Proceedings [of the Conference]

Stanford University Press
 Comprehensive, fun and easy to use, this book covers everything worth knowing about Dubai and where to do it. Meticulously updated by a resident team of writers, photographers and lovers of life, the result is the most in-depth, practical and accurate coverage and recommendations around. Ideal for residents, short-term visitors and tourists; essential for anyone in this vibrant and surprising city. It contains New Resident tips and advice; Independent reviews of over 500 restaurants, bars and cafes; Leisure and sporting activities from

Abseiling to Entertainment to Zoology; Exploring - from museums and heritage to the latest shopping malls; Everything fully referenced to 30 pages of photographic maps; Plus a pull-out city map. This is the insiders' guide to what's hot and what's not in Dubai and the Emirates!
Transportation Research Record Explorer Publishing & Distribution
 "This comprehensive resource provides thorough coverage of the tools and techniques used in planning, building, maintaining, and fixing civil infrastructure. Thoroughly updated throughout, Public Infrastructure Asset Management, Second Edition presents the framework and elements of life cycle management of civil infrastructure assets in the context of current practice. The book explains how to achieve the optimal integrated, multi-disciplinary set of strategies (design,

construction, maintenance, rehabilitation, and renovation) necessary to manage and sustain modern public physical infrastructure assets. These include: roads and bridges / airports / ports / public utilities / water and wastewater facilities / mass transit systems / hospitals / schools / parks and recreation facilities / sports complexes. The book has been thoroughly revised to reflect the impact of built infrastructure on the environment, social concerns, new technologies and scientific developments, and the impacts of natural and man-made disasters. Covers valuation of infrastructure assets, largely in response to Government Accounting Standards Requirements such as GASB34 in the United States, PSAB3150 in Canada, and similar standards in Australia
 Addresses the adverse environmental impacts of deteriorating air quality, GHG

emissions, excessive noise, and available mitigation strategies. Includes specific approaches to sustainability including green methodologies, resource conservation, re-use of materials, renewable energy. Financing models for publicly owned infrastructure and for public-private-partnerships (P3s). Addresses online infrastructure (data access, mobile apps, cloud computing) and how these infrastructure services are assessed and provided. Adds new and/or updated methodologies on performance measures related to sustainability, security, level of service provisions, safety, institutional effectiveness, preservation of assets and investments, technologies for in-service monitoring, data analysis, prioritization, and decision support and knowledge management."

Road & Transport Research Springer

Computer Aided Highway Engineering is aimed at developing professional knowledge in the field of highway engineering with adequate skills in planning, designing and implementation of the highway project with an exposure of hands on training of computer software in designing the worldwide road infrastructures. It discusses Digital Terrain Model (DTM) using satellite data including highway geometric, pavement and tunnel design, supported by relevant tutorials. Quantity estimation, cost estimation and production of various types of construction drawings are described in detail with theory and tutorials backed by real project data. Recognizes the role of information and computer technology in various aspects of highway design. Reviews different tasks for feasibility studies and DPR with software applications. Explores topographic survey, Digital Terrain Model (DTM) and highway geometrics and, pavement and drainage design. Discusses project estimations for various revisions of the engineering work. Includes HEADS Pro along with chapter wise tutorials containing design and field data, tutorial guides and various tutorial videos. This volume is aimed at Professionals in Civil Engineering, Highway Engineering, Transport Planning and Town Planning and Traffic Engineering.

Computer-Aided Highway Engineering Explorer Pub

Staggering skylines and boastful architecture make Dubai famous—this book traces them back to a twentieth-century plan for survival. In 1959, experts agreed that if Dubai was to become something more than an unruly port, a plan was needed. Specifically, a town plan was prescribed to fortify the city from obscurity and disorder. With the proverbial

handshake, Dubai's ruler hired British architect John Harris to design Dubai's strategy for capturing the world's attention—and then its investments. Showpiece City recounts the story of how Harris and other hired professionals planned Dubai's spectacular transformation through the 1970s. Drawing on exclusive interviews, private archives, dog-eared photographs, and previously overlooked government documents, Todd Reisz reveals the braggadocio and persistence that sold Dubai as a profitable business plan. Architecture made that plan something to behold. Reisz highlights initial architectural achievements—including the city's first hospital, national bank, and skyscraper—designed as showpieces to proclaim Dubai's place on the world stage. Reisz explores the overlooked history of a skyline that did not simply rise from the sands. In the city's earliest modern architecture, he finds the foundations of an urban survival strategy of debt-wielding brinkmanship and constant pitch making. Dubai became a testing ground for the global city—and prefigured how urbanization now happens everywhere.

Completely revised and updated, this latest edition of the Dubai Explorer offers a unique perspective on this fast-changing city. Dozens of new activities, hotels and restaurants have been tirelessly visited and reviewed in this indispensable guide for visitors, who are expected to number over 3 million in 2001. Nine packed color-coded sections covering everything from culture and heritage, leisure, sports and nightlife to information for new residents and independent reviews of over 550 bars, restaurants, and cafes -- even where to smoke shisha pipes. All food and entertainment venues have been independently reviewed giving the reader a realistic and useful idea of what each place is really like.

Dubai Quality Management of Hot Mix Asphalt

This volume provides an authoritative and comprehensive state-of-the-art review of hot desert terrains in all parts of the world, their geomaterials and influence on civil engineering site investigation, design and construction. It primarily covers conditions and materials in modern hot deserts, but there is also coverage of unmodified ancient desert soils that exhibit

engineering behaviour similar to modern desert materials. Thorough and up-to-date guidance on modern field evaluation and ground investigation techniques in hot arid areas is provided, including reference to a new approach to the desert model and detailed specialized assessments of the latest methods for materials characterization and testing. The volume is based on world-wide experience in hot desert terrain and draws upon the knowledge and expertise of the members of a Geological Society Engineering Group Working Party comprising practising geologists, geomorphologists and civil engineers with a wealth of varied, but complementary experience of working in hot deserts. This is an essential reference book for professionals, as well as a valuable textbook for students. It is written in a style that is accessible to the non-specialist. A comprehensive glossary is also included.

Overseas Business Reports McGraw Hill Professional

Despite the fact that the Arabic world marks Al-Hijra at the start of Muharram (the first month in the lunar Islamic calendar) and the Chinese community celebrate the "Spring Festival" at the turn of the Chinese lunisolar year in late January/early February, the Gregorian calendar's New Year marks a new beginning for millions of individuals across the globe. The way in which we celebrate this varies from place to place – in parts of South America, the colour of one's clothing is said to symbolize hopes and desires for the year to come (red for love, yellow for wealth), whereas in Spain it is believed that consumption of grapes on the stroke of midnight will bring prosperity over the coming twelve month. The same may be said of wearing polka dots in the Philippines, and burning torches and fireballs are believed to drive out the impurities of the dying year at the Scottish festival Hogmanay. However the underlying principle is the same – it's out with the old and in with the new. Yet some things never change. Like your trusty, innovative and high-quality legal publication, Court Uncourt. Marking the New Year with a new volume, our team of lawyers in UAE and globally at STA promise to continue in our efforts to bring you the latest legal news with our trademark bespoke twist. We wish you a blessed New Year and an enjoyable read.
