Revenues from commodities are extremely important for Latin America and the Caribbean, yet there is very little literature on the structure of these industries and on the various ways in which the state obtains commodity revenues. This book aims to understand the trade-off between the degree of taxation overall, the profitability of the relevant industry and the amount of investment and subsequent production in the region, as well as the relevance of institutions in the performance of the sector. This volume focuses on economic efficiency: where Latin America stands in terms of the current tax system for the extractive sector; how policies have changed in this regard; and how policies may be improved. The Economics of Natural Resources in Latin America is timely, since this new era of lower and volatile prices and possible reconfiguration of investment flows poses a challenge to natural resource tax systems in the world. The argument of the book will be made by a collection of papers around the issue of tax efficiency in the region and concludes with chapters on institutions and the role of transparency. This book shows that there are varieties of experiences in resource taxation and management of revenues in Latin America that could be used to shape policy interventions in other regions. This variety is not only related to their diverse impact on welfare, but also on the policy challenges faced by the countries in the

region. This volume is well suited for those who study and find interest in development economics, political economy and public finance, as well as policy

Driving home after being kicked out of college, Tucker meets and picks up the mysterious Corinne Chang at a rest stop. Infatuated, and with nothing better to do, he ends up with her in St. Louis, where he gets a job as a chef in a Chinese restaurant. Even though he's a gwai lo—a foreign devil—his cooking skills impress the Chinese patrons of the restaurant, and his wooing skills impress Corinne when she joins him there as a waitress. But when Chinese gangsters show up demanding diamonds they believe Tucker's kind-of, sort-of, don't-call-her-a-girlfriend stole, he and his friends—which luckily include a couple of FBI agents—have to figure out just who is gunning for Corinne and how to stop them. Good thing Tucker is a Mandarin-speaking martial arts master who isn't afraid to throw the first punch. With its one-of-a-kind hero, Chinese Cooking for Diamond

Thieves is perfect for anyone who loves cooking, Chinese culture, bad jokes, and young love. Diamonds are forever . . . unless Chinese mobsters decide they want them back.

Small states have learned in recent decades that capital accumulates where taxes are low; as a result, tax havens have increasingly competed for the attention of international investors with tax and regulatory concessions. Economically powerful countries including France, Britain, Japan, and the United States, however, wished to stanch the offshore flow of domestic taxable capital. Since 1998 the Organisation for Economic Co-operation and Development (OECD) has attempted to impose common tax regulations on more than three dozen small states. In a fascinating book based on fieldwork and interviews in twenty-two countries in the Caribbean, North America, Europe, and islands in the Pacific and Indian Oceans, J. C. Sharman shows how the struggle was decided in favor of the tax havens, which eventually avoided common regulation. No other book on tax havens is based on such extensive fieldwork, and no other author has had access to so many of the key decision makers who played roles in the conflict between onshore and offshore. Sharman suggests that microstates succeeded in their struggle with great powers because of their astute deployment of reputation and effective rhetorical self-positioning. In effect, they persuaded a transnational audience that the OECD was being untrue to its own values by engaging in a hypocritical, bullying exercise inimical to free competition.

Bachelor Thesis from the year 2016 in the subject Law - Tax / Fiscal Law, grade: 1,1, language: English, abstract: Over the last few years, the sharing economy has grown substantially with new high-profile businesses emerging. Especially Airbnb became an integral part of the accommodation industry and disrupted traditional hotel and Bed and Breakfast businesses. However, at present, Airbnb has to face many controversies due to consumer safety, regulatory and tax evasion issues. As regulators and legislators established laws and regulations with the traditional economy in

mind, they are not suited for the sharing economy and application often remains uncertain, especially in the area of taxation. Consequently, the difficulty of establishing an effective regulatory framework for the sharing economy is receiving considerable attention currently. Therefore, this thesis aims to identify some of the challenges that will be of concern to regulators when developing a regulatory framework and outlines some guiding principles for regulating Airbnb. Finally, this thesis finds that a self-regulatory approach could be the most effective solution to encounter the difficulties and controversy.

After two generations of emphasis on governmental inefficiency and the need for deregulation, we now see growing interest in the possibility of constructive governance, alongside public calls for new, smarter regulation. Yet there is a real danger that regulatory reforms will be rooted in outdated ideas. As the financial crisis has shown, neither traditional market failure models nor public choice theory, by themselves, sufficiently inform or explain our current regulatory challenges. Regulatory studies, long neglected in an atmosphere focused on deregulatory work, is in critical need of new models and theories that can guide effective policy-making. This interdisciplinary volume points the way toward the modernization of regulatory theory. Its essays by leading scholars move past predominant approaches, integrating the latest research about the interplay between human behavior, societal needs, and regulatory institutions. The book concludes by setting out a potential research agenda for the social sciences.
