The Spanish nation has been contested almost since its conception in the early nineteenth century, and the Spanish state has therefore been involved in perpetual conflicts between various nationalisms, particularly between different versions of Spanish nationalism as well as between Spanish majority nationalism and various minority nationalisms. At different times in history, the conflicts have revived and turned into organizing principles of the political communities in Spain, as communities in conflict or contention but, nevertheless, as communities providing the Spaniards with different senses of belonging. In recent times, both lines of contention have been activated again, and in this volume, we focus particularly on the conflict between majority and minority nationalism, which has been revived from approximately 2010 around the Catalan separatist conflict, but other sub-state identities are potentially conflictual as well. Both the state-wide - Spanish - as well as the sub-state actors try to develop feelings of territorial attachments to the Spanish political community or to the respective sub-state political communities, and both use emotions and feelings to secure support and to assert or claim sovereignty for the political community in question. The contributions in this volume shed light on various issues related to these questions.

The Liturgy of Love is an exploration of art reflecting the relationship between spiritual and physical love as expressed in the Old Testament Song of Songs.

An illuminating, indispensable analysis of a watershed moment and its possible aftermath. For people and governments around the world, the onset of the COVID-19 pandemic seemed to place the preservation of human life at odds with the pursuit of economic and social life. Yet this naive alternative belies the complexity of the entanglements the crisis has created and revealed not just between health and wealth but also around

morality, knowledge, governance, culture, and everyday subsistence. Didier Fassin and Marion Fourcade have assembled an eminent team of scholars from across the social sciences to reflect on the myriad ways SARS-CoV-2 has entered, reshaped, or exacerbated existing trends and structures in every part of the globe. The contributors show how the disruptions caused by the pandemic have both hastened the rise of new social divisions and hardened old inequalities and dilemmas. An indispensable volume, *Pandemic Exposures* provides an illuminating analysis of this watershed moment and its possible aftermath.

In this riveting anatomy of authoritarianism, acclaimed journalist William Dobson takes us inside the battle between dictators and those who would challenge their rule. Recent history has seen an incredible moment in the war between dictators and democracy—with waves of protests sweeping Syria and Yemen, and despots falling in Egypt, Tunisia, and Libya. But the Arab Spring is only the latest front in a global battle between freedom and repression, a battle that, until recently, dictators have been winning hands-down. The problem is that today's authoritarians are not like the frozen-in-time, ready-to-crack regimes of Burma and North Korea. They are ever-morphing, technologically savvy, and internationally connected, and have replaced more brutal forms of intimidation with subtle coercion. The Dictator's Learning Curve explains this historic moment and provides crucial insight into the fight for democracy.

This book offers a diachronical and inter-/transmedia approach to the relationship of media and fear in a variety of geographical and cultural settings. This allows for an in-depth understanding of the media's role in pandemics, wars and other crises, as well as in political intimidation. The book assembles chapters from a variety of authors, focusing on the relation between media and fear in the West, the Middle East, the Arab World and China. Besides its geographical and cultural diversity, the volume also takes a long-term perspective, bringing together cases from transforming media environments which span over a century. The book establishes a strong and historically persistent nexus between media and fear, which finds ever-new forms with new media but

always follows similar logics.

This interdisciplinary series addresses the relation between media and cultural memory. Its publications study how media construct, store, and disseminate memory. The series' focus is on different media and technologies, such as text and image, the cinema and the new digital media, on transmediality, intermediality, and remediation, as well as on the social (and increasingly transnational and transcultural) contexts of mediated memory. The aim of the series is to provide a vibrant international platform for research and scholarly exchange in the field of media and memory studies. Manuscripts submitted to the series are peer reviewed by expert referees.

In what constellation might Alcyone, soul of his soul and life of his life, live? The sweet Alcyone asks to return to the Earth to accompany the great love of her past, Charles, in a new lifetime of trials, sacrifices and reparations. In an example of profound devotion to her neighbor, she demonstrates her complete loyalty to assist the one for whom she has interceded so much on the spirit plane. In this gripping historical novel, the spirit Emmanuel takes us back to the frivolous Paris of the 17th century, a city replete with violent sentiments and materialistic illusions that conflict with the eternal truths of the soul. By means of the psychography of Francisco Candido Xavier, the spirit author's collaborator, we are introduced to another one of Emmanuel's incarnations, this time as Father Damiano, vicar of St. Vincent's Church in Avila, Spain, and the couple's contemporary protagonist.

A new account of modern Iraqi politics that overturns the conventional wisdom about its sectarian divisions How did Iraq become one of the most repressive dictatorships of the late twentieth century? The conventional wisdom about Iraq's modern political history is that the country was doomed by its diverse social fabric. But in *State of Repression*, Lisa Blaydes challenges this belief by showing that the country's breakdown was far from inevitable. At the same time, she offers a new way of understanding the behavior of other authoritarian regimes and

their populations. Drawing on archival material captured from the headquarters of Saddam Hussein's ruling Ba'th Party in the wake of the 2003 US invasion, Blaydes illuminates the complexities of political life in Iraq, including why certain Iraqis chose to collaborate with the regime while others worked to undermine it. She demonstrates that, despite the Ba'thist regime's pretensions to political hegemony, its frequent reliance on collective punishment of various groups reinforced and cemented identity divisions. At the same time, a series of costly external shocks to the economy—resulting from fluctuations in oil prices and Iraq's war with Iran—weakened the capacity of the regime to monitor, co-opt, coerce, and control factions of Iraqi society. In addition to calling into question the common story of modern Iraqi politics, *State of Repression* offers a new explanation of why and how dictators repress their people in ways that can inadvertently strengthen regime opponents.

This book examines the process of dismantling the democratic institutions and protections in Venezuela under the Hugo Chávez regime. The actions of the Chávez government have influenced similar processes and undemocratic manoeuvrings in Ecuador, Bolivia, and Honduras. Since the election of Hugo Chávez as president of Venezuela in 1998, a sinister form of nationalistic authoritarianism has arisen at the expense of long-established democratic standards. During the past decade, the 1999 Venezuelan Constitution has been systematically attacked by all branches of the Chávez government, particularly by the Supreme Tribunal of Justice, which has legitimized the Chávez-ordered constitutional violations. The Chávez regime has purposely defrauded the Constitution and severely restricted representative

government, all in the name of a supposedly participatory democracy controlled by a popularly supported central government. This volume illustrates how an authoritarian, nondemocratic government has been established in Venezuela. *Diario Oficial* Springer Nature

The Soviet era was a time of social and economic upheaval in Russia's history as the Bolsheviks strove to build a socialist utopia based on the theories of Karl Marx. Central to this endeavor was the 25-year dictatorship of Josef Stalin, whose determination to make the Soviet Union a dominant industrial and military power created misery on a grand scale and caused the deaths of millions of people. Stalin arbitrarily invoked the specter of "enemies of the people" to destroy anyone who opposed the new socialist order. Millions of Soviet citizens were executed in continuous purges, and millions more perished in the slave labor camps of the Gulag. This book describes the fate of those citizens who were declared enemies of the people not because of what they had done but because of who they were. Stalin's repression not only destroyed the best and brightest, it prevented the development of a civil society in the Soviet Union which would have promoted economic justice, the rule of law and basic human rights for all.

Faith without Dogma Routledge

We live in a time of high Church membership, but low Church attendance. Franco Ferrarotti, arguably the most important sociologist of religion alive, captures the source of this paradox In the title of his new book, *Faith without Dogma*. For it is belief that propels membership, while the absence of dogma results in a reticence to accept hierarchical direction from above or beyond. Basing much of his analysis on the postwar struggles within Roman Catholicism, Ferrarotti views the demand for religious renewal and revival as part and parcel of the emergence of broad social agendas—agendas to which not even the Roman curia could remain impervious. The former easy relationships between Church and State, especially authoritarian states in Europe and Latin America, gave way to a critical defense of individual rights within a context of a broadened vision of Christian doctrine. In addition to issues involved in internal affairs of religion, Ferrarotti explores a series of developments that have changed for all time the nature of Church survival. The critical element, one that goes beyond specific doctrinal accommodations, is the new primary connection of Church to people rather than Church to State. This came about through the widespread acceptance of science and technology as frames of intellectual reference, the emergence of secularization as mediating religious claims and the creation from the Enlightenment to the Postmodern eras of "civil religions." The volume concludes with a set of chapters on the nature of sacred events and objects, the emergence of new varieties of prayer, and concludes with a chapter on the relationship of ideology to theology prepared especially for the English language edition of

Faith without Dogma. This is a book likely to attract a broad audience among religionists and culturologists, as well as social scientists.
