COWAN ZAYDEN

The Ultimate Small Business Guidebook Wipf and Stock Publishers
 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

By 2030, diabetes will be the 7th leading cause of premature mortality worldwide, according to the World Health Organisation. The application of nanotechnology in medicine holds many possible advantages and over the past few decades, there has been huge progress in its utilisation. Nanotechnology is widely applied for cancer treatment and other diseases but, the use of it for diabetes treatment is now starting to flourish. This book presents the latest developments of nanomedicine for the treatment of different facets of diabetes and related disorders.

With a multidisciplinary approach, chapters focus on previously overlooked topics in glucose sensing, insulin delivery and secretion, bioimaging and transplantation of islets. This book is suitable for researchers of nanomedicine, nanotechnology and diabetes looking into the emergence of new approaches for the treatment of this life-threatening disease.

Ben McCabe has only one thing on his mind when he's released from the Yuma Territorial Prison for a crime he didn't commit: Revenge. Four years of his life gone, spent in a torturous hellhole. He wants the man responsible brought to justice, regardless of the cost. When Wisteria Bush finds an unconscious man next to the Colorado River, she knows she has to help him, no matter how dangerous he may be. She nurses him back to health to find he is a threat to her, but not in a way she'd ever imagined. When her brother takes up cattle rustling and intends to marry her to his boss, the handsome stranger has other ideas.

Defending Hearts McGraw-Hill/Contemporary

"There has never been a book provoking more delirium, foolishness and irrational movements, without any relationship to Jesus Christ [than the Book of Revelation]." —Jacques Ellul, Introduction Known for his trenchant critique of modernity and of those Christians who celebrate their captivity to it, Ellul here cuts to the heart of the theological intention of the Book of Revelation, and thereby reveals the liberating gospel in all its offensiveness. Neither an exhaustive commentary nor a work of historical-exegetical analysis, *Apocalypse* is a provocative, independent interpretation. Ellul seeks to rescue Revelation from the reassuring and orthodox banality to which commentators often reduce it. The goal is to perceive the totality of the book in its movement and structure. "Architecture in movement" is the key to understanding Revelation's puzzling but simple message. This edition also comes with a new foreword by Jacob Marques Rollison who provides an essential aid for guiding readers through Ellul's thorough engagement with Revelation.

 "Traditionally, knowledge representation and reasoning systems have incorporated natural language as interfaces to expert systems or knowledge bases that performed tasks separate from natural language processing. As this book shows, however, the computational nature of representation and inference in natural language makes it the ideal model for all tasks in an intelligent computer system. Natural language processing combines the qualitative characteristics of human knowledge processing with a computer's quantitative advantages, allowing for in-depth, systematic processing of vast amounts of information.

JACK LONDON (1876-1916), American novelist, born in San Francisco, the son of an itinerant astrologer and a spiritualist mother. He grew up in poverty, scratching a living in various legal and illegal ways -robbing the oyster beds, working in a canning factory and a jute mill, serving aged 17 as a common sailor, and taking part in the Klondike gold rush of 1897. This various experience provided the material for his works, and made him a socialist. "The son of the Wolf" (1900), the first of his collections of tales, is based upon life in the Far North, as is the book that brought him recognition, "The Call of the Wild" (1903), which tells the story of the dog Buck, who, after his master's death, is lured back to the primitive world to lead a wolf pack. Many other tales of struggle, travel, and adventure followed, including "The Sea-Wolf" (1904), "White Fang" (1906), "South Sea Tales" (1911), and "Jerry of the South Seas" (1917). One of London's most interesting novels is the semi-autobiographical "Martin Eden" (1909). He also wrote socialist treatises, autobiographical essays, and a good deal of journalism.

WHEN THE PITCH GETS PERSONAL Atlanta Skyline's star Swedish wingback Oz Terim--or as the fans call him, the Wizard--has an airtight plan for his life, his career, even his meticulously renovated house, but he barely gives a thought to the Islamic faith he inherited from his Turkish parents. So no one's more surprised than he is when he's the victim of anti-Muslim hate crime. Refusing to take the threat seriously, he resists the security detail Skyline insists on . . . until he meets Kate Mitchell. There's no room for her in his plan and she's the exact opposite of what he wants. Then why can't he keep his hands off her? After ten years in the military--and getting fired from her first post-Army job in Saudi Arabia--Kate Mitchell has slunk home to her Georgia roots. Private security isn't the career she dreamed of, nor is she thrilled to work with an uptight professional athlete who plays a sport she has no interest in. She never expected to be attracted to him--or for him to fall for her, too. As their opposite lives tangle up--and the threat against Oz grows more serious--Kate has to decide who she wants to be in life and in love. "Fans who enjoy reading books featuring multicultural couples won't want to pass this one up. A lot of fun and the romance is slow-building and sweet." --RT Book Reviews, 4 Stars "A well-crafted and very enjoyable sports romance that also delves into a timely subplot of the challenges faced by immigrants to America . . . Crossing Hearts delivers an exciting and passionate read." --
