### Special Economic Zones in Asian Market Economies

Springer Nature

The first book to examine India's Special Economic Zones and the different popular perceptions - both good and bad - surrounding this issue.

### Global Experiences with Special Economic Zones

BRILL  
Industrialization supported by industrial hubs has been widely associated with structural transformation and catch-up. But while the direct economic benefits of industrial hubs are significant, their value lies first and foremost in their contribution as incubators of industrialization, production and technological capability, and innovation. The Oxford Handbook of Industrial Hubs and Economic Development adopts an interdisciplinary approach to examine the conceptual underpinnings, review empirical evidence of regions and economies, and extract pertinent lessons for policy researchers and practitioners on the key drivers of success and failure for industrial hubs. This Handbook illustrates the diverse and complex nature of industrial hubs and shows how they promote industrialization, economic structural transformation, and technological catch-up. It explores the implications of emerging issues and trends such as environmental protection and sustainability, technological advancement, shifts in the global economy, and urbanization.  
*The Political Economy of Special Economic Zones* Lulu.com

In the past 30 years, China has achieved an unprecedented development 'miracle' in human history. How did China achieve this? What are the key drivers for such a rapid growth? And most importantly, what can be learned from China's success? While many factors could be identified to explain China's success, it is no doubt that the numerous Special Economic Zones (SEZs) and industrial clusters that emerged after the country's reforms are two important engines that have been driving China's rapid development. The key experiences of China's SEZs and industrial clusters could be best summarized as: gradualism with experimental approach; strong commitment; and an active

facilitating state with strong pragmatism. This book reviews the development experiences of China's SEZs and industrial clusters through extensive research, field visits, and case studies in an attempt to benefit the policy-makers, development practitioners, scholars from developing countries, and the global development community in general. It contains five detailed case studies three SEZs in the broadest sense (Shenzhen, Tianjin and Kunshan) and two industrial clusters (Wenzhou footwear cluster in Zhejiang and Xiqiao textile cluster in Guangdong). This volume represents the most comprehensive volume to date on China's experiences with both its SEZ and cluster experiences.

Special economic zones (SEZs) are important doorways for countries to attract foreign investment and promote trade. A strong correlation between the creation of SEZs and economic development indicators has also been identified in previous studies, at the municipal level, in China. Thus, the fundamental question that needs to be explored is to what extent SEZs can play the role of development enablers in different regions, development states, and institutional settings. The Handbook of Research on Special Economic Zones as Regional Development Enablers discusses the diverse and international track records in the implementation of SEZs, the interplay of SEZ models and local institutional infrastructure and stakeholders, and the SEZ models that can best fit certain development states and/or settings. Covering topics such as the Belt and Road Initiative, local and national economies, and regional integration, this book is essential for government officials, development officers, scholars, students, researchers, entrepreneurs, public decision makers, aid agencies, company executives, investors, and academicians.

*International Economic Law and the Challenges of the Free Zones*  
World Bank Publications

First published in 1999, this volume assessed the economic situation of Shenzhen in Guangdong Province, China, including its trade connections with Hong Kong and foreign investments in the area. Designated as one of four Special Economic Zones (SEZ) as part of China's domestic economic reform in 1979, Weiping Wu examines Shenzhen's economic situation in the context of Hong Kong's transition just two years prior to publication in 1997. Wu explores the developments in Shenzhen in local policy, labor costs, export performance, domestic linkages and complementarity with Hong Kong as a result of Hong Kong's closer connection with the Shenzhen trade area. Shenzhen's suitability can then be assessed in its role as an SEZ to experiment with and digest western technology and management techniques for inland China and as a buffer between China and the wider world.

### Blue Book of China's Special Economic Zones

Routledge  
The book provides an authoritative study on Special Economic Zones. The scope of the articles will include new theories, methods and discoveries in SEZ study, and specifically provide recent achievements in Special Economic Zones. The journal is aimed at economics undergraduates, postgraduates, economics researchers in social science institutions and the government. Special Economic Zone mode provides an easy approach to complete modernization in developing countries like China, the reader can get some important data source and major results in this area.

Springer

Papers presented at a national seminar on Development of special economic zones in India.

*The Fisheries Regime of the Exclusive Economic Zone* Vernon Press

"This book discusses Special Economic Zones and how they play the role of development enablers in different regions, development states and institutional settings, with the goal of boosting trade and contributing to a future improvement of development indicators"--

### Between Legal Constraints and Flexibilities

BRILL  
Special economic zones (SEZs) have become a permanent feature

of the world trade scene. This book, the first to provide a critical and comprehensive analysis of SEZs covering a wide spectrum of countries and regions, shows how SEZs, albeit established at the domestic level by different countries, raise multiple legal issues under international economic law. This first-rate book is the product of the Asia FDI Forum IV held in Hong Kong in 2018. Thoroughly exploring the development of the SEZ phenomenon and its players, the contributing authors (all leading economic law experts) review the issues raised by SEZs in the context of international trade law, international investment law and investment arbitration. They identify the extent to which SEZs have been coherent in their design and policymaking, in particular with regard to domestic law reforms. They address such aspects (both core themes and specific examples) as the following: investment protection in China's SEZs; state-owned enterprises regulation; dispute settlement; under what circumstances incentives available in SEZs count as export subsidies prohibited under World Trade Organization (WTO) rules; compliance with internal market rules in European Union (EU) free zones; local populations as victims of land expropriation; Brazil's Manaus Free Trade Zone; India's experience with multiple SEZs; the administrative approval system in the Shanghai Free Trade Zone; economic corridors and transit routes as SEZs; 'refugee cities': SEZs for migrants; how China's Supreme People's Court serves national strategy; how foreign investors challenge free-zone regimes; impacts of the establishment of SEZs on tax revenues; SEZs and labour migration; and management models. The chapters also include insights into the new emerging generation of international investment agreements; WTO accession, transparency, and case law materials clarifying specific trade issues associated with SEZs; and new rules to protect the environment and labour rights, as well as analysis of crucially significant cases such as *Goetz v. The Republic of Burundi*, *Lee Jong Baek v. Kyrgyzstan* and *Ampal-American and Others v. Egypt*. With its critical and comprehensive analysis of the dynamic SEZ phenomenon across legal, economic, investment, regulatory and policy matrices - including a thorough analysis of the success factors and required policies for SEZs - this book takes a giant step towards answering the question whether SEZs fundamentally contradict norms of international law or whether SEZs have to be considered as laboratories which facilitate the implementation of

international economic policies. Its careful examination of theory and practice and its approach to lessons learned from case studies will reward trade and investment officials, policymakers, diplomats, economists, lawyers, think tanks, business leaders and others interested in this ever more important area of law and economics.

Environmental Impact Statement Atlantic Publishers & Dist  
"This book, designed for policymakers, academics and researchers, and SEZ program practitioners, provides the first systematic and comprehensive analysis of SEZ programs in Sub-Saharan Africa. It is the result of detailed surveys and case studies conducted during 2009 in ten developing countries, including six in Sub-Saharan Africa. The book provides quantitative evidence of the performance of SEZs, and of the factors which contribute to that performance, highlighting the critical importance not just of the SEZ itself but of the wider national investment climate in which it functions. It also provides a comprehensive guide to the key policy questions that confront governments establishing SEZ programs, including: if and when to launch an SEZ program, what form of SEZ is most appropriate, and how to go about implementing it. Among the most important findings from the study that is stressed in the book is the shift from traditional enclave models of zones to SEZs that are integrated ? with national trade and industrial strategies, with core trade and social infrastructure, with domestic suppliers, and with local labor markets. Although the book focuses primarily on the experience of Sub-Saharan Africa, its lessons will be applicable to developing countries around the world."

The Exclusive Economic Zone Anthem Press

The Annual Report objectively reflects the year's developments in terms of politics, the economy, society, culture, the environment, innovation and reform, and describes the problems, challenges and countermeasures in both traditional and new special economic zones. It provides an analysis of China's special economic zones, including a review of the year's developments in the form of experimental zones. It also presents new special economic zones and focuses on analyzing the transformation of these zones; the use of resources; sustainable, economic and social development; social security and technical innovation in the context of current developments. It also offers a comparative analysis and makes policy and development suggestions for each

issue.

*Special Economic Zones* Kluwer Law International B.V.

The book provides an authoritative study on Special Economic Zones. The scope of the articles will include new theories, methods and discoveries in SEZ study, and specifically provide recent achievements in Special Economic Zones. The volume's content is aimed at economics undergraduates, postgraduates, economics researchers in social science institutions and the government. The implementation of Special Economic Zones provides an easy approach to complete modernization in developing countries like China, and the reader can obtain some important sources of data, as well as major results in this area.

**Special Economic Zones and China's Development Path**

World Investment Report 2019 Special Economic Zones

Special Economic Zones (SEZs) have become a popular development policy throughout the world over the last half a century. These zones form designated areas where governments offer businesses lower taxes, tariffs, and often lighter regulations. Generally, SEZs aim to attract investments and raise a country's export and employment rates, but although success stories are often cited, there are numerous failed projects that have instead become burdens for their host countries. This book examines SEZs from a political economy perspective, both to dissect the incentives of governments, zone developers, and exporters, and to uncover both the hidden costs and untapped potential of zone policies. Costs include misallocated resources, the encouragement of rent-seeking, and distraction of policy-makers from more effective reforms. However, the zones also have several unappreciated benefits. They can change the politics of a country, by generating a transition from a system of rent-seeking to one of liberalized open markets. In revealing the hidden promise of SEZs, this book shows how the SEZ model of development can succeed in the future. Applying frameworks from various schools of political economy, this volume places SEZs in the context of their mixed past and promising future. It is essential reading for anyone with an interest in international economics, development economics, and political economy, including practitioners and consultants of SEZ policies.

**Disparities and Power Struggle in China's North-West**

Current Publications

This study briefly summarizes the development experiences of

special economic zones in China and Africa, the lessons that Africa can learn from China, and the preliminary results of the Chinese investments in special economic zones in Africa. The study makes recommendations on how to unleash the power of special economic zones and industrial zones in Africa through strategically leveraging the Chinese experiences. The success factors of Chinese special economic zones include the strong and long-term commitment of the government, a conducive business environment in the zones, strategic locations, technology upgrading and skills training, and strong linkages with the local economy. However, the Chinese experiences highlight some pitfalls to avoid, such as the "mushroom approach" and high-level overlaps at the later stage, environmental degradation, and the unbalance between industrial development and social dimensions. This calls for a bigger role for the market. Sub-Saharan Africa's experience with traditional economic zones has been relatively poor, except in a few countries, such as Mauritius. The key challenges include the poor regulatory and institutional framework, lack of effective strategic planning, weak governance and implementation capacity, and inadequate infrastructure, among others. Since 2006, China has implemented special economic zone projects globally, including in four countries in Sub-Saharan Africa. It is still too early to conduct a full assessment of these projects; however, the evidence shows that some zones have begun to attract investments and make important contributions to the local economy. The main challenges include access to land, regulatory barriers, resettlement and coordination issues, and lack of external infrastructure.

#### *Exclusive Economic Zone Claims* United Nations

For countries as diverse as China and Mauritius, Special Economic Zones (SEZs) have been a powerful tool to attract foreign investment, promote export-oriented growth, and generate employment; for many others, the results have been less than encouraging. While the benefits and limitations of zones will no doubt continue to be debated, what is clear is that policymakers are increasingly attracted to them as an instrument of trade, investment, industrial, and spatial policy. Since the mid 1980s, the number of newly-established zones has grown rapidly in almost all regions, with dramatic growth in developing countries. In parallel with this growth and in the evolving context of global

trade and investment, zones are also undergoing significant change in both their form and function, with traditional export processing zones (EPZs) increasingly giving way to larger and more flexible SEZ models. This new context will bring significant opportunities for developing countries to take advantage of SEZs, but will also raise new challenges to their successful design and implementation. This volume aims to contribute to a better understanding of the role and practice of SEZs in developing countries, in order to better equip policymakers in making effective decisions in planning and implementing SEZ programs. It covers some of the emerging issues and challenges in SEZs □ including upgrading, regional integration, WTO compliance, innovation, the environment, and gender issues □ with practical case examples from SEZ programs in developing countries.

#### Concept Publishing Company

A thorough examination of the establishment and development of China's Special Economic Zones (SEZ). These eight SEZs marked a major milestone in China's gradual market-oriented reform process, and the developmental fluctuations of these zones offers an in-depth understanding of the complexities and difficulties of reform. They also provide critical insight into China's thirty years of economic and social transformation. This book is a valuable and practical resource for governments, academics and policy advisors looking for an insight into and analysis of how the Special Economic Zone strategy played a key role in the transformation of China's economy.

#### **Design, Implementation and Impact** World Scientific

This book collects articles on the achievements and experience of special economic zones during the China's Reform and Opening-up in the past 40 years. The topics ranges from a historical summary of the development in special economic zones to its future prospect. Most of the articles analyze the policies applied for special economic zones and how they contributed to the economic growth, which provides the readers with an overview about how public policies helped cities develop. Some of the articles shift their focus to the role of special economic zones in larger area, i.e., Asia. These works exemplify the impact of China's economic policies in long term. Moreover, the book includes the contribution of special economic zones to the economic development world-wide, such as places in Africa and areas of "One Belt One road". Reader can benefit a thorough

understanding of China's special economic zones' past and future through reading the book.

#### *Building Engines for Growth and Competitiveness in China*

##### Springer Nature

In an unprecedented exploration of space and power in rural Xinjiang, a Chinese region home to the Muslim population of the Uyghurs, this book adopts a grounded theory approach and a trans-ethnic perspective into the complex and sensitive topic of land issues and agricultural land evictions in Xinjiang Uyghur Autonomous Region. By exposing the dynamics of land acquisition and power building in the politically contested space of the region, the author shows how state owned land in a key commercial and cultural hub on the new Silk Road became a commodity, in a context of violent human interactions driven by power. Relying on previously undisclosed material and on a unique field research among farmers and local authorities, the author retraces the steps of Uyghur peasant workers, entangled in a suspended situation between abandoned rural villages, migration and urban alienation, in a book which explores agency in violent processes of social change, and adds concepts and insights to the current knowledge of how we become modern citizens. The microcosm of Kashgar, an oasis-city in Xinjiang, acts as a mirror reflecting socio political dynamics framing people's identity. Shedding light on one of the most inaccessible region in China, this book is a key read for academics and a broader public willing to get a clearer view of one of the sourest power struggle in the most contested region within the next superpower.

#### *Studies on China's Special Economic Zones 2* Springer Nature

The severe global financial crisis of 2008 could not be overcome without government interventions through industrial policy. This timely book analyses industrial policy from the perspectives of trade law and economics under the WTO system. The author expertly examines both general tools of protecting and supporting domestic producers and specific topics like special economic zones, localization, greening measures and creative economy. In addition to legal texts and jurisprudence, this book extensively utilizes other WTO materials to show what is actually discussed in WTO meetings and forums on relevant issues. Where applicable, the author advances practical recommendations for 'right' or 'optimal' industrial policy in certain contexts based on trade rules, case law and some countries' real experiences. The author

concludes this work with some thoughts on concrete actions to be taken at the WTO and national levels and in academic circles in order to better tackle industrial policy issues.
