*The Niger Delta Paradox*  
Human Rights Watch  
The Izon of the Niger  
Delta is a global history of  
the Izon, Ijo, or Ijaw  
people from their  
homelands in the Niger  
Delta, through Nigeria,  
the West and Central  
African coastlands, and in  
the Africa diaspora into  
Europe, the America's and  
the Caribbean. It is a  
preliminary study which  
raises questions and  
opens ground for further  
research. The book  
provides chapters that  
take an overview of issues  
on the environment of the  
Niger Delta, an analysis of  
the Ijo population, the  
language, culture,  
resources, history and  
linkage to the rest of  
Nigeria and the world. In  
effect these chapters  
provide a synopsis of the  
Ijo in the past and their  
situation in the present.

The Boko Haram  
insurgency in Nigeria  
should be seen as both a  
phenomenon and as an  
activity. As a  
phenomenon it should be  
seen as expressions of  
injustice and de-  
development in Nigeria

and as an activity it  
should be seen as  
expressions of violence  
and destruction to satisfy  
orgiastic aspirations,  
especially in some  
northern parts of Nigeria.  
Again, as a phenomenon,  
the coverage of Boko  
Haram is the entire  
Nigeria while as an  
activity it has turned  
northern Nigeria into one  
boiling cauldron with fear  
being personalized while  
insecurity lurks in the  
streets. With Boko Haram,  
the sword of Damocles  
now hangs on every head,  
especially in the northern  
region. This deadly  
scenario provokes soul-  
searching questions: Why  
is Nigeria constantly  
enmeshed in deadly  
conflicts? What conditions  
fertilize social violence in  
our societies? What were  
the warning signals or  
accumulation of  
combustible materials  
that were ignored? What  
conditions could engender  
peace and security in a  
plural society like ours?  
Are the violence  
entrepreneurs engaging  
Nigeria in conversation or  
are they determined to  
crack its history? Is  
Nigeria sitting on a keg of  
gunpowder? Are Nigerian  
youths dissatisfied with  
the political economy of  
Nigeria? Is the aggression  
of the Boko Haram a

product of frustration,  
religious messianism or  
terrorism? How can the  
swords of Damocles in  
Nigeria be turned into  
ploughshares? And how  
can the phenomenon of  
Boko Haram in Nigeria  
and its activities in some  
parts of Northern Nigeria  
be stopped? These are  
some of the questions  
which the book tries to  
provide answers for.

As the earth's carrying  
capacity continues to be  
stressed, the question of  
renewable energies is no  
longer whether, but when  
and by whom. Climate  
change and peak oil have  
hit the mainstream. Kolya  
Abramsky's collection  
maps the world's energy  
sector and shows how  
addressing these  
challenges necessitates  
an analysis of our  
economic priorities.  
Solutions must include  
massive shifts in our use  
of technologies and, most  
importantly, a  
democratization of the  
economic landscape  
based on broad new  
coalitions. With four  
distinct sections—Oil  
Makes the World Go  
'Round; From Petrol to  
Renewable Energies;  
Struggle Over Choice of  
Energy Sources and

Technologies; and Possible Futures—and over fifty essays from approximately twenty countries, there's nothing like Sparking a Worldwide Energy Revolution to address our global energy crisis. The different chapters bring together a wealth of organizational and analytical experience from across the different branches of the energy sector, both conventional and renewable.

Contributors include the following organizations and individuals: China Labour Bulletin (Hong Kong/China), Energy Watch Group (Germany), Focus on the Global South (Thailand), Integrated Sustainable Energy and Ecological Development (India), Public Services International Research Unit (United Kingdom), World Information Service on Energy (Netherlands), Preben Maegaard, and Hermann Scheer. Kolya Abramsky is a former secretariat of the World Wind Energy Institute, based in Denmark, a pioneering country in renewable energy. He is currently a research fellow at the Institute for Advanced Studies on Science, Technology and Society in Austria, and is pursuing a PhD in sociology at State

University of New York, Binghamton.

The series Studies on Modern Orient provides an overview of religious, political and social phenomena in modern and contemporary Muslim societies. The volumes do not only take into account Near and Middle Eastern countries, but also explore Islam and Muslim culture in other regions of the world, for example, in Europe and the US. The series Studies on Modern Orient was founded in 2010 by Klaus Schwarz Verlag.

The Economics of Youth Restiveness in the Niger Delta outlines the important issue of restiveness, which has led to kidnapping, hostage taking, and other crimes perpetuated in the region that have resulted in a monumental loss of revenue for Nigeria. This economics text book is certainly not boring! The Niger Delta Region of Nigeria has recently come under intense and careful scrutiny and discussion internationally. The region's rich natural resource endowments, including oil and gas,

have played a large part of the discussions about the region and its sustainable environment. The text explores the general background of Nigeria's oil and gas resource infrastructure as well as the effects these are having on the Nigerian economy. The book discusses in detail the resources of the region, including renewable and non-renewable ones. The root causes of youth restiveness are also discussed. Judging from a practical view of events that led to restiveness in the region, the book's analyses submits that there were some benefits deriving from restiveness: The closing of income inequality gap in the region and improvements in socio-economic statistics are of significant importance to note.

Many people in the Niger Delta may not have heard of the term "environmental injustice" before, but it is just a new word for an old problem. Environmental justice is based on the principle that all people have a right to be protected from environmental pollution and to live in and enjoy a clean and healthy

environment. In the Niger Delta environmental injustice is experienced mostly from the activities of the oil industries which have degraded the land, contaminated the water and polluted the air without proper compensation. Gas leakage is killing many people and continues to have a negative impact on the lives of the people living around the area. The aim of this book is to raise awareness of the issues affecting the Niger Delta region, and to encourage involvement in the cause.

Corporate Governance Contributions to Peace and Security in Zones of Conflict African Books Collective

As the single most populous nation in Africa, Nigeria recently overtook South Africa as the largest economy on the continent. Natural resources, oil and gas in particular, comprise the country's single largest revenue-earner but the 170m person economy also has seen significant activity in recent years into the industrial, financial, telecoms and – as of 2013 – power sectors. Hydrocarbons reserves have traditionally attracted the vast majority of domestic

and foreign investment in Nigeria. Oil production capacity has remained at roughly 2.5m barrels per day (bpd) since the start of 2000, although output fell to 2.2m bpd on average in 2012. Still, the country has long operated below its true potential and government efforts in recent years have sought to increase local value addition, by boosting refining capacity and minimising theft and bunkering. The country's banking sector has been through a significant shake-up as well, resulting in a far healthier and more robust financial industry, while reforms in the telecoms and agricultural sectors have strengthened medium-term prospects.

**Transforming Infrastructure Development** Adonis & Abbey Publishers Ltd  
Fidelis Allen situates violent conflict in the Niger Delta in the context of failure by government to effectively implement relevant oil-related environmental policies intended to achieve sustainable development, arguing that oil and environment-related conflicts in the region are reflections of this failure. This failure is premised on the notion that the goal of

sustainable development, as clearly outlined in Nigeria's National Environmental Policy and implied in various other policies, can be pursued through the activities of government, individuals and business organisations that are capable of engendering economic and social progress for communities that depend on the environment for their survival. In fact, available evidence shows that government and oil company activities (or failures to act) actually contribute to the despoliation of the environment in the Niger Delta. Despite existing environmental legislations and guidelines, unsafe waste disposal, flaring of gas and oil spillage remain key features of oil industry operations in the Niger Delta. Not surprisingly, the book highlights a lack of synergy between government and oil company activities, and the attainment of sustainable development as a key goal of the environmental policy of the government. In other words, the activities of the government and oil companies do not sufficiently promote sustainable development.

The net consequence is reflected in the frustrations of local justice and environmental movement groups about the political processes which deter (rather than enable) their agitation for improvements in local living conditions and development in the Niger Delta. Over time, those frustrations begin to manifest at different levels, including aggressive and violent behaviours against oil companies and government security agencies for their contributory roles.

Expressions such as “Environmental terrorism” or “eco-anarchy” may sum up the state of the Niger Delta region of Nigeria, in a bid to explain the indiscriminate cutting of pristine forests, terminal scare of wildlife and extinction of biodiversity, loss of soil fertility and fecundity of rivers, acidified atmosphere, corroded roofs, disease, conflicts, militarization, extra-judicial killing, inflation

and collapse of traditional economy, poverty, prostitution, rape, death.... But embedded in the clatter of this semantic analysis are the realities of an abused environment, where uncertainty looms in daylight and grief rules the night; for well over five decades that the region has come under intense ravaging by the oil industry, the effect is evident in the physical, biological and socio-economic environments. Against the background of rich but fragile ecosystems where nature experiments with its components at will; and the picture of a consciously raped ecology, this book examines the lingering environmental crises in Nigeria’s oil-rich region. With appropriate use of case studies based on practical field experience, and explicit discourse on remedial measures, the book is fashioned to meet the interest of all classes of persons including students of environmental management, policy makers and stakeholders in the Niger Delta environment.

Understanding Organizational Leadership

through Ubuntu offers a creative, innovative and holistic approach to understanding organizational leadership using the principles embodied in the African philosophy of personhood known as ubuntu - or the essence of being human. Using African proverbs, folktales and indigenous concepts, the book discusses the organizational principles of ubuntu and the leadership lessons that modern organizations can learn from these principles. The principles include sharing and collective ownership of opportunities, responsibilities and challenges, the importance of people and relationships over things, participatory leadership and decision making, loyalty, reconciliation, experiential learning and knowledge management. By using humorous ways that touch people's heart to communicate organizational and personal management and improvement strategies, the book demystifies organizational language while at the same time enhancing its power. It also contributes to the much-needed cross-cultural dialogue among organizations and

societies.

Nigeria Investment and Business Guide Volume 1 Strategic and Practical Information

Walter de Gruyter GmbH & Co KG

This edited volume explores and dissects Africa's economic growth and sustainable development using an optimal conceptual model of the progressive continent's development up to and until 2030.

Africa is studied not against the background of developed (OECD) and leading developing (e.g. BRICS) countries, but as a separate economy and as a self-sufficient region which follows its own priorities, and implements its own unique opportunities and vectors of growth and development. This volume addresses the

contemporary and topical issues of inclusive growth, digital modernisation, and sustainable development, recommending policy outcomes for the future.

The first book to present the environmental teachings of this beloved pope—the newly

canonized St. John Paul—and the hopeful words of Pope Francis, thoughtfully synthesized into a complete spiritual and practical vision for the future. "The ecological crisis is a moral crisis." So said Pope John Paul II, an unexpected and fierce

advocate for ecological responsibility throughout his papacy. Rather than seeing environmental concerns as "earthly" or "political," he showed that they are in fact at the heart of the covenant between human beings and their Creator. In dozens of addresses, sermons, and encyclicals, Pope John Paul II made specific recommendations on twelve interconnected ecological issues, including climate change, ocean destruction, water scarcity, poverty, the role of women, and war. He showed that each could become a source of spiritual, social, and economic transformation. Following St. Francis integrates Pope John Paul II's vision with that of St. Francis of Assisi, patron saint of ecology, and the galvanizing words of Pope Francis. Accessible and illuminating, it speaks to hearts and minds, to nonreligious readers as well as devoted Catholics, incorporating Scripture, current science, and inspiring stories of solutions and restoration. Marybeth Lorbiecki unifies and champions the late, beloved pope's view that all life issues are related and that all forms of life deserve care. And if we work with God and each

other to protect them, we can “renew the face of the earth” (Psalm 104:30). From the Hardcover edition. *ECRM 2017 16th European Conference on Research Methods in Business and Management* Springer Nature

From the award-winning and bestselling author of *Ghost Wars* and *Directorate S*, an “extraordinary” and “monumental” exposé of Big Oil (*The Washington Post*) Includes a profile of current Secretary of State and former chairman and chief executive of ExxonMobil, Rex Tillerson In this, the first hard-hitting examination of ExxonMobil—the largest and most powerful private corporation in the United States—Steve Coll reveals the true extent of its power. *Private Empire* pulls back the curtain, tracking the corporation’s recent history and its central role on the world stage, beginning with the Exxon Valdez accident in 1989 and leading to the Deepwater Horizon oil spill in the Gulf of Mexico in 2010. The action spans the globe—featuring kidnapping cases, civil wars, and high-stakes struggles at the Kremlin—and the

narrative is driven by larger-than-life characters, including corporate legend Lee “Iron Ass” Raymond, ExxonMobil’s chief executive until 2005, and current chairman and chief executive Rex Tillerson, President-elect Donald Trump’s nomination for Secretary of State. A penetrating, news-breaking study, *Private Empire* is a defining portrait of Big Oil in American politics and foreign policy.
