An absolute sensation when first seen in 1948, in the midst of post-war austerity, the Jaguar XK 120 was both a stunningly beautiful car sold to all the top film stars, and a ruthlessly successful rally machine--and it remains just as effective on both counts today. A perfect XK 120, 140 or 150 could easily cost six figures in pounds, dollars or euros today--so how practical is it to buy a neglected example and restore it at home? This is the story of how one man completely restored his XK 120 roadster, transforming it from dereliction into a thoroughly beautiful example of this iconic sports car. He also took the time to investigate and incorporate numerous detail improvements, making the car even more usable and practical for today's roads, some 65 years after it was built. Cable TV engineer Bob Exelby has a lifetime of home classic car rebuilds behind him and shares all the nuggets of information, advice and tips gleaned through his own blood (literally), sweat and tears over 50 years of 'playing with old cars'. Even the most experienced make mistakes, and he freely shares his so that others can avoid them. This book is invaluable if you want to know what makes an XK 'tick', and if it's the classic car for you--and vital if you own or are restoring one.

Whilst at a holiday cottage in Cornwall, nine-year-old Bill makes a fantastic discovery hidden at the back of the garage - a Jaguar XK 120. What's more, an XK 120 that can talk! Bill and the car soon become firm friends. Bill names the car 'XK' and introduces him to his Grandpa. Together they realise that magic happens when Bill sits in the car. The engine starts, XK transforms into a new car, and they are magically transported back in time. XK takes them to Grandpa's childhood home in London, in 1948. Bill sees his Grandpa and Great Aunt Charlotte, as children, and watches the London of the late 40s being rebuilt after the war. The next time they visit, they witness the Great Smog of 1952 first-hand. Bill realises just how different things were for his Grandpa growing up. When they visit again, it is the day of Princess Elizabeth's Coronation in 1953. At the street party outside Grandpa's house, Bill overhears a conversation between three gentlemen - spies - which sets him, XK and Grandpa a mystery to solve. Their adventures take them across London, with the events of the Coronation day taking place all around them. They must find out what is going on, with XK, young Grandpa and Charlotte's help - and save the day!

This is the eighth title in the now well-established In Detail series. Its subject, the Jaguar XK120, has become one of the immortals of sports car history and remains one of the most beautiful cars ever built. It took the London Motor Show by storm in 1948, and was built until 1954. Combining extraordinary docility with a startling 120mph top speed, it was the car to be in, whether for cruising California boulevards or racing at Le Mans. The book is published in association with the Jaguar Daimler Heritage Trust and written by the Trust's Archivist. Drawing from company records and archives, he has been able to provide information on the XK120 that has never been available to enthusiasts before. This, and its focus on the XK120 alone rather than on the whole XK family, make this book uniquely informative.

Chevy's Corvette is without question one of the most recognized sports cars in the world. Since its introduction at GM's Motorama, Corvettes have been favorites for fans and drivers in a wide variety of racing venues, including endurance events, hillclimbs, Trans-Am, drag racing, and GT Racing. For six decades, Corvettes have battled and defeated some of the the biggest names in the sports car world—Ferrari, Porsche, Cobra, Jaguar—at storied road courses like Le Mans, Daytona, the Nürburgring, Sebring, and Laguna Seca. Beginning with the Real McCoy, a Zora Arkus-Duntov special raced at Sebring in 1956, this book draws on the history of factory-sponsored and private racing efforts, chronicling the history of the various Vettes that have been put to the test as racing machines. Noted automotive writer and renowned artist David Kimble delves deep into Vette's on-track history to provide the most thorough Corvette racing history ever published. Corvette Racing is illustrated with rare images from GM's media and design archives and complemented by Kimble's own stunning cutaway artwork. The Jaguar XK was launched to great acclaim in 1996 as the successor to the XJS. Jaguar's XK sports models were produced from 1996 to 2014 in two distinct forms: the original steel-bodied XK, and, in 2005, the advanced technology aluminium-bodied New XK. Highly significant for Jaguar, these cars reintroduced the world to Jaguar sports car motoring and, in doing so, echoed the success of previous icons, such as the E-type. The original edition of this book covered just the X-100 (original series) XKs from 1996 through to 2005. This edition, now in paperback, brings the story up to date with the X-150 alloy-bodied cars, from 2006 through to the end of production in 2014. A significantly enlarged work, packed with information and over 130 additional full-colour pictures, this fascinating book is essential reading for all XK owners, prospective owners and enthusiasts - the perfect XK 'handbook.'

This book tells the fascinating, and sometimes frustrating, story of the journey from the iconic Jaguar E-type to its successor, the F-type. With nearly 300 photographs, it documents the evolution of the F-type from the Pininfarina XJ Spider through Jaguar's own XJ41/42, XX and XK180. It reviews the whole range of F-type convertible and coupe models and discusses the wild Project 7 and the latest turbo-charged four-cylinder cars. The special vehicles produced for Team Sky and Bloodhound SSC are included along with a useful chapter on buying an F-type. Finally, the book considers the F-type's future in a changing automotive world.

Miles C. Collier asks: should we really let go of the vast amounts of collective knowledge that resides in automobiles? If not, how can we hold on to it? ● Archaeology isn't just about digging in grubby trenches. It is a way of thinking about the past and applying our imagination to the future. Miles C. Collier's remarkable analysis applies this thought process to cars. ● Miles C. Collier brings an archaeological point of view to the pithy matter of deciding how we understand and treat our automobiles, and how we pass this knowledge to generations to come. ● This book combines scholarship, pertinent anecdotes, style, and experience to provide a stimulating account of why we should all be archaeologists now.

Few, if any, Jaguar XK120s can have enjoyed a more fascinating and varied life than chassis number 660725. Just under two-thirds of the total production was allocated to the Roadster, which had caused such a stir at the 1948 London Motor Show. Of that, 660725 was one of just 1,173 right-hand-drive Roadsters constructed. "Apart from now being the longest-serving XK120 owner, I also consider myself the most fortunate, lucky, accidental, blessed, providential - call it what you will - owner. Why? Because no fictional script writer could have come up with the number or variety of experiences, both dangerous and funny, in so many different countries and environments, that any combination of car and man would experience together." Bob Henderson, January 2013
