This book explores NGO presence through detailing relationships, personhoods and meaning making in a collection of

Northern Malawian fishing villages. Its key claim is that NGOs' projects and resources have less impact on villagers' lives than the symbols they emit and the ways they encourage re-imaging development and renegotiating intra-community obligations and entitlements.

It relates each feature to specific photographic techniques and situations. Also included is the handy camera "roadmap," an easy-to-use visual guide to the Mark IV's features and controls. Learn when to use every option and,

more importantly, when not to use them, by following the author's recommended settings for every menu entry. With best-selling photographer and mentor David Busch as your guide, you'll quickly have full creative mastery of your camera's capabilities, whether you're shooting on the job, taking pictures as an advanced enthusiast exploring photography for the first time, or are just out for fun. Start building your knowledge and confidence, while bringing your vision to light with

the Canon EOS 5D Mark IV. Enduring the Freedom Fodors Travel Publications US Air Force Second Lieutenant Sean Mitchell catches a military cargo aircraft to Clark Air Base for a bit of adventure-something to break up the daily routine back at his duty station in Denver Colorado. His "adventure" turns into a life-and-death escape mission as he unwittingly finds himself an accessory to a large-scale criminal racket. When he befriends a street kid named Billy

Bong, Mitchell's world changes forever. He admires the young enterprising lad and wants to promote his street-side business. But, his association with Billy Bong leads Mitchell right into the crushing jaws of some powerful Angeles City criminal strongmen. Mitchell's actions are noble, but naïve. He's out of his league on the rough and tumble streets of Angeles City. Mitchell finds himself outnumbered and on the run. Will he be able to make it out of the

Philippines, or is his nightmare just beginning? Dreams of the Philippines is based on the true adventures of author Dave Ives. Through his writing, the memory of Clark Air Base and Angeles City in 1989 comes alive.

Within hours of the September 11 attacks, Sean M. Maloney deciphered that Osama bin Laden and al Qaeda were the aggressors behind the despicable act.

A war in Afghanistan then was inevitable. As a military historian, Maloney was determined to go there to study and record the events for posterity, if for no other reason than the education of his future students at Canada's Royal Military College. What resulted is an in-depth and up-close look at the planning stages, deployment, and aftermath of Operation Enduring Freedom in Afghanistan. In Enduring the Freedom, Maloney presents a rare on-the-spot view from such

important locations as Kabul, Bagram, and Kandahar. He describes the American-led intervention in Afghanistan and the conduct of the war through early 2003, then discusses the events of 2003 from the three locales in detail. Some critics contend that the war in Afghanistan is another Vietnam. Maloney rebuts that appraisal, pointing out that as opposed to the vague language of the Vietnam era, American objectives were clearly stated for

Afghanistan. Those objectives were: to destroy al Qaeda's networks, training camps, resources, and communication systems; to destroy any governmental entity providing support or sanctuary to al Qaeda; and to undertake reconstruction efforts to ensure international terrorists can never again use the country as a base. The first objective has more or less been achieved. How to accomplish the last two is still widely debated, and

Maloney offers some insightful thoughts and opinions. Finally, he offers educated advice going forward in the hopeful completion of Operation Enduring Freedom.

In *Windows on Japan*, a New Zealander walks across rural Japan and ponders centuries-old perceptions about the country that is still prisoner to an isolationist past. In a deeply insightful commentary, the author

surveys cultural, social and political mores, explores the wellspring of racial perception and the problem of the memory of war. *Windows on Japan* alternates chapters of physical travel with travel through perception about Japan, and challenges the logic of much Western thought about the country that perplexes as much as it pleases. The author walked a route that connects the ports of Niigata and Yokohama and from these windows on the world considers perceptions of people and

place. He also assesses the effect of Japan on writers from Jonathan Swift to Oscar Wilde, Shirley MacLaine and Paul Theroux with surprising results. The trading entity that wraps its tentacles around the globe, converses in most languages and understands most customs, is perceptive and urbane and none appears more capable or cosmopolitan. Yet the individuals who inhabit these islands take refuge in their language as a private habitat, resent

intrusions, and are captured by a cultural particularism that distances them from others. The author discusses this paradox, as well as environmental and linguistic issues and topics of history and literature. Along the way, he lifts a veil on the life of a snow country geisha, discusses current events with a priest and a reporter, and takes advice on becoming a Japanese. Though he is understood, it is only on return visits to places he has come to love that he wins

acceptance. Notes on music delightfully enrich the narrative.

This volume contains the papers selected for presentation at the 2010 International Conference on Active Media

Technology (AMT2010), jointly held with the 2010

International Conference on Brain Informatics (BI 2010), at York University, Toronto, Canada, during August 28-30, 2010.

Organized by the Web Int-

elligence Consortium (WIC) and IEEE Computational Intelligence Society Task Force on Brain Informatics (IEEE-CIS TF-BI), this conference was the sixth in the AMT series since its debut conference at Hong Kong Baptist University in 2001 (followed by AMT 2004 in Chongqing, China, AMT 2005 in Kagawa, Japan, AMT 2006 in Brisbane, Australia, AMT 2009 in Beijing, China). Active media technology (AMT) is a new area of research and development in intelligent information technology

and computer science. It emphasizes the proactive, adaptive and seamless roles of interfaces and systems as well as new media in all aspects of digital life. Over the past few years, we have witnessed rapid developments of AMT technologies and applications ranging from business and communication to entertainment and learning. Examples include Facebook, Twitter, Flickr, YouTube, Moodle, Club Penguin and Google Latitude. Such developments have greatly ch

anged our lives by enhancing the way we communicate and do business.

The Naval Academy's culture is a unique and sometimes baffling phenomenon to the outside world, but with this newly updated guide in hand relatives and friends of midshipmen will find answers to all the questions they might have about Academy life. Since it was first published more than a decade ago, parents have relied on the almanac for insights into their sons' and daughters' experiences at Annapolis. Now the son of the original author has taken

on the responsibility of bringing the popular reference up to date. An Academy graduate, active duty naval officer, and former English instructor at the Academy, the younger Mackenzie makes full use of his intimate knowledge of Annapolis to fill in the gaps. Along with the latest facts on car ownership, dating policies, athletic requirements, and disciplinary demands, you'll now find a useful guide to Internet resources. A midshipman profile and a dictionary of

"Midspeak" completes the picture in a book whose title recalls the midshipmen's own manual, Reef Points, but extends its concept for outsiders seeking practical information about the Academy, the Navy, and Annapolis. Prospective applicants, graduates, newcomers to the USNA staff, and visitors seeking a memento will also be attracted to this useful guide.

This is not a traditional

textbook or collection of case studies, but is intended to demonstrate the complex and manifold questions of retail management in the form of 18 lessons that provide a thematic overview of key issues and illustrate them with the help of comprehensive case studies. In the second edition, all chapters were revised and updated. Three new chapters were added to treat topics like

online-retailing and multi-channel-strategies as well as the so called verticals in specific chapters. All case studies were replaced by new ones to reflect the most recent developments. Eighteen well-known retail companies from different countries, like Best Buy, IKEA, TK Maxx, Tesco and Decathlon, are now used to illustrate particular aspects of retail management.
