CARLA MARSHALL

Group Therapy For Cancer Patients: A Research-based Handbook Of Psychosocial Care

Oxford University Press
 This compassionate guide presents an array of new perspectives on the emotional effects of breast cancer and includes many personal testimonies from women who have been diagnosed with this disease. Written by a breast cancer survivor and practising psychologist, it shares practical ideas to help support sufferers at all stages, be it at diagnosis, during treatment or during life after the initial treatments are over. The concise, easy-to-read format includes exercises to develop an acceptance of thoughts and feelings, whilst the individual accounts validate the multitude of emotions felt by sufferers. It is a must for all breast cancer patients and sufferers, their families and friends. Its real-life approach, using first hand accounts, is also highly recommended for all health and social care professionals wanting a fresh approach to managing the emotional impacts of breast cancer. The shock of being diagnosed with breast cancer is hard to describe in words, as anyone who has had to suffer this diagnosis knows. Until it happens to us, we cannot really know how it feels. Not only do we have to deal with the diagnosis and subsequent treatments, but also we have to deal with the fact that breast cancer profoundly affects how we feel about ourselves as women. From the Introduction
Handbook of Counseling Women John Wiley & Sons
 The Handbook of Counseling Women addresses current theories, research, and issues relevant to the mental and physical well-being of women. Edited by Mary Kopala and Merle A. Keitel, this comprehensive volume is divided into three parts. Part One focuses on theoretical, sociocultural, biological, and developmental considerations. Part Two is devoted to assessment, diagnosis, and intervention. Part Three covers supervision, research, and ethics. Most chapters include case studies, recommendations for further reading, and resources for clients. Essential reading for psychologists, social workers, counselors, and psychiatric nurses, this handbook will also appeal to graduate and undergraduate students in counseling, clinical psychology, and clinical social work courses.
Depression and Cancer SAGE Publications
 Geriatric Psycho-Oncology is a comprehensive handbook that provides best practice models for the management of psychological, cognitive, and social outcomes of older adults living with cancer and their families. Chapters cover a wide range of topics including screening tools and interventions, psychiatric emergencies and disorders, physical symptom management, communication issues, and issues specific to common cancer

sites. A resource section is appended to provide information on national services and programs. This book features contributions from experts designed to help clinicians review, anticipate and respond to emotional issues that often arise in the context of treating older cancer patients. Numerous cross-references and succinct tables and figures make this concise reference easy to use. Geriatric Psycho-Oncology is an ideal resource for helping oncologists and nurses recognize when it may be best to refer patients to their mental health colleagues and for those who are establishing or adding psychosocial components to existing clinics.

Psychosocial Palliative Care John Wiley & Sons
 Quality of life is an important outcome when treating a cancer patient. Research is vast on the role of quality of life on patients' general wellbeing, responsiveness to treatment, and even mortality. On the other hand, there are several methodological considerations when planning to measure and assess quality of life in cancer patients. This handbook – with authorship that is diverse in terms of perspectives, countries, and fields – aims to fill a gap in the available literature and responds to a number of questions in its 26 chapters: What is quality of life and health-related quality of life and why are they important? How is quality of life assessed? What are the theoretical and methodological considerations when using quality of life outcomes in cancer research? How is quality of life useful in routine clinical care? How is quality of life impacting different cancer populations in terms of site of the cancer, age, gender, and context? Handbook of Quality of Life in Cancer is a learning and consulting tool that can be used by a diverse audience. It is an essential resource for researchers who wish to use quality of life assessment tools in clinical trials or other types of studies; clinicians who want to develop their understanding of how they can utilize quality of life and how it is important for the patients they care for; and commissioners who wish to see why quality of life may impact population health and health system costs. Students in diverse fields of study (medicine, nursing, psychology, social work, medical sociology, population health, epidemiology, and medical statistics, among others) also would benefit from using the handbook for their studies and for their continuing professional development.
 Bergin and Garfield's Handbook of Psychotherapy and Behavior Change Handbook of Psychotherapy in Cancer Care
 Handbook of Psychotherapy in Cancer Care John Wiley & Sons
Geriatric Psycho-Oncology John Wiley & Sons
 Brief Cognitive Behavior Therapy for Cancer Patients is a practical, clinical guide that allows for the integration of techniques from multiple newer CBT models, organized around a clear conceptual foundation and case conceptualization. The book targets those cognitive, emotional, and behavioral processes that research suggests are instrumental in the maintenance of human

psychological suffering. Author Scott Temple also draws on newer models that build on strengths and resilience and brings clinical work to life through vivid case examples, worksheets, and case conceptualization forms. Detailed vignettes show clinicians how to create a case conceptualization as a guide to treatment, as well as how to integrate Beckian and newer CBT techniques.

Oxford Handbook of Cancer Nursing OUP Oxford
 Alternatives in Cancer Therapy offers help for all patients coping with cancer. The therapies discussed in this book are primarily non-toxic, have few, if any, side effects, and tend to strengthen the immune system. They can be used as supplemental regimens that help maximize the effectiveness of traditional therapies such as surgery, radiation, and chemotherapy. Patients have a right to know all of their treatment options, and Dr. Ross Pelton presents dozens of choices, including: * Shark Cartilage * Gerson Therapy * Mistletoe * Isoprinosine * Laetrile * Selenium * Beta-Carotene * Hydrogen Peroxide * Vitamins C and E * The Hoxsey Treatment
 Non-traditional therapies can enhance the quality of life, and improve overall health while treating the disease. Alternatives in Cancer Therapy provides information on the research, efficacy, potential side effects, and availability of each treatment.

Handbook of Oncology Social Work Apos Clinical Reference Handbo
 Outlining the unique psychosocial and development issues faced by young adults affected by cancer, this text draws on qualitative data from two pilot studies conducted in the US to illustrate how the needs of this often overlooked population can be effectively met via group therapy in clinical settings. Drawing on 25 years of experience as a licensed clinical social worker supporting pediatric and young adult cancer patients and their families, Kurker focuses on the role of the clinician in structuring support group sessions. Chapters draw on patient perspectives to demonstrate effective application of interventions to help adolescents work through trauma associated with a diagnosis of cancer, treatment, recovery, and the impacts on their development. Outcomes from these studies also include strategies for selecting support group participants, structuring group activities, and securing funding. Effective Group Therapies for Young Adults Affected by Cancer will be a valuable text for oncology social workers and clinicians involved in adolescent support services. In addition, researchers and postgraduate students with an interest in the fields of social work, psychology, and adolescent development will find the book of interest.
Handbook of Psychooncology Oxford University Press
 This new book by international experts in psycho-oncology has arisen from the teaching academies offered by the International Psycho-oncology Society. It distills the wisdom and experience from the training manuals dedicated to individual psychological therapies and combines them into an accessible handbook for

clinicians in cancer care today. The editors have brought together leading researchers and therapists, who provide accounts of the prominent models of psychotherapy currently being used in cancer care, the key themes they address and the essential techniques needed to apply each approach successfully. Helpful clinical illustrations are woven throughout the book to make overt the strategies found in each model. Provides practical guidance about how to deliver a range of individual, group, couple and family interventions that have proven utility in cancer care. Describes comprehensively each model of psychotherapy as taught by experts delivering the International Psycho-Oncology Society's Educational Academy on cancer care for patients and their families. Features practical suggestions on therapy delivery from the world's leading proponents of each therapy. Serves as a valuable tool to assist teaching and to facilitate research into psychological interventions in oncology, palliative care and bereavement. Functions as a readily accessible resource for clinicians struggling to support someone effectively, through its provision of insight into the common challenges and traps that arise when providing patients with emotional support. This practical handbook will help not only psychiatrists, psychologists and social workers but also physicians, surgeons, general practitioners and nurses interested in better understanding and supporting the patients and families they care for.

Emotional Support Through Breast Cancer Oxford University Press
The development of this inaugural Handbook of Oncology Social Work: Psychosocial Care for People With Cancer provides a repository of the scope of oncology social workers' clinical practice, education, research, policy and program leadership in the psychosocial care of people with cancer and their families. It focuses on the unique synergy of social work perspectives, values, knowledge, and skills with the psychosocial needs of cancer patients, their families, and the health care systems in which they are treated. It addresses both the science and art of psychosocial care and identifies the increasing specialization of oncology social work related to its unique knowledge base, skills, role, and the progressive complexity of psychosocial challenges for patients with cancer. This Handbook equips the reader with all that we know today in oncology social work about patient and family centered care, distress screening, genetics, survivorship, care coordination, sociocultural and economic diversity, legal and ethical matters, clinical work with adults living with cancer, cancer across the lifespan, their caregivers and families, pediatrics, loss and grief, professional career development, leadership, and innovation. Our hope is that in reading this Handbook you will identify new areas where each of you can leave your mark as innovators and change agents in our evolving field of practice.

Oxford Guide to CBT for People with Cancer American Psychiatric Pub

What psychological and environmental forces have an impact on health? How does behavior contribute to wellness or illness? This comprehensive volume answers these questions and others with a state-of-the-art overview of theory, research, and practice at the interface of psychology and health. Leading experts from multiple disciplines explore how health and health behaviors are shaped by a wide range of psychological processes and social-environmental factors. The book describes exemplary applications in the prevention and clinical management of today's most pressing health risks and diseases, including coronary heart disease, depression, diabetes, cancer, chronic pain, obesity, sleep disturbances, and smoking. Featuring succinct, accessible chapters on critical concepts and contemporary issues, the Handbook integrates psychological perspectives with cutting-edge work in preventive medicine, epidemiology, public health, genetics, nursing, and the social sciences.

Counseling Women with Breast Cancer Taylor & Francis
Maintaining dignity for patients approaching death is a core principle of palliative care. Dignity therapy, a psychological intervention developed by Dr. Harvey Max Chochinov and his internationally lauded research group, has been designed specifically to address many of the psychological, existential, and spiritual challenges that patients and their families face as they grapple with the reality of life drawing to a close. In the first book to lay out the blueprint for this unique and meaningful intervention, Chochinov addresses one of the most important dimensions of being human. Being alive means being vulnerable

and mortal; he argues that dignity therapy offers a way to preserve meaning and hope for patients approaching death. With history and foundations of dignity in care, and step by step guidance for readers interested in implementing the program, this volume illuminates how dignity therapy can change end-of-life experience for those about to die - and for those who will grieve their passing.

Counselling People with Cancer National Academies Press
Health psychology is a rapidly expanding discipline at the interface of psychology and clinical medicine. This new edition is fully reworked and revised, offering an entirely up-to-date, comprehensive, accessible, one-stop resource for clinical psychologists, mental health professionals and specialists in health-related matters. There are two new editors: Susan Ayers from the University of Sussex and Kenneth Wallston from Vanderbilt University Medical Center. The prestigious editorial team and their international, interdisciplinary cast of authors have reconceptualised their much-acclaimed handbook. The book is now in two parts: part I covers psychological aspects of health and illness, assessments, interventions and healthcare practice. Part II covers medical matters listed in alphabetical order. Among the many new topics added are: diet and health, ethnicity and health, clinical interviewing, mood assessment, communicating risk, medical interviewing, diagnostic procedures, organ donation, IVF, MMR, HRT, sleep disorders, skin disorders, depression and anxiety disorders.

Cancer Care for the Whole Patient Penguin
Counselling People with Cancer Mary Burton and Maggie Watson
Counselling People with Cancer is a practical 'how to' book written by two eminent psychologists with many years of hands-on experience in helping patients and their families face, and overcome, the many psychological problems associated with cancer. The book is intended primarily for health care professionals in regular contact with cancer patients and whose work involves a counselling element. It will also be of interest to carers in a broader sense who ask themselves, 'How can I help with the emotional side of dealing with cancer?' The book explains in clear and practical terms what to look and listen for and how to respond to the psychological needs of cancer patients and their families at different stages of the disease from the 'bad news' interview to coping with the disease and its treatment, facing common communication problems, and dealing with family issues and sexual problems. A comprehensive survey of counselling is presented with discussion of the three mainstream models of counselling - psychodynamic, humanistic and cognitive-behavioural. The final chapter deals with professional issues and offers practical suggestions for setting up a counselling service. Psychologists, psychotherapists, oncologists and nurses will find this book an indispensable guide for helping patients and their families to cope with the difficult experience of cancer.

Cancer As a Turning Point Oxford University Press
Rev. ed. of: Cognitive behaviour therapy for people with cancer / Stirling Moorey and Steven Greer. 2002.
Handbook of Quality of Life in Cancer Wiley
The Handbook of Counseling Women, edited by Mary Kopala and Merle Keitel, draws together a nationally recognized group of contributing scholars and practitioners to address current theories, research, and issues relevant to the mental and physical well-being of women. Comprehensive and accessible, the Second Edition is organized into three parts covering theoretical, sociocultural, biological, and developmental considerations; assessment, diagnosis, and intervention; and supervision, research, and ethics. The reorganization of this new edition includes more sections and chapters giving special attention to such topics as women and poverty, intimate partner violence, women's career barriers, and considerations for specific ethnic groups.

Managing Cancer and Living Meaningfully John Wiley & Sons
"Psycho-oncology, 4th Edition is solemnly dedicated to Professor Jimmie C. Holland, M.D., internationally recognized as the founder of the field of Psycho-oncology. Dr. Holland, who was affectionately known by her first name "Jimmie", had a profound global influence on the fields of Psycho-oncology, Oncology, Supportive Care, Psychiatry, Behavioral Medicine and Psychosomatic Medicine. At the time of her passing, Dr. Holland was the Attending Psychiatrist and Wayne E. Chapman Chair at

Memorial Sloan-Kettering Cancer Center (MSK) and Professor of Psychiatry, Weill Medical College of Cornell University in New York"--

Meaning-Centered Psychotherapy in the Cancer Setting Oxford University Press, USA

The development of this inaugural Handbook of Oncology Social Work: Psychosocial Care for People With Cancer provides a repository of the scope of oncology social workers' clinical practice, education, research, policy and program leadership in the psychosocial care of people with cancer and their families. It focuses on the unique synergy of social work perspectives, values, knowledge, and skills with the psychosocial needs of cancer patients, their families, and the health care systems in which they are treated. It addresses both the science and art of psychosocial care and identifies the increasing specialization of oncology social work related to its unique knowledge base, skills, role, and the progressive complexity of psychosocial challenges for patients with cancer. This Handbook equips the reader with all that we know today in oncology social work about patient and family centered care, distress screening, genetics, survivorship, care coordination, sociocultural and economic diversity, legal and ethical matters, clinical work with adults living with cancer, cancer across the lifespan, their caregivers and families, pediatrics, loss and grief, professional career development, leadership, and innovation. Clinical Manual of Supportive Psychotherapy, Second Edition OUP USA

The Handbook of Counseling Women addresses current theories, research, and issues relevant to the mental and physical well-being of women. Edited by Mary Kopala and Merle A. Keitel, this comprehensive volume is divided into three parts. Part One focuses on theoretical, sociocultural, biological, and developmental considerations. Part Two is devoted to assessment, diagnosis, and intervention. Part Three covers supervision, research, and ethics. Most chapters include case studies, recommendations for further reading, and resources for clients. Essential reading for psychologists, social workers, counselors, and psychiatric nurses, this handbook will also appeal to graduate and undergraduate students in counseling, clinical psychology, and clinical social work courses.

Brief Cognitive Behavior Therapy for Cancer Patients Cambridge University Press

Increasing efficacy of biomedical treatments for cancer means that more and more people are living longer with the disease. The five-year relative survival rate for all cancers has increased considerably in the last three decades, with some survivors living for many years and thus facing increasingly complex psychosocial issues. As a result, the mental health subspecialty of psycho-oncology is growing and is responding to the many calls for increased availability of psychological services for cancer patients. Psychosocial Care of the Adult Cancer Patient introduces psychologists and other mental health professionals to the field of psycho-oncology, educates them about evidence-based interventions for individuals, groups, couples, and families, and describes how to successfully collaborate with oncologists and other cancer care professionals. Introductory in nature and providing ready access to a range of evidence-based interventions, this book briefs the reader on the field of psycho-oncology and the basics of cancer, explains screening and assessment for psychosocial distress, details the principles of evidence-based interventions, and concludes with case examples that illustrate the evidence-based practice competencies-ask, access, appraise, translate, integrate, and evaluate. In a unique writing style, the case examples reveal the decision-making process of an experienced clinician doing evidence-based practice. Practical strategies for addressing the psychological needs of cancer patients and their families are offered in an easy-to-use, quick reference format. Key points are highlighted and enhanced through the use of tables and figures designed to summarize and emphasize important information. This book will be of value to clinical and counseling psychologists and other mental health professionals, as well as graduate students in psychology, social work, mental health counseling, oncology nursing, and other cancer care professions.
