PATIENCE LUCIANA

Routledge
 (Faber Piano Adventures). Written for ages 5 and 6, My First Piano Adventure captures the child's playful spirit. Fun-filled songs, rhythm games and technique activities develop beginning keyboard skills. Three distinguishing features of the Lesson Book A make it unique and effective for the young 5-6 year old beginner. 1. A strong focus on technique embedded in the book through playful technique games, chants, and carefully-composed pieces that gently lead the child into pianistic motions. 2. An outstanding CD for the young student to listen, sing, tap, and play along with at the piano. The orchestrated songs on the CD feature children singing the lyrics, which has great appeal to the 5-6 year old beginner. The CD becomes a ready-made practice partner that guides the student and parent for all the pieces and activities in the books. 3. The fanciful art features five multi-cultural children who are also learning to play. These friends at the piano introduce basic rhythms, white key names, and a variety of white and black-key songs that span classical, folk, and blues. Young students will listen, sing, create, and play more musically with Nancy and Randall Faber's My First Piano

Adventure, Lesson Book A. The Lesson Book introduces directional pre-reading, elementary music theory and technique with engaging songs, games, and creative discovery at the keyboard. Young students will enjoy the multi-cultural "friends at the piano" who introduce white-key names, basic rhythms, and a variety of songs which span classical, folk, and blues. Ear-training and eye-training are also part of the curriculum. The Fabers' instructional theory "ACE" - Analysis, Creativity, and Expression, guides the pedagogy of My First Piano Adventure. Analysis leads to understanding, creativity leads to self-discovery, and expression develops personal artistry. The CD for this book offers a unique listening experience with outstanding orchestrations and vocals. The recordings demonstrate a key principle of the course: when children listen, sing, tap, and move to their piano music, they play more musically. View Helpful Introductory Videos Here

The pioneering surgeon Dr. Denton Cooley performed his first human heart transplant in 1968 and astounded the world in 1969 by conducting the first successful implantation of a totally artificial heart in a human being. Over the course of his career, Cooley and his associates performed thousands of open-heart operations and pioneered the use of new surgical procedures. Of all his achievements, however, Cooley was most proud of the Texas Heart Institute, which he founded in 1962 with a mission to use education, research, and improved patient care to decrease the devastating effects of cardiovascular disease. In *100,000 Hearts*, Cooley tells about his childhood in Houston, his education at the University of Texas, his medical-school training at the University of Texas Medical Branch in Galveston and Johns Hopkins, and his service in the Army Medical Corps. While at Johns Hopkins, Cooley assisted in a groundbreaking operation to correct an infant's congenital heart defect, which inspired him to specialize in heart surgery. Cooley's detailed descriptions of working in the operating room at crucial points in medical history offer a fascinating perspective on the distance medical science traveled in just a few decades.

Four Guitars (more or less) is part memoir and part exposition of the modern handmade acoustic guitar. Like so many baby boomers the author took up playing the guitar again after several decades only to discover the instrument all over again but with a deeper and richer appreciation than in his youth. This book chronicles the relearning to play music but really discovering the guitar for the first time. In searching for the variations in guitars caused by different combinations of musical woods the author embarks on a series of guitar tastings among guitar players that reveal more than expected. The lessons learned go beyond the melody and tempo lessons to more subtle appreciation of the relationships between players and their instruments, the beauty and character of hand crafted instruments and the luthiers that build them. In the end the book is an appreciation of the guitar in general and the relationship with four guitars (more or less) in particular.

When Ertegun founded Atlantic Records in 1947 with \$10,000 borrowed from his dentist, the 24-year-old native of Turkey was living in segregated America, which did not realize the beauty of its own cacophony. Spanning six decades, this coffee-table history goes a little deeper than most. Ertegun's anecdotes are intermingled with those of his business associates and recording artists. Atlantic's roster includes Ray Charles, Clyde McPhatter, the Drifters, Big Joe Turner, John Coltrane, Sarah Vaughan, Mabel Mercer, Bobby Darin, Wilson Pickett, Aretha Franklin, Sam and Dave, Dusty Springfield, Led Zeppelin, Tori Amos and so on. There are nine essays by some of the most respected music journalists. Each nicely crystallizes the label's enormous contributions to R&B, jazz, rock 'n' roll, pop and soul.
