The Nature of Classical Chinese Medicine: The foundational context to re-unite myriad styles. (Book 1 of 2 - Foundation and Constitution, Energetic Anatomy and Physiology) This book (in two parts) is an extensive research project into the original essence of Classical (Han-dynasty) Chinese medicine. It is an investigation to look at how medicine might have been understood and connected to from the origin of Taoist Non-duality as expressed in the Tao Te Ching. There are today myriad styles and approaches to energy-medicine all over the world, and even within Chinese medicine itself. This book aims to connect to the unifying principle that is inclusive not exclusive, and as such has the potential to unify all medicine. This book attempts to clarify theoretical positions but with the key realization that Classical books were only pointers to instinctual health and the nature-led healing that occurs when "self" and hierarchical egotism drop out.

Mixtures is of central importance for Galen's views on the human body. It presents his influential typology of the human organism according to nine mixtures (or 'temperaments') of hot, cold, dry and wet. It also develops Galen's ideal of the 'well-tempered' person, whose perfect balance ensures excellent performance both physically and psychologically. Mixtures teaches the aspiring doctor how to assess the patient's mixture by training one's sense of touch and by a sophisticated use of diagnostic indicators. It presents a therapeutic regime based on the interaction between foods, drinks, drugs and the body's mixture. Mixtures is a work of natural philosophy as well as medicine. It acknowledges Aristotle's profound influence whilst engaging with Hippocratic ideas on health and nutrition, and with Stoic, Pneumatist and Peripatetic physics. It appears here in a new translation, with generous annotation, introduction and glossaries elucidating the argument and setting the work in its intellectual context.

“This comprehensive analysis on abuse committed in the home provides insights at both the micro and macro levels... The book combines legal and social science approaches in a way that makes it essential reading for anyone studying or working on violence-related issues.” Kevät Nousiainen, University of Helsinki, Johanna Niemi-Kiesiläinen, University of Umeå and

Anu Pylkkänen, University of Helsinki. "This excellent book offers a timely intervention into debates about violence. Whilst most debates still focus on the spectacular rather than mundane forms of violence, Linda McKie uses a synthesis of legal, sociological and feminist research to show how current debates fail to deal with the violence that underpins our lives." Prof Beverley Skeggs, University of London. An exciting new addition to the series, this book tackles assumptions surrounding the family as a changing institution and supposed haven from the public sphere of life. It considers families and social change in terms of concepts of power, inequality, gender, generations, sexuality and ethnicity. Some commentators suggest the family is threatened by increasing economic and social uncertainties and an enhanced focus upon the individual. This book provides a resume of these debates, as well as a critical review of the theories of family and social change: Charts social and economic changes and their impact on the family Considers the prevalence and nature of abuse within families Explores the relationship between social theory, families and changing issues in familial relationships Develops a theory of social change and families through a critical and pragmatic stance Key reading for undergraduate students of sociology reading courses such as family, gender, health, criminology and social change.

The papers in this volume were presented at a conference held at the Roehampton Institute, London, in February 1995, and are concerned with either theological or literary issues related to the nature of religious language. The papers suggest further issues that are still unresolved about the nature of religious language,

from its early usage in the biblical texts to its recent use in contemporary writing and religious discourse.
