expected. *Resurrecting Bertha* is about more than just the nuts and bolts; it's about deciding what's important, the joy of doing good, and how, if you do it right, not only can you go home again, but you can do so in the same car.

For over 25 years Rob Siegel has written a monthly column called "The Hack Mechanic" for the BMW Car Club of America's magazine Roundel. In *Memoirs of a Hack Mechanic*, Rob Siegel shares his secrets to buying, fixing, and driving cool cars without risking the kids' tuition money or destroying his marriage. And that's something to brag about considering the dozens of cars, including twenty-five BMW 2002s, that have passed through his garage over the past three decades. With a steady dose of irreverent humor, *Memoirs of a Hack Mechanic* blends car stories, DIY advice, and cautionary tales in a way that will resonate with the car-obsessed (and the people who love them).

An expert on China's global infrastructure expansion provides an urgent look at the battle to connect and control tomorrow's networks. From the ocean floor to outer space, China's Digital Silk Road aims to wire the world and rewrite the global order. Taking readers on a journey inside China's surveillance state, rural America, and Africa's megacities, Jonathan Hillman reveals what China's expanding digital footprint looks like on the ground and explores the economic and strategic consequences of a future in which all routers lead to Beijing. If China becomes the world's chief network operator, it could reap a commercial and strategic windfall, including many advantages currently enjoyed by the United States. It could reshape global flows of data, finance, and communications to reflect its interests. It could possess an unrivaled understanding of market movements, the deliberations of foreign competitors, and the lives of countless individuals enmeshed in its networks. However, China's digital dominance is not yet assured. Beijing remains vulnerable in several key dimensions, the United States and its allies have an opportunity to offer better alternatives, and the rest of the world has a voice. But winning the battle for tomorrow's networks will require the United States to innovate and take greater risks in emerging markets. Networks create large winners, and this is a contest America cannot afford to lose.

 The author buys a long-dead vintage BMW sight-unseen, travels a thousand miles to where it sits, gets it running, and drives it

home. During the twelve-day trip, he finds that what began as a story of man-versus-machine turns into something else entirely--a story of the kindness of strangers, and how doors sometimes open exactly when you need them to. "Rob Siegel is a writer with the mind of a mechanic and a mechanic with the mind of a writer. He's also an old-school romantic of the best kind, and one of the few people who understands what car culture really means to the people invested in it-free of stereotype, cliché, or pat sentiments you've read a thousand times before. Like all of his writing, *Ran When Parked* focuses heavily on the why behind the hobby. It's a mix of casual, long-form blog entry; detailed how-to; and emotive confessional; most of all, he seems to believe the world would be

a better place if everyone else followed on his crazy path and devoted their free time to resurrecting old iron. He's right." -Sam Smith Editor at Large, Road & Track
